INTRODUCTION TO ACCELERATOR THEORY

Lecturer
Ernest D. Courant

Text: L. Michelotti, D. Neuffer, R. D. Ruth, and W. Weng

Appendix: Lee C. Teng

TABLE OF CONTENTS

Introduction..... 2
1. Betatron Oscillations..... 4
   A. The equations of motion..... 4
   B. Strong focusing..... 8
   C. The beta function.....11
2. Perturbed Betatron Oscillations.....15
   A. Guiding field errors.....16
   B. Momentum deviation.....18
   C. Gradient errors.....20
   D. Coupling.....21
   E. Nonlinear effects.....27
3. Acceleration.....34
4. Synchrotron Radiation and Electron Beam Dynamics.....45
   A. Synchrotron radiation - physical properties.....45
   B. Effects of radiation on energy.....49
   C. Radiation effects on transverse amplitudes.....53
References.....61
Appendix. Beam Extraction from a Circular Accelerator.....62
