

## CONTENTS

### SESSION 1 — The need for new particle accelerators

The future of high-energy accelerators in physics	Panofsky, W. K. H.	3
Studies at Berkeley and MURA on future high energy proton accelerators	Judd, D. L.	6
Discussion		12
Experimental utilization of colliding beams	Jones, L. W.	15
Discussion		22
Experimental methods for colliding beams	O'Neill, G. K.	23
Discussion		26

### SESSION 2A — Advances in high-energy particle accelerators

Radial straight sections in spiral sector FFAG accelerators	Cole, F. T. and Morton, P.L.	31
Computational results pertaining to use of a time-dependent magnetic field perturbation to implement injection or extraction in a FFAG synchrotron	Laslett, L. J. and Symon, K. R.	38
Beam extraction from FFAG synchrotrons	Jones, L. W. and Terwilliger, K. M.	48
Achieving higher beam densities by superposing equilibrium orbits	Terwilliger, K. M.	53
Comparison of experimental results with the theory of radio-frequency acceleration processes in FFAG accelerators	Jones, L. W., Pruett, C. H., Symon, K. R. and Terwilliger, K. M.	58
The MURA two-way electron accelerator	MURA staff	71
Experience with a spiral sector FFAG electron accelerator	Haxby, R. O., Laslett, L. J., Mills, F. E., Peterson, F. L., Rowe, E. M. and Wallenmeyer, W. A.	75
Typical designs of high energy FFAG accelerators	Cole, F. T.	82
Investigations connected with the design of accelerators of the ring phasotron type	Kanunnikov, V. N., Kolomenskij, A. A., Lebedev, A. N., Ovchinnikov, E. P., Stolov, A. M., Titov, V. A., Fateev, A. P. and Yablókov, B. N.	89
Discussion		99

Studies of an experimental beam-stacking electron accelerator	Barbier, M., Ferger, F. A., Fischer, E., Kirstein, P. T., Munday, G. L., Morpurgo, M., Pentz, M. J., Schoch, A., Susini, A., Vogt-Nilsen, N.	100
Certain beam-stacking effects in fixed-field magnetic systems	Kolomenskij, A. A. and Lebedev, A. N.	115
Discussion		124
Storage rings for electrons and protons	O'Neill, G. K.	125
Discussion		134
 <b>SESSION 2 B — Advances in high-energy particle accelerators</b>		
Plasma betatrons	Linhart, J. G., Gratreau, P., Harrison, E. R., Maisonnier, C., Schneider, F. and Schoch, A.	139
Discussion		145
The megatron—a high field plasma betatron	Rogers, K. C., Finkelstein, D., Ferrari, L., Caulfield, D., Mansfield, I. and Brucker, G.	145
Discussion		151
Axial field plasma betatron	Yoshikawa, M., Ohkawa, T. and Miyamoto, G.	152
Plasma linear accelerator	Ishizuka, H., Ohkawa, T., Miyamoto, G., Nisikawa, T. and Kumagai, H.	157
Discussion		159
On coherent impact acceleration	Veksler, V. I. and Tsytovich, V. N.	160
Discussion		166
Plasma acceleration in slightly inhomogeneous high- frequency fields	Miller, M. A.	167
Discussion		177
Plasma electrodynamic acceleration experiments	Kvartskhava, I. F., Meladze, R. D. and Suladze, K. V.	178
Discussion		183
On the theory of the stochastic method of particle acceleration and beam stacking	Kolomenskij, A. A. and Lebedev, A. N.	184
Discussion		187
Experiments on stochastic acceleration	Keller, R.	187
Discussion		191

Multiple frequency acceleration	Robinson, K. W.	192
Discussion		195
Air-core strong focusing synchrotron	Christofilos, N. C.	195
Discussion		202
Scanning field alternate gradient accelerators	Kitagaki, T. and Riedel, J.	203
A 450 keV eight-sector fixed frequency electron cyclotron.	Martin, J. A.	205
Discussion		211
Cyclotron with space variation of the magnetic field	Danilov, V. I., Denisov, Yu. N., Dmitrievskij, V. P., Dzhele- pov, V. P., Glazov, A. A., Kol'ga, V. V., Kropin, A. A., Lu Ne-chuan, Rybalko, V. S., Sarkisyan, L. A., Savenkov, A. L., Zamolodchikov, B. I., Zaplantin, N. L. and Vasilevs- kaya, D. P.	211
Discussion		225
1.5 metre cyclotron with azimuthally varying magnetic field	Zavenyagin, J. A., Metsch- cherov, R. A., Mironov, E. S., Nemenov, L. M. and Khol- movskij, J. A.	225
Discussion		231
New type of high frequency accelerating system for heavy particles in linear accelerators	Trubetskoj, V. F.	232
Informal discussion on luminescent chambers, and their associated data-processing		235
 <b>SESSION 3 — Fundamental limitations in accelerators</b>		
Longitudinal instabilities in intense relativistic beams	Nielsen, C. E., Sessler, A. M. and Symon, K. R.	239
Analytical and computational studies on the interaction of a sum and a difference resonance	Meier, H. and Symon, K. R.	253
Discussion		262
Non-linear theory of betatron oscillations	Orlov, Yu. F. and Tarasov, E.K.	263
Limitations of proton beam current in a strong focusing linear accelerator associated with the beam space charge	Kapchinskij, I. M. and Vladi- mirskij, V. V.	274
Discussion		288
Particle loss in crossing a resonance in a non-linear system	Barbier, M. and Robouch, B. V.	289
Radiation effects in electron synchrotrons	Robinson, K. W.	293
Discussion		297

Observation of quantum effects in an electron synchrotron	Sands, M.	298
Discussion		302
Losses of particles in ring accelerators taking damping into account	Orlov, Yu. F. and Khejfets, S.A.	303
Damping oscillations in strong-focusing electron accelerators	Orlov, Yu. F., Tarasov, E. K. and Khejfets, S. A.	306
Neutralized electron beams and Budker accelerators	Finkelstein, D.	312
Discussion		315
On the stability and focusing of plasma bunches accelerated by radiation	Levin, M. L., Rabinovich, M.S. and Askaryan, G. A.	315
Discussion		326
The capture of electrons injected into the betatron	Seidl, M.	327
 <b>SESSION 3 A — Status reports on high-energy accelerators</b>		
The Cambridge electron accelerator	Harvard University	335
Discussion		338
Electron synchrotron	Deutsches Elektronen synchrotron	339
7 GeV proton synchrotron (NIMROD)	National Institute for Research in Nuclear Science	343
Brookhaven alternating gradient synchrotron	Brookhaven National Laboratory	347
Discussion		348
Stanford 2-mile linear electron accelerator	Stanford University	349
Discussion		358
The Argonne zero gradient synchrotron (ZGS)	Argonne National Laboratory	359
Discussion		361
The Princeton-Pennsylvania accelerator	Princeton University	362
The Southern Regional accelerator	Oak Ridge National Laboratory	366
Discussion		370
7 GeV Synchro-phasotron	Institute of Theoretical and Experimental Physics	371
50 GeV Synchro-phasotron	Research Institute for Electro- physical Equipment	373
Discussion		374
Electron linear accelerators at the Research Institute of Physics of the Academy of Sciences of the Ukrainian Soviet Socialist Republic	Sinelnikov, K. D., Grishaev, I. A., Grizhko, C. M., Eremenko, E.V., Kondratenko, V. V. and Kitaevskij, L. Kh.	375
Discussion		382
CERN 25 GeV Proton Synchrotron	European Organization for Nuclear Research	383

**SESSION 4 — Production, transport and separation of particles from high-energy machines**

The production, transport and separation of beams	Ticho, H. K.	387
Cosmotron beams	Smith, L. W.	397
Notes on external particle beams from the Argonne 12.5 BeV synchrotron	Crewe, A. V.	400
Discussion		402
Transport and separation of beams from AG synchrotron	Courant E. D. and Cool R.	403
Discussion		412
A beam of $\pi^-$ mesons with a momentum of 7 GeV/c from the synchro-phasotron	Wang Tso-tsiang, Ding Datsai, Ivanov, V. G., Kladnitskaya, E. N., Nguen Dinh Tu, Sajtov, I. S., Solov'ev, M. I. and Shafranov, M. D.	412
Discussion		413
External beam problems in the 6-BeV electron synchrotron	Livingston, M. S.	414
A radio-frequency mass separator for complete separation of high- energy particle beams	Blewett, J. P.	422
Discussion		426
Beams from high energy linear accelerators	Panofsky, W. K. H.	427
Experience with a microwave separator	Panofsky, W. K. H.	428
Discussion		431

**SESSION 5 A — Large hydrogen bubble chambers**

Berkeley 72" hydrogen bubble chamber	Gow, J. D. and Rosenfeld, A.H.	435
Discussion		439
Discussion on Brookhaven 20-inch and 80-inch hydrogen chambers	Rahm, D. C.	440
Discussion		441
High field bubble chamber	Bergmann, W. H.	442
Discussion		443
Some features of the British national hydrogen bubble chamber	Riddiford, L., Van de Raay, H. B., Barford, N. C., Butler, C. C., McMullan, D., Thetford, A., Thomas, D. B., Welford, W. T., Amery, A., Evans, W. H., Moore, M. J., Polak, P., Skinner, H. W. B., Williams, P. R., Shaw, D., Ashburn, A. G. and Snowden, M.	445
Discussion		453

Some features of CERN hydrogen bubble chambers	Peyrou, Ch.	454
Discussion		459
9 in. hydrogen bubble chamber in a pulsed magnetic field	Doran, G. A., Hill, J. G., Kinson, J. B. and Riddiford, L.	460
Discussion		460
A liquid helium bubble chamber	Block, M.M., Fairbank, W.M., Harth, E. M., Kikuchi, T., Meltzer, C. and Leitner, J.	461
Discussion		465
Minimizing front glass reflections in retrodirective illumination of bubble chambers	Courant, H.	465
Discussion		466
 <b>SESSION 5 A (parallel) — Radio electronics for accelerators</b>		
On a method of measuring frequency micromodulation of the proton synchrotron accelerating field	Sossenskij, N. L.	469
Methods and devices for investigations on accelerated beam particles in the chamber of the 10 GeV proton synchrotron	Vodop'yanov, F. A., Kuzmin, A. A., Rubchinskij, S. M., and Uvarov, V. A.	470
Design principles of the electronics system for the 50-60 GeV strong focusing proton synchrotron	Mints, A. L., Vasil'ev, A. A., Vodop'yanov, F. A., Kuzmin, A. A., Kuzmin, V. F. and Rubchinskij, S. M.	477
Discussion		484
Remarks on the phase lock system of the CERN proton synchrotron	Schnell, W.	485
Discussion		489
 <b>SESSION 5 B — Propane and other heavy liquid chambers</b>		
Interpretation of results from propane and other heavy-liquid chambers	Powell, W. M.	493
Discussion		499
Propane and heavy liquids bubble chambers at the Ecole polytech- nique, Paris	Bloch, M., Lagarrigue, A., Musset, P., Rançon, P., Rousset, A., Sauteron, X. and Six, J.	499
Discussion		502
Window safety problems in bubble chambers	Street, J. C.	503
Discussion		504

A scintillation propane bubble chamber	Strauch, K.	505
Stabilization and control of bubble chamber sensitivity	Hahn, B. and Knudsen, A. W.	506
A 30 liter xenon bubble chamber	Kanarek, T. I., Maltsev, E. I., Nagy, T., Nagy, J., Prokeš, A., Stashkov, G. M., Ustenko, E. P., Chuvilo, I. V., and Skhobin, U. N.	508 510
Discussion		
The use of xenon-freon and xenon-propane mixtures for bubble chambers	Shalamov, Ya. Ya., and Shebanov, V. A.	510 512
Discussion		
A 570 liter freon bubble chamber	Alichanyan, A. I., Veremeev, M.M., Galper, A.M., Kirillov- Ugrumov, W. G., Kotenko, L. P., Kusin, L. A., Kuznetsov, E. P. and Popov, U. S.	512 513
Discussion		
A bubble chamber in a pulsed magnetic field	Mukhin, K. N., Shlyapnikov, R. S. and Barkov, L. M.	514 518
Discussion		
Informal discussions on beam-stacking machines		520
 <b>SESSION 6 — Picture evaluation for track chambers</b>		
Instruments for picture evaluation : a survey	Goldschmidt-Clermont, Y.	523
Discussion		532
Digital computer analysis of data from hydrogen bubble chambers at Berkeley	Rosenfeld, A. H.	533
Discussion		539
Installation for automatic measuring of photographs from bubble chambers	Andreev, E. M., Giršl, P., Zarubin, I.A., Kadykov, G. M., Korenchenko, S. M., Lachinov, V. M., Morozov, A. G., Nekrasov, K. G., Pose, R., Popov, M. I., Smirnov, V. V. and Tolstoj, N. S.	541
Semi-automatic comparator for evaluation of stereophotographs of track chambers	Filippov, A. I., Kulyukin, M. M., Shcherbakov, Yu. A., Sulyaev, R. M. and Vasilenko, A. T.	544

An instrument for automatic bubble chamber photograph evaluation	Kaftanov, V. S., Lichtenbaum, J. L., Moiseev, B. N., Nikitin, S. Ya. and Fedotov, O. P.	550
Discussion		551
Brookhaven bubble chamber data handling equipment	Rau, R. R.	552
Discussion		554
Machine analysis of bubble chamber pictures	Hough, P. V. C.	554
A rotary digitizer for use with a film measuring machine	Derrick, M., Fields, T. and Findley, R.	557
Discussion		557
Informal discussion on proton linear accelerators		558
 <b>SESSION 7 — Counters and other high-energy particle detectors</b>		
The luminescent chamber and other new detectors	Jones, L. W. and Perl, M. L.	561
Construction of a luminescent chamber at the Physical Institute of Bonn	Giise, R., Gildemeister, O. and Paul, W.	571
Discussion		572
Scintillation chamber work at M.I.T.	Bridge, H. S., Burrowes, H. C., Caldwell, D. O., Hill, D. A. and Schluter, R. A.	572
Discussion		575
Filament scintillation chambers	Reynolds, G. T.	576
Discussion		578
A counter controlled cloud chamber triggering on rare events in the synchro-phasotron beam	Viryasov, N. M., Vorob'ev, G. G., Kim Khi In, Strunov, L. N. and Chuvilo, I. V.	580
The coupling of counter experiments to computers	Wiegand, C.	581
Discussion		588
Hodoscopic systems of gas-discharge counters used in experiments with accelerators	Vasilevskij, I. M., Vishnyakov, V. V., Iliescu, E., Tyapkin, A. A.	589
Discussion		591
Star-detector for $\pi^-$ mesons	Dunajtsev, A. F., Prokoshkin, Yu. D., and Tang Syao-Wei.	592
Discussion		592
Gas Cherenkov counters	Deutsch, M.	593
Discussion		599

How much do wavelength shifters used for Cherenkov counters scintillate?	Finocchiaro, G., Finzi, R. and Mezzetti, L.	599
Discussion		600
Applications of transistors in counter experiments	Fitch, V. L.	601
Discussion		603
A nanosecond coincidence circuit using transistors	Barna, A., Marshall, J. H. and Sands, M.	604
Discussion		614
Transistor gates	Littauer, R. M.	615
Discussion		618
 <b>APPENDIX</b>		
Injection of particles into a strong focusing accelerator	Amatuni, A. Ts., Tevikyan, R. V., Badalyan, H. V., Orlov, Yu. F., Kharitonov, M. V., and Khejfets, S. A.	621
Application of the method of successive approximations to a calculation of cavity resonators for linear acceleration of protons	Andreev, V. G.	626
Ferrite modulation system designed for operating a fixed-frequency cyclotron in an FM mode	Antonov, A. V., Korshunov, U. V., Meleshko, E. A., Nemenov, L. M. and Panasyuk, V. S.	631
Passage over transition energy by means of stochastic acceleration	Barbier, M.	636
Production of very strong pulsed magnetic fields and their possible application	Barkov, L. M., Mukhin, K. N. and Shlyapnikov, R. S.	640
A linear accelerator of multi-charged ions	Bolotin, L. I., Revutskij, E. I., Chernyak, L. L., Bomko, V. A., Kulygin, Y. F., Ovsyannikov, V. M. and Suprunenko, V. A.	643
Strong focusing in linear accelerators	Bolotin, L. I., Revutskij, E. I. and Suprunenko, V. A.	644
Gas-scattering in strong-focusing accelerators	Gol'din, L. L. and Ioffe, R. A.	653
Beam injection into a 50 GeV strong-focusing proton synchrotron	Koshkarev, D. G.	656
Reflection of electromagnetic waves from moving surfaces	Kurilko, V. I.	660
The motion of charged particles in slightly inhomogeneous high-frequency fields	Miller, M. A.	662
Experiment on excitation of power oscillations on meter waves in a toroidal cavity resonator placed in vacuum	Polyakov, B. J., Zarubin, B. T. and Kushin, V. V.	670

Coherent forces in a bunch of relativistic electrons	Rabinovich, M. S. and Iogansen, L. V.	673
Some aspects of the theory of cyclic waveguide electron accelerators	Vorob'ev, A. A., Didenko, A. N., Kovalenko, E. S. and Morozov, B. N.	680
Experimental research of plasma waveguide properties and electro- magnetic wave reflection from plasma moving in a slow wave- guide	Zagorodnov, O. G., Fajnberg, Ya. B., Egorov, A. M. and Kivshich, A. F.	685
<b>List of Abbreviations</b>		695
<b>List of Participants</b>		697
