

CONTENTS

MAINSTREAM LECTURE SERIES

Theory of Charged-Particle Stopping <i>J. Lindhard</i> (manuscript not available)	
Dynamical Interaction of Charges with Condensed Matter <i>F. Flores</i> (1: Classical interaction of charges with condensed matter. 2: Quantal interaction of electrons with condensed matter. Charge transfer between ions and condensed matter, charge states. 3: Stopping power for light ions in metals)	3
Density Functional Theory of Stopping Power <i>P.M. Echenique and M.E. Uranga</i> (1: Density functional formalism. 2: Stopping of a slow ion in an electron gas. 3: Friedel sum rule. 4: Proton: potential and density fluctuation results. 5: H and He stopping. 6: Antiproton stopping. 7: Model potentials. 8: Ions with $Z > 2$. 9: Mean free path, stopping power, straggling. 10: Interacting electron gas)	39
Statistics of Charged-Particle Penetration <i>P. Sigmund</i> (1: The Poisson limit. 2: Varying projectile energy; charged-state statistics; correlated distributions. 3: Spatially correlated distributions. 4: Applications)	73
Accelerators and Stopping Power Experiments <i>H.H. Andersen</i> (2: Accelerators. 3: Beam diagnostics. 4: Stopping power and straggling measurements)	145
Experimental Aspects of Channeling <i>J. Remillieux</i> (manuscript not available)	
Charged Particle-Surface Interactions and Spectroscopies <i>A.A. Lucas</i> (Extended abstract)	193
Electron Spectra in Solids <i>R.H. Ritchie, R.N. Hamm, J.C. Ashley and P.M. Echenique</i> (2: The interaction of a swift electron with condensed matter. 3: The impact parameter representation of charged particle energy losses in condensed matter)	197

Low Energy Ion Penetration and Collision Cascades in Solids <i>H.M. Urbassek</i> (2: Interaction forces. 3: Transport equations. 4: Computer simulation. 5: Applications to ion ranges and sputtering)	227
Interaction of Low-Energy Ions, Atoms and Molecules with Surfaces <i>W. Heiland</i> (2: Low energy ion surface scattering. 3: Instrumentation and applications of ion scattering. 4: Inelastic ion-surface collisions. 5: The interaction of molecular ions with surfaces. Acronyms of surface analysis techniques)	253
Applications of Ion Beams to Materials Science <i>L.C. Feldman</i> (Extended abstract)	309
Desorption Induced by Electronic Transitions: Basic Principles and Mechanisms <i>R.A. Baragiola and T.E. Madey</i> (2: General principles. 3: The nature of the repulsive state. 4: The excitation of the repulsive state. 5: The evolution of the repulsive state. 6: DIET with bombarding ions. 7: Problems and opportunities)	313
INVITED LECTURES	
Impact Parameter Dependent Energy Loss for Heavy Ions: an Overview <i>W.N. Lennard and H. Geissel</i> (2: Historical. 3: Impact parameter dependence)	347
Questions Concerning the Stopping Power of Heavy Ions in Solids <i>H.D. Betz, R. Schramm and W. Oswald</i> (1: Effective charge concept. 2: Electronic state of heavy ions inside solids. 3: Forward electron spectroscopy)	365
Scattering of Fast Ions and Energy Loss on Surfaces <i>K. Kimura and M. Mannami</i> (2: Experimental procedure. 3: Specular reflection. 4: Stopping power of the surface. 5: Charge state distribution of specularly reflected ions. 6: Specular reflection from PbSe/SnTe(001))	371
Neutralization of Fast Protons in Grazing Collisions with an Al(111) Surface <i>H. Winter</i>	387
On the Stopping Power of an Electron Gas for Slow Proton and Antiproton <i>I. Nagy, B. Apagyi and K. Ladányi</i>	395
Electron Capture in Atomic Collisions <i>V.H. Ponce</i> (2: Theory. 3: Results)	401
Channeling and Channeling Radiation Theory <i>A.H. Sørensen</i> (Extended abstract)	421

Wakes, Dynamic Screening Y. Yamazaki (2: Detection of density fluctuation. 3: A search for wake-riding electrons)	423
Current Topics in Kinetic Electron Emission from Solids R.A. Baragiola (2: Theoretical concepts of KEE. 3: Yield estimates and surface effects. 4: Origin of convoy electrons from solids. 5: Emission at glancing incidence. 6: Heavy ion induced Auger emission. 7: KEE thresholds. 8: Emission of fast electrons in slow collisions)	443
Convoy Electrons J. Burgdörfer (2: Production of convoy electrons. 3: Transport of convoy electrons. 4: Case studies)	459
Surface Electron Spectroscopy; Importance of Particle Transport S. Tougaard (Extended abstract)	487
Stopping Power of Hot Plasmas and Cold Solids: Dielectric and Transport Cross Section Formulations N.R. Arista (2: Dielectric function formalism. 3: Transport cross section formulation)	489
Ion-Induced Emission From Magnetic Materials Near Phase Transition Temperature V.E. Yurasova (1: Sputtering. 2: Sublimation and oxidation. 3: Morphological transition in the vicinity of the Curie point. 4: Secondary ion and ion-photon emission)	505

CONTRIBUTED PAPERS: ION STOPPING

Accurate Quantum Mechanical Calculation of Stopping Powers for Intermediate Energy Light Ions Penetrating Atomic H and He Targets G. Schiwietz	517
Charge Exchange and Energy Loss of Particles Interacting with Surfaces A. Nörmann, W. Heiland, R. Monreal, F. Flores and P.M. Echenique	529
Effective Charge of Helium Ions in Solids M. Peñalba, A. Arnau and P.M. Echenique	541
Wake Potential in the Vicinities of a Surface F.J. García de Abajo and P.M. Echenique	547
Stopping Power of Large Molecular Clusters in Cold and Heated Solids N.R. Arista and A. Gras-Martí	557
A Stopping Power Formula for Helium Ions G. Lapicki	563
Survey of Heavy-Ions Research at CIRIL/GANIL A. Cassimi, E. Balanzat, S. Bouffard, E. Doorhyee, J. Dural, J.P. Grandin, J.C. Jousset, E. Paumier and M. Toulemonde	569

Influence of Thickness Fluctuations on the Energy-Loss Spectra of Protons Transmitted through Thin Films <i>N.E. Capuj and M.M. Jakas</i>	577
---	-----

CONTRIBUTED PAPERS: STOPPING OF ELECTRONS

Inelastic Interactions of Electrons with Solids: LPA and Penn's Statistical Model <i>R. Mayol, J.M. Fernandez-Varea, F. Salvat and D. Liljequist</i>	585
Energy Distribution of Electrons Excited by Slow Particles in Solids <i>Z. Sroubek and G. Falcone</i>	593
Ion-Induced Auger Electron Emission from Single Crystals: Experiment and Simulation <i>P.F.A. Alkemade, W.N. Lennard and I.V. Mitchell</i>	599
Electron Spectra from Ion Bombardment of Cleaned Surfaces Covered with Frozen Gases at Low Sample Temperatures <i>H. Rothard, M. Schosnig, K. Kroneberger and K-O. Groeneveld</i>	615
Emission of Spin-Polarized Electrons to Study Surface Magnetism and Particle-Surface Interaction <i>C. Rau and K. Waters</i>	625
Positron Thermalisation in Aluminum <i>K.O. Jensen and A.B. Walker</i>	631

CONTRIBUTED PAPERS: LOW ENERGIES

Interaction of a Charged Particle with a Semi Infinite Non Polar Dielectric Liquid <i>M.L. Forcada, A. Gras-Martí, N.R. Arista, H.M. Urbassek and R. Garcia-Molina</i>	639
On the Experimental Verification of Various Mechanisms of Secondary Atomic and Molecular Ion Production Upon Ion Bombardment of Pure Metals <i>I.F. Livshits, V.A. Pazdzersky and B.A. Tsipinyuk</i>	647
Cascade Evolution and Sputtering in Condensed Rare Gases <i>K.T. Waldeer and H.M. Urbassek</i>	657

CONTRIBUTED PAPERS: APPLICATIONS

Monte Carlo Simulations of Deposition Processes <i>J.C. Moreno-Marin</i>	667
Growth of Thin Films by Ion Beam Sputtering: Study of Rare Gas Incorporation <i>C. Desgranges, C. Pellet, C. Schwebel, A. Chabrier and G. Gautherin</i>	675

Experimental Evidence of the Bond Breaking Mechanism in Oxygen Secondary Ion Emission Enhancement <i>J. Ferrón</i>	681
Ion Beam Induced Ni-Ag Mixing <i>A. Miotello, D.C. Kothari and L. Guzman</i>	687
SIMS Surface Analysis of PET: Degradation Development <i>D. Léonard, Y. De Puydt and P. Bertrand</i>	693

CLOSING REMARKS

Closing Remarks: Perspectives in Particle-Solid Interactions <i>R.A. Baragiola</i>	701
