

Contents

Urban, P. Introduction	V
Salam, A. Non-Polynomial Lagrangian Theories	1
Atkinson, D. Introduction to the Use of Non-Linear Techniques in S-Matrix Theory	32
Martin, A. Some Exact Results on $\pi\pi$ Scattering	71
Renner, B. Aspects of Chiral Symmetry	91
Landshoff, P. V. Some Recent Work in Regge Theory: Regge Cuts, The Absorption Model and Glauber Theory	145
Landshoff, P. V. Veneziano-Like Model for a Two-Current Amplitude	166
Hite, G. E. Absorption Corrections and Cuts in the Regge Pole Model	180
Phillips, R. J. N. Lectures on Regge Phenomenology	214
Hlawka, E. Differentiable Manifolds	265
Sexl, R. U. General Relativity and Gravitational Collapse	308
Streit, L. The Construction of Physical States in Quantum Field Theory	355
Rühl, W. The $O(3,1)$ Analysis of Currents and Current Commutators	392
Kugler, M. Duality	443
Flamm, D. Some Remarks on the Quark Model	548
Kummer, W. Anomalies in Ward Identities?	567
Pietschmann, H. Structure Effects in Weak Interactions	588
Doebner, H. D. and T. D. Palev. Realizations of Lie Algebras Through Rational Functions of Canonical Variables	597
Tolar, J. Mass Operator in the $SU(3)$ -Symmetric Strong Coupling Theory with Pseudoscalar Mesons	610
Atkinson, D. Summary—First Week	620
Pietschmann, H. Summary—Second Week	629
