

Contents

Chairman: *N. Ramsey*

Scale Invariance and the Light Cone <i>Harald Fritzsch and Murray Gell-Mann</i>	1
The Light Cone in Particle Physics <i>Richard A. Brandt and Giuliano Preparata</i>	43
Light Cone Expansions and Applications <i>Y. Frishman</i>	61
Approximate Scale and Chiral Invariance <i>John Ellis</i>	77
On Determining the Dimension of the Chiral Invariance Breaking Term in the Energy Momentum Tensor <i>Gino Segre</i>	99
Scaling Law and Scale Invariance <i>G. Mack</i>	106
Some Remarks Concerning the Parton Model <i>H. Leutwyler</i>	113
Non-Canonical Dimensions <i>Kenneth G. Wilson</i>	122
Deep Inelastic Electron-Hadron Scattering and Reggeism <i>Harald Fritzsch</i>	129
Dilation Width, Tensor Meson Dominance, and Broken Conformal Invariance <i>R.J. Chewther</i>	136
List of Participants	147
