1987/1988 School Organization	xvii

ACCELERATOR PHYSICS AND TECHNOLOGY

An Introduction to the Physics of Particle Accelerators	2
D. A. Edwards and M. J. Syphers	
Transverse Motion of Single Particles in Accelerators	190
R. Talman	
Fundamentals—Longitudinal Motion	243
W. T. Weng	
RF System Considerations for a Large Hadron Collider	288
E. Raka	
Beam Observation and the Nature of Instabilities	343
J. Gareyte	
Bunched Beam Diagnostics	430
R. H. Siemann	
Fields, Impedances, and Structures	472
K. Y. Ng	
Introduction to Wake Fields and Wake Potentials	525
P. B. Wilson	
Characteristics of Synchrotron Radiation	565
K. J. Kim	
Review of Linear Collider Beam–Beam Interaction	633
P. Chen	
The Linear Collider Beam–Beam Problem	680
R. Hollebeek	
A Quantum Treatment of Beamstrahlung and its Application to Ribbon Pulses	711
R. Blankenbecler and S. D. Drell	
Methods of Beam Optics	758
F. Willeke and G. Ripken	
Nonlinear Dynamics	820
G. Guignard	
Phase Space Concepts	891
L. Michelotti	
Comments on Nonlinear Dynamics Studies in Storage Rings	946
A. W. Chao	
The Description of Particle Accelerators Using High-Order Perturbation Theory on Maps	961
M. Berz	
Methods of Stability Analysis in Non-linear Mechanics	995
R. L. Warnock, R. D. Ruth, W. Gabella, and K. Ecklund	

Advanced Nonlinear Theory: Long-Term Stability at the SSC	1015
S. Heifets	
A Review on the Lattice Design of Large Hadron Colliders	1062
S. Y. Lee	
The Physics of Codes	1084
R. K. Cooper and M. E. Jones	
Canonical Integrators as Tracking Codes	1106
E. Forest	

VOLUME TWO

A Compendium of Computer Codes Used in Particle Accelerator	
Design and Analysis	1137
Los Alamos Accelerator Code Group	
Superconducting Magnet System	1327
P. Dahl	
Superconductor Developments	1377
D. Larbalestier	
Radio-Frequency Acceleration	1393
M. Puglisi	
Principles and Technology of RFQs	1477
A. Schempp	
Photocathode RF guns	1500
R. L. Sheffield	
Low Emittance Thermionic Electron Guns	1532
W. B. Herrmannsfeldt	
Intense, Low Emittance Injectors for RF Electron Linacs	1543
T. I. Smith	
Final Focus Systems for Linear Colliders	1553
R. A. Erickson	
Positrons for Linear Colliders	1592
S. Ecklund	
Free-Electron Lasers	1615
C. A. Brau	
Free-Electron Lasers	1707
R. H. Pantell	
Fundamentals of Intense Relativistic Electron Beams	1729
R. B. Miller	
Application of Pulse Power Technology to Ultra High Energy	
Electron Accelerators	1759
J. A. Nation	
Coherence and Statistical Properties of Photon Beams	
with Application to the Free-Electron Laser	1776
A. Bhattacharjee and I. Gjaja	
Plasma Acceleration of Particle Beams	1798
T. Katsouleas and J. M. Dawson	

THE TEVATRON

Introduction	1830
D. A. Edwards	
Antiproton Source	1845
J. Peoples	
Primer on Beam Dynamics in Synchrotrons	1878
L. C. Teng	
Emittances Through the Fermilab Accelerator Chain	1910
D. Finley	
Detection and Compensation of Transverse Resonances	1928
R. Gerig	
Longitudinal Phase Space in Circular Accelerators	1941
P. S. Martin and S. Ohnuma	
Longitudinal Instabilities and Stability Criteria	1969
K. Y. Ng	
Resonant Extraction at the Tevatron	2009
M. Harrison	
Beam Loss	2033
A. Van Ginneken, D. Edwards, and M. Harrison	
Design and Operation of the Quench Protection System for the Fermilab Tevatron	2073
P. S. Martin	

PERSPECTIVES

Science in the Age of Accelerators	2098
M. L. Perl	
Accelerator Projects, Worldwide	2116
L. C. Teng	
Technology and Particle Beams	2127
D. L. Hartill	
Synchrotron Radiation	2138
H. Winick	
Induction Accelerators and Free-Electron Lasers at LLNL	2183
R. J. Briggs	
Progress on Next Generation Linear Colliders	2208
R. D. Ruth	
The SSC Project	2227
J. Peoples	
Parameter Choices for the SSC	2240
J. M. Peterson	
Supercollider Physics	2255
C. Quigg	
Particle Accelerators and Discoveries in Elementary Particle Physics	2280
L. W. Jones	
Federal Science Policy	2300
Harold P. Hanson
