

AN INTRODUCTION TO CIRCULAR ACCELERATORS

D.A. Edwards

Fermi National Accelerator Laboratory, Batavia, IL 60510

TABLE OF CONTENTS

1	Introduction	3
2	Linear Betatron Oscillations	4
2.1	Equation of Motion	4
2.1.1	The "Vertical" Plane	6
2.1.2	Other Coordinate Systems	7
2.1.3	The Hamiltonian	7
2.2	Piecewise Method of Solution	7
2.2.1	A Quadrupole Matrix	9
2.2.2	The FODO Cell	9
2.2.3	Phase Space Plots	9
2.3	A Stability Criterion	9
2.3.1	Eigenvalues and Eigenvectors	11
2.3.2	Unimodularity of M	11
2.3.3	Mirror Imaging a Lattice	12
2.4	Closed Form Solution	12
2.4.1	Some Solutions for the Amplitude Function	16
2.4.2	Parameters of the FODO Cell	16
2.4.3	Oscillation Induced by an Angular Deflection	16
2.4.4	Propagation of Courant-Snyder Parameters	17
2.4.5	Phase Advance of the FODO Cell	17
2.4.6	Iteration of Repeat Periods	17
2.5	"Natural" Coordinates and the Floquet Transformation	18
2.5.1	Equation of Motion	19
2.5.2	Transformation of the Hamiltonian	19
2.6	Emittance and Admittance	19
2.6.1	Beam Dimensions for a Typical Ring	22
2.6.2	Admittance of a Typical Ring	22
2.6.3	Invariant Emittance	22
2.6.4	Emittance of a Gaussian Beam	22
2.7	Imperfections of the Linear Lattice	23
2.7.1	RMS Orbit Distortion for Many Kicks	26
2.7.2	Distribution of Orbit Distortions	26
2.7.3	Orbit Correction by Localized Distortions	26
2.7.4	A Quadrupole Installation Error	27
2.7.5	RMS Tune Shift From Gradient Errors	27
2.7.6	Amplitude Function Distortion Due to Gradient Error	27
2.7.7	RMS Amplitude Function Distortion	27
3	Synchrotron Oscillations	27
3.1	Equations for an Off-Momentum Orbit	28
3.2	Solution of the Equation for the Dispersion Function ...	29
3.2.1	Dispersion of FODO Cell	31
3.2.2	An Unmatched Dispersion Function	31

3.2.3	Inclusion of Dispersion in the Transfer Matrix ..	32
3.2.4	An Example of Dispersion Matching	32
3.2.5	An Expression for the Compaction Factor	32
3.3	Chromaticity	32
3.3.1	Chromaticity and Tune	34
3.3.2	Systematic Sextupole Moments in Bends	34
3.3.3	Chromaticity Adjustment	35
3.4	Acceleration and Phase Stability	35
3.4.1	Estimate of Transition Gamma	37
3.5	Description of Synchrotron Oscillations	37
3.5.1	Limits of Phase Stability	40
3.5.2	Direct Integration of Difference Equations	40
3.5.3	Oscillation Frequency of a Large Synchrotron	40
3.5.4	Area of a Stationary Bucket	41
3.5.5	Longitudinal Emittance	41
3.5.6	Frequency of Large Amplitude Oscillations	41
3.5.7	The Standard Mapping and Chaos	41
4	Nonlinear Betatron Oscillations	42
4.1	Nonlinearities and Resonances	43
4.1.1	The Tune Diagram with Resonances	44
4.2	A Third-Order Reasonance	45
4.2.1	Motion Along a Separatrix	49
4.2.2	Ring with a Single Sextupole	49
4.2.3	Comparison with Turn-By-Turn Calculation	50
4.2.4	Phase Space Deformation	50
4.2.5	Variation of Tune with Amplitude	50
4.2.6	The Width of a Linear Stopband	51
5	Two Applications	51
5.1	Insertions and Matching	51
5.2	Resonant Extraction	53
5.3	Luminosity	58
6	Suggestions for Further Reading	61
