

## Contents

### Session I. Theoretical

Chairman: A. DE SHALIT

	Page
Paper 1. Nuclear Masses and Nucleosynthesis. By J. A. WHEELER .....	1
Paper 2. Mass Laws and Nucleosynthesis. By P. A. SEEGER .....	1
Paper 3. Semi-Empirical Analysis of Nuclear Masses. By N. ZELDES .....	11
Paper 4. Empirical Separation Energies and the BCS Pairing Theory. By M. BEINER, K. BLEULER, P. HUGUENIN, and R. DE TOURREIL ..	38
Paper 5. A New Nuclidic Mass Law. By H. KÜMMEL, J. MATTAUD, W. THIELE, and A. H. WAPSTRA .....	42
Paper 6. Semi-Empirical Interpretation of Nuclear Masses and Deformations. By W. J. SWIATECKI.....	58
Paper 7. Construction of an Extended Nuclidic Mass Table. By M. HILLMAN	67
Paper 8. Status Report on Atomic Masses. By A. H. WAPSTRA and J. H. E. MATTAUD .....	74
Paper 9. Considerations about Programming Mass Adjustments. By W. THIELE .....	82
Paper 10. Some Statistical Problems in the Computation of Nuclidic Mass Formulae. By E. BREITENBERGER .....	91

### Session II. Fundamental Constants

Chairman: J. W. M. DU MOND

Paper 1. The Proton Gyromagnetic Ratio as a Nuclear Standard. By H. A. CAPPTULLER .....	105
Paper 2. Precision $\gamma$ -Ray Wavelength Measurement by Crystal Diffraction. By J. W. KNOWLES .....	113
Paper 3. Precision Measurements on the Muon, Muonium, Positronium, and Helium as Related to the Fundamental Atomic Constants. By J. M. BAILEY and V. W. HUGHES .....	130
Paper 4. The Most Probable Up-to-Date Value of the Normal Molecular Volume $V_0$ of an Ideal Gas. By T. BATUECAS .....	139
Paper 5. The International Union of Pure and Applied Chemistry and its Interest in the Values of the Fundamental Constants. By F. D. ROSSINI .....	149
Paper 6. Present Status of our Knowledge of the Numerical Values of the Fundamental Physical Constants. By E. R. COHEN and J. W. M. DU MOND .....	152

**Session III. Energy Differences Between Nuclear States**

Chairman: D. M. VAN PATTER

	Page
Paper 1. Systematics of Single Particle Levels. By B. L. COHEN .....	187
Paper 2. Separation Energies of Nucleon Pairs. By H. T. TU and K. WAY .....	193
Paper 3. Mass Systematics Involving Low-Lying Excited States. By F. EVERLING .....	209
Paper 4. Nuclidic Masses and Structure of Nuclei. By V. A. KRAVTSOV ..	215

**Session IV. Calibration Energies for Nuclear Measurements**

Chairman: H. H. STAUB

Paper 1. Energies of Natural Alpha Radiators. By A. RYTZ .....	221
Paper 2. The Energy of Polonium Alpha Particles as Determined by Different Methods. By C. P. BROWNE .....	229
Paper 3. Atomic Effects on Nuclear Reaction Yield Curves. By R. G. HERB .....	241
Paper 4. Nuclear Resonance Energies. By H. H. STAUB .....	257
Paper 5. Absolute Energy Standards for Van de Graaff Accelerators. By G. C. PHILLIPS .....	261
Paper 6. Recommended Values of Calibration Energies. By J. B. MARION ..	279

**Session V. Nuclear *Q*-Value Determinations**

Chairman: W. W. BUECHNER

Paper 1. <i>Q</i> -Value Measurements at M. I. T. By A. SPERDUTO and W. W. BUECHNER .....	289
Paper 2. Nuclear Reaction Measurements at the National University of Mexico. By M. MAZARI, A. JÁIDAR, G. LÓPEZ, A. TEJERA, J. CAREAGA, R. DOMÍNGUEZ, and F. ALBA .....	305
Paper 3. <i>Q</i> -Value Measurements at the University of Pittsburgh. By R. K. PATELL and B. L. COHEN .....	324
Paper 4. The Relative Masses of Some Uranium Isotopes Determined from Nuclear Reaction Studies. By R. MIDDLETON and H. MARCHANT .....	329
Paper 5. Accurate Measurements of ( <i>p</i> , <i>n</i> ) Thresholds in the Proton Energy Range 5 to 10 MeV. By JOAN M. FREEMAN, R. E. WHITE, J. H. MONTAGUE, G. MURRAY, and W. E. BURCHAM .....	341
Paper 6. <i>Q</i> -Values as Measured Through Resonance Energies. By H. H. STAUB .....	353

**Session VI. Mass Values from Mass Spectroscopy**

Chairman: A. O. C. NIER

Paper 1. Some Atomic Masses in the Region from Gallium Through Molybdenum. By R. R. RIES, R. A. DAMEROW, and W. H. JOHNSON .....	357
Paper 2. Atomic Masses from Ruthenium to Xenon. By R. DAMEROW, R. R. RIES, and W. H. JOHNSON .....	375

## Contents

## VII

	Page
Paper 3. Recent Mass Values Obtained at McMaster University. By R. C. BARBER, R. L. BISHOP, L. A. CAMBEY, H. E. DUCKWORTH, J. D. MACDOUGALL, W. McLATCHIE, J. H. ORMROD, and P. VAN ROOKHUYZEN.....	393
Paper 4. Mass Differences of Doublets Involving H, D, C, N and O. By K. OGATA and S. MATSUMOTO .....	415
Paper 5. A Direct Determination of the $^3\text{H}$ — $^3\text{He}$ Mass Difference. By P. E. MORELAND Jr. and K. T. BAINBRIDGE.....	423
Paper 6. Nuclidic Masses and Binding Energies of Nuclei from Samarium to Lutetium. By R. A. DEMIRKHANOV, V. V. DOROKHOV, and M. I. DZKUYA .....	430
Summation of the Conference. By A. H. WAPSTRA .....	465
Subject Index .....	471
