Opening remarks by Dr. W. Marshall	ix

SESSION 1—NEW MACHINES

<i>*Innovations in isochronous cyclotrons</i>	J. A. Martin	3
<i>*The Cyclo-Graaff, concept and practice</i>	F. O. Purser, H. W. Newson, N. R. Roberson, E. G. Bilpuch, and R. L. Walter	13
<i>*The Indiana University 200 MeV Cyclotron Project</i>	M. E. Rickey, M. B. Sampson, and B. M. Bardin	24
<i>Proposed Midwest Tandem cyclotron (MTC)</i>	T. K. Khoe, J. J. Livingood, and W. J. Ramler	30
<i>A heavy-ion accelerator facility featuring a separated-sector isochronous cyclotron</i>	J. A. Martin, E. D. Hudson, S. W. Mosko, L. N. Howell, and M. L. Mallory	41
<i>Proposed Michigan State University trans-uranic accelerator facility</i>	H. G. Blosser, M. M. Gordon, and D. A. Johnson	50
<i>*Status report on SIN</i>	H. A. Willax	58
<i>*The TRIUMF Project</i>	J. B. Warren	73
<i>Beam quality and expected energy resolution from the TRIUMF cyclotron</i>	J. R. Richardson and M. K. Craddock	85
<i>A fractional turn injector cyclotron</i>	Rodman Smythe	95
<i>Short Papers Not Presented Orally</i>		
<i>Beam transport system optics studies for the University of Maryland cyclotron</i>	R. E. Berg	101
<i>*Invited papers</i>		

<i>A 'Square Wave' RF system design for the TRIUMF cyclotron</i>	
K. L. Erdman, A. Prochazka, O. K. Fredriksson, R. Thomas, W. A. Grundman	105
<i>Design of the 4000-ton magnet for the TRIUMF cyclotron</i>	
E. G. Auld, S. Oraas, A. J. Otter, G. H. Mackenzie, J. Reginald Richardson, and J. J. Burgerjon	111
<i>Design features of the Princeton A.V.F. cyclotron facility</i>	
	R. E. Pollock 120
<i>The UCL isochronous cyclotron conceptual design and status report</i>	
P. Macq, P. Delphin, A. Dupuis, and P. Peironet	124
<i>RF system for a proposed heavy ion cyclotron</i>	
	S. W. Mosko 126
<i>The external beam handling system for the A.V.F. cyclotron of the University of Groningen</i>	
	L. W. Put 130
<i>Grenoble cyclotron progress report</i>	
J. Fermé, F. Ripouteau, J. L. Belmont, G. Laborie, and G. Goin	134
 SESSION 2—COMPUTER CONTROL	
<i>*The cyclotron and the computer: a look at the present and the future</i>	
	R. A. deForest 141
<i>The control system of the Dubna monoenergy cyclotron</i>	
Yu. N. Denisov, A. N. Lyubenko, and P. T. Shishlyanikov	151
 SESSION 3—BEAM EXTRACTION	
<i>*Extraction from medium and high energy cyclotrons</i>	
	W. Joho 159
<i>A magnetically self-shaping septum for beam deflection</i>	
E. D. Hudson and F. E. McDaniel	180
<i>Results of beam extraction at the Jülich 90 MeV deuteron AEG isochronous cyclotron</i>	
H. Thimmel and P. Wucherer	190
<i>Extraction performance of the Harwell variable energy cyclotron</i>	
E. J. Jones and K. J. Howard	200
<i>A magnetic regenerator</i>	
	S. W. Oh and W. B. Powell 208
<i>First and second harmonic extraction</i>	
	J. M. van Nieuwland 215

Short Papers Not Presented Orally

- Design studies for an ultra-thin septum extraction channel for the modified NEVIS synchrocyclotron*
K. Ziegler, E. Martin, and R. Cohen 226
- Resonance free or precessional extraction—a comparison*
H. Liesem 229
- A study of the regenerative extraction system in the CERN synchrocyclotron*
S. Lindbäck 235
- Extraction of multiple beams of various energies from the TRIUMF negative ion isochronous cyclotron*
L. P. Robertson, E. G. Auld, G. H. Mackenzie, and A. J. Otter 245
- Cyclotron beam sharing for multiple target irradiations*
G. Burton 250

SESSION 4—BEAM QUALITY

- *Optimisation of the cyclotron central region for the nuclear physics user*
H. G. Blosser 257
- *Some factors determining the beam quality of A.V.F. cyclotrons*
H. L. Hagedoorn, N. Hazewindus, and J. M. van Nieuwland 274
- *The effects of central region conditions on time structure and quality of cyclotron beams*
M. Reiser 289
- The longitudinal space charge effect and energy resolution*
M. M. Gordon 305
- Harmonic operation of the Harwell variable energy cyclotron*
E. J. Jones and K. J. Howard 318
- Cyclotron beam pulser for particle time-of-flight experiments*
W. P. Johnson, H. G. Blosser, and P. Sigg 325
- Phase-space volume measurements on the Nuffield 60 in cyclotron*
K. V. Ettinger, J. F. B. Dealler, and F. R. Stewart 333
- The external beam mono-chromatisation system in the 2.4 m isochronous cyclotron at the Kurchatov Atomic Energy Institute*
Yu. G. Basargin, V. I. Bogdanova, Yu. P. Severgin, N. I. Venikov,
K. N. Korol, and N. N. Poselsky 341
- Emittance measurements at the Jülich isochronous cyclotron (JULIC)*
W. Kuhlmann, J. Bojowald, C. Mayer-Böricke, and J. Reich 348

Proposed use of a storage ring to improve the microscopic duty factor of a cyclotron

Byron T. Wright 357

On the production of monochromatic beams using cyclotron acceleration

Yu. G. Basargin, R. N. Litunovsky, and O. A. Minyaev 363

Peculiarities of charged particle motion in the monoenergetic cyclotron

V. P. Dmitrievsky, V. V. Kolga, and N. I. Polumordvinova 370

Spectrometric isochronous cyclotron

I. Ya. Barit, G. A. Vasilyev, V. N. Kannunikov, L. N. Katsaurov,
A. A. Kolomensky, S. N. Moroz, L. N. Netchaeva, A. P. Fateev,
Yu. K. Khokhlov, I. V. Shtranikh, Yu. G. Basargin, O. A. Gusev,
R. N. Litunovsky, I. F. Malishev, O. A. Minyaev, and M. P. Svinyin 375

High resolution nuclear studies using cyclotron beams

E. Kashy, G. F. Trentelman, and R. K. Jolly 380

Operational experience with the H^- beam of the Milan cyclotron

E. Acerbi, C. Birattari, M. Castiglioni, G. Dutto,
G. Fait, G. Strini, and C. Succi 388

Short Papers Not Presented Orally

Multi-channel non-intercepting phase probe for the University of Maryland cyclotron

J. K. Bird and R. E. Berg 399

A non-intercepting cyclotron beam monitor

K. V. Ettinger and F. R. Stewart 403

The Rf system of the monoenergetic cyclotron

A. A. Glazov, V. A. Kochkin, D. L. Novikov, and L. M. Onischenko 410

The magnetic system of the monoenergetic cyclotron

S. B. Vorozhtsov, B. I. Zamolodchikov, and N. L. Zaplatin 414

SESSION 5—THE PRODUCTION AND ACCELERATION OF HEAVY IONS

**A survey of methods of accelerating heavy ions*

R. S. Livingston 423

Acceleration of very heavy ions by means of a two-cyclotron facility

O. Böttger and R. W. Müller 446

Heavy ion acceleration at ORIC

R. S. Lord, B. L. Duelli, E. D. Hudson, M. L. Mallory, E. Newman,
M. J. Saltmarsh, W. R. Smith, S. S. Stevens and A. Zucker 453

- On the generation and injection of heavy-ions into cyclotrons*
K. D. Jenkins 459
- *Ion sources for multiply charged heavy ions*
J. R. J. Bennett 469
- The C.E.V. injector ion source*
L. Ah-Hot, J. Arianer, J. Baixas, P. Debray, M. Malard and A. Serafini 480
- Heavy ion acceleration in the IPCR 160 cm cyclotron*
I. Kohno, Y. Miyazawa, T. Tonuma, S. Nakajima, T. Inoue, A. Shimamura,
Y. Yoshida, T. Inamura and T. Karasawa 487
- The production and acceleration of heavy ions in the Harwell variable energy
cyclotron*
J. R. J. Bennett 499
- Sources of highly-stripped ions for ion accelerators*
N. J. Peacock and R. S. Pease 508
- The HIPAC ion source: recent theory and experiments*
J. D. Daugherty, J. E. Eninger, G. S. Janes, and R. H. Levy 515
- Short Papers Not Presented Orally*
- Series combination of a tandem and a cyclotron and vice versa*
O. Böttger and R. Mahrt 530
- Conceptual design of a two-stage, two-gap cyclotron*
Byron T. Wright, G. J. Igo, Reginald Richardson, and J. W. Verba 537
- SESSION 6—COMPACT CYCLOTRONS**
- Design specifications for compact cyclotrons*
M. A. Chaudhri and O. Böttger 545
- The 20 MeV compact cyclotron*
F. Dupont and B. Gremont 556
- Basic design parameters of a small size isochronous cyclotron*
A. G. Alekseev, P. V. Bogdanov, A. N. Galaev, I. F. Malishev,
V. A. Panov, A. V. Stepanov, and I. V. Tuzov 559
- The AEG compact cyclotron*
E. Hartwig 564
- Design and performance of a compact multi-particle cyclotron*
A. A. Fleischer, G. O. Hendry, C. G. Smith, J. L. Tom and D. K. Wells 573

SESSION 7—ION INJECTION

**Survey of external injection systems for cyclotrons*

D. J. Clark 583

The axial injector for the Harwell variable energy cyclotron

J. R. J. Bennett 602

Operation of the polarised ion source and axial injection system for the 88-in cyclotron

D. J. Clark, A. U. Luccio, F. Resmini, and H. Meiner 610

The external injection system for the Groningen cyclotron

O. C. Dermois 620

Some studies on the axial injection system for a compact cyclotron

N. Hazewindus 625

Status Report on the Alice Project

L. Ah-Hot, E. Baron, M. P. Bourgarel, C. Bieth, A. Cabrespine, and C. Goldstein 638

Injection and stripping of a heavy ion beam in the Orsay cyclotron

L. Ah-Hot, E. Baron, and M. P. Bourgarel 646

Design and performance of an H^- injector cyclotron

A. A. Fleischer, G. O. Hendry, and D. K. Wells 658

Short Papers Not Presented Orally *H^- ion injection into the central region of the TRIUMF cyclotron*

M. K. Craddock, R. J. Louis, and M. Reiser 666

Radial injection of a polarised beam into a cyclotron

V. Bejšovec, P. Bém, O. Karban, J. Mares, and Z. Trejbal 670

SESSION 8—SYNCHROCYCLOTRON CONVERSIONS AND IMPROVEMENTS

**The Harwell 110 in synchrocyclotron modification scheme*

Synchrocyclotron group, Harwell. Presented by J. P. Scanlon 673

**The Berkeley synchrocyclotron improvement programme*

L. Kanstein, R. Sorensen, L. Glasgow, J. Vale, and K. MacKenzie 688

**Nevis synchrocyclotron conversion project*

R. Cohen, E. Martin, J. Rainwater, R. Schneider, Z. Ziegler, and S. Ohnuma 699

**Invited papers*

**Some peculiarities of phase motion in the phasotron with spatial variation of magnetic field*

V. P. Dmitrievsky, B. I. Zamolodchikov, N. I. Polumordvinova,
and V. V. Kolga 711

**Status Report on the CERN synchrocyclotron improvement programme*

M.S.C. Division, CERN. Presented by N. Vogt-Nilsen 719

The proton source for the improved CERN synchrocyclotron

R. Galiana 728

Factors affecting beam intensity and quality in synchrocyclotrons

S. Holm 736

Conversion studies for the SREL 600-MeV synchrocyclotron

M. Reiser, H. Kim, and D. Levine 749

Short Papers Not Presented Orally

Modification of a conventional 37 in cyclotron

L. Schecter, H. T. Easterday, P. Fessenden, L. W. Swenson,
C. W. Rogers, and M. A. Wilson 768

Resonant proton beam depolarisation in a synchrocyclotron

G. Besnier 769

Concluding Remarks by Dr. J. D. Lawson and Professor H. L. Hagedoorn 775

List of Delegates 777

Author Index 785

Index of Contributing Groups 787

Isochronous Cyclotrons—1969: a World List compiled by F. T. Howard 789
