

TABLE OF CONTENTS

A. PHASE TRANSITIONS AND THEORY OF LARGE AMPLITUDE COLLECTIVE MOTION

- A Comparison Between the Adiabatic Time-Dependent Hartree-Fock, and the Generator Coordinate Methods for the Description of Nuclear Collective Motion (<i>invited talk</i>) - F. Villars	p. 3
- The Adiabatic Time-Dependent Hartree-Fock Theory of Nuclear Collective Motion (<i>invited talk</i>) - M. Baranger	p. 19
- The Hartree-Fock and the Generator Coordinate Methods in Field Theory. The Polaron Problem - J. Da Providencia, M. Da Conceição and C.A. De Sousa	p. 23
- A Variational Derivation of the Adiabatic Time-Dependent Hartree-Fock Formalism - D.M. Brink, M.J. Giannoni and M. Veneroni	p. 25
- Adiabatic and Non-Adiabatic Time-Dependent Hartree-Fock Theory with Skyrme Interactions - D.M. Brink, Y.M. Engel, K. Goeke, S.J. Krieger and D. Vautherin	p. 27
- An Iteration Method for Solving the Adiabatic Time-Dependent Hartree-Fock Equations - M.J. Giannoni, D. Vautherin and M. Veneroni	p. 29
- Questions About Two Centre HF Problems - R.M. Dreizler, H. Galbraith and L. Lin	p. 30
- Coupling Between Rotations and Vibrations in Nuclei - M.H. Caldeira	p. 31
- Collective Masses for Anharmonic Isoscalar Vibrations - D.M. Brink, Y.M. Engel, K. Goeke, S.J. Krieger and D. Vautherin	p. 33
- An Approximate Calculation of the Fission Mass Parameter of Plutonium-240 - H. Flocard and D. Vautherin	p. 35
- Particle-Hole States in Light Nuclei - M. Rosina and M.V. Mihailovic	p. 37
- A Boson Hamiltonian Derived from the Time-Dependent Hartree-Fock Formalism - M.J. Giannoni	p. 39
- Canonical Transformation Method with Auxiliary Collective Variables as a Method of Treating the Mutual Interweaving of Elementary Modes of Excitations in Nuclei - A. Kuriyama, T. Marumori, K. Matsuyanagi, F. Sakata and T. Suzuki	p. 41
- The Quasi-Boson Assumption in Rare Earth and Single-Closed-Shell Nuclei - S.M. Peltier, A. Plastino and E.S. Hernandez	p. 43
- On Hydrodynamical Model and Beyond - M. Sotona and J. Zofka	p. 45
- Self-Consistent Nuclear Fields at High Spins (<i>invited talk</i>) - H.J. Mang	p. 47

- Semiclassical Description of a System of Fermions in a Rotating Field - <i>M. Brack and B.K. Jennings</i>	p. 63
- A New Variational Procedure Based on the Deformed-Hartree-Fock Method - <i>K. Kumar</i>	p. 66
- Microscopic Approach to Coupled Modes in Nuclei - <i>E. Nadjakov</i>	p. 69
- Microscopic Theory of Asymmetric Rotor - <i>K. Sugawara-Tanabe and K. Tanabe</i>	p. 71
- Approximating VAP - <i>C.V. Charzewski and R.M. Dreizler</i>	p. 73
- Investigation of "Back-Bending" in Yb Nuclei - <i>H.R. Dalafi</i>	p. 75
- A Study of Collective Motion in the pf-Shell - <i>H. Mütter, K. Allaart, K. Goeke and A. Faessler</i>	p. 78
- Description of Transitional Nuclei in the pf-Shell with the Generator Coordinate Method - <i>H. Mütter, K. Goeke, A. Faessler and K. Allaart</i>	p. 79
- Study of the Low-Lying States of ^{19}F , ^{21}Ne and ^{23}Na by the Generator Coordinate Method and by the Projected Hartree-Fock Calculations - <i>N. Mankoc-Borstnik, F. Brut and S. Jang</i>	p. 81
- Structure of ^{51}V and ^{53}Mn - <i>A.K. Dhar, S.B. Khadkikar, D.R. Kulkarni and K.H. Bhatt</i>	p. 83
- Projected Multishell Hartree-Fock Calculations and Structure of Some $A=8$ Nuclei - <i>S.B. Khadkikar, V.B. Kamble and D.R. Kulkarni</i>	P. 85

B. THE THEORY OF THE NUCLEAR AVERAGE FIELD

- Brueckner-Hartree-Fock Calculations in Finite Nuclei (<i>invited talk</i>) <i>P.U. Sauer</i>	p. 89
- The Validity of the Local Density Approximation and Simple Effective Interactions (<i>invited talk</i>) - <i>J.W. Negele</i>	p.113
- Dynamic Interactions for the Two-Particle Propagator - <i>F.J.W. Hahne, W.D. Heiss and C.A. Engelbrecht</i>	p.144
- A Comparison of Two Variational Calculations in the Brueckner Theory of Finite Nuclei - <i>S.A. Coon</i>	p.145
- Saturation Density and Binding Energy of Nuclear Matter from a Quasi-Particle Approach - <i>J.-P. Jeukenne, A. Lejeune and C. Mahaux</i>	p.147
- Perturbation Theory with a Soft Core Two Nucleon Interaction - <i>D. Gogny and M. Maitre</i>	p.149
- BHF-Plus-Rearrangement Calculations with Soft-Core Forces in ^{16}O - <i>R. Padjen, B. Rouben, D. Gogny and P. Pirès</i>	p.151
- The Equation of State and the Magnetic Susceptibility of Neutron Matter with Realistic N-N Potentials - <i>P. Haensel and J. Meyer</i>	p.153
- The Spin and Isospin Dependence of the Nuclear Single-Particle Potential - <i>J. Dabrowski and P. Haensel</i>	p.154
- Self-Consistent Calculation of the Optical Potential, the Effective Mass and the Binding Energy (<i>invited talk</i>) - <i>J.-P. Jeukenne, A. Lejeune and C. Mahaux</i>	p.155
- Information on Nuclear Fields Derived from Empirical Data on Nuclear Excitations (<i>invited talk</i>) - <i>I. Hamamoto</i>	p.171

- Brueckner-Hartree-Fock Approach to the Optical-Model Potential -
J.-P. Jeukenne, A. Lejeune and C. Mahaux p.189
- Shared Character of Hole-State Single-Particle Energies and the
Binding Energy of Nuclei - *M. Harada* p.191
- Ward Identity and GVISR - *V. Paar* p.193
- The Many-Body Theory for Finite Nuclei (and Other Fermi Systems)
(invited talk) - *H. Kihmel, K.H. Lührmann and J.G. Zabolitzky* p.195

C. NUCLEAR FIELDS CALCULATED WITH PHENOMENOLOGICAL FORCES

- Nuclear Ground State Properties with the Skyrme Interaction
(invited talk) - *H. Flocard* p.219
- Self-Consistent Calculations of Ground State Properties for Unstable
Nuclei - *M. Beiner, R.J. Lombard and D. Mas* p.255
- Self-Consistent Hypernuclei with the Skyrme Interaction - *M. Rayet* p.258
- A Generalized Skyrme Interaction with Low Incompressibility -
J.P. Blaizot, B. Grammaticos and K.F. Liu p.259
- A Need to Modify the Skyrme Interaction Suggested by RPA Calcula-
-tions - *J.P. Blaizot* p.261
- RPA Calculations with the Skyrme Interactions SIV - *J.P. Blaizot* p.263
- Self-Consistent RPA Calculation with the Finite Range and Density
Dependent Interaction "D 1" - *J.P. Blaizot and D. Gogny* p.265
- Giant Resonances Studied in Continuum-RPA and in GCM-Approach -
S. Krewald, A. Faessler, J. Speth, J. Birkholz and J.E. Galonska p.267
- Microscopic Calculation of Collective Vibrations within the Hartree-
Fock Approximation - *J.P. Blaizot and B. Grammaticos* p.269
- How Good are Hartree-Fock Charge Densities ? (invited talk) -
X. Campi p.271
- The Shell Structure of the ⁵⁸Ni Charge Density - *I. Sick,
J.B. Bellicard, M. Bernheim, A. Bussière de Nercy, B. Frois,
A. Gillebert, M. Huet, Ph. Leconte, J. Mougey, Phan Xuan Hô, D. Royer
and S. Turck* p.295
- Review of Some Recent Results on Ground State Deformation Properties
Obtained in Self-Consistent Calculations (invited talk) - *P. Quentin* p.297
- Triaxial Hartree-Fock Calculations Using Skyrme's Effective Inter-
action - *B. Grammaticos* p.331
- Self-Consistent Pairing Calculations (invited talk) - *D. Gogny* p.333
- Validity of the Strutinsky Method, Studied within the Hartree-Fock
Framework (invited talk) - *M. Brack and P. Quentin* p.353
- What Can We Still Learn from Microscopic Calculations without Self-
Consistency ? - *C.M. Ko, H.C. Pauli, M. Brack and G.E. Brown* p.395
- Thermal Properties of Nuclei - *G. Sauer, P.G. Zint and U. Mosel* p.397
- Self-Consistent Calculations at Finite Temperatures - *M. Brack and
P. Quentin* p.399
- Electric Field in Neutron Stars - *B. Bertotti, S. Boffi and C. Giusti* p.402

D. MATHEMATICAL DEVELOPMENTS

- Systematics of Generalized Hartree-Fock Theory (<i>invited talk</i>) - <i>I. Kelson</i>	p.405
- Green Function Approach to Particle-Vibration Coupling - <i>M. Baldo</i>	p.425
- A Note on Variational Problems with Constrained Deformation - <i>G. Fonte and G. Schiffrer</i>	p.427
- Variational Problems with Smooth Functionals - <i>G. Fonte and G. Schiffrer</i>	p.429
- Best Density Criterion and Geminal Product Approximation - <i>F.D. Pacati and S. Boffi</i>	p.431
 AUTHOR INDEX	 p.433
 LIST OF PARTICIPANTS	 p.435
