1987/1988 School Organization .....	xvii

### ACCELERATOR PHYSICS AND TECHNOLOGY

An Introduction to the Physics of Particle Accelerators .....	2
D. A. Edwards and M. J. Syphers	
Transverse Motion of Single Particles in Accelerators .....	190
R. Talman	
Fundamentals—Longitudinal Motion .....	243
W. T. Weng	
RF System Considerations for a Large Hadron Collider .....	288
E. Raka	
Beam Observation and the Nature of Instabilities .....	343
J. Gareyte	
Bunched Beam Diagnostics .....	430
R. H. Siemann	
Fields, Impedances, and Structures .....	472
K. Y. Ng	
Introduction to Wake Fields and Wake Potentials .....	525
P. B. Wilson	
Characteristics of Synchrotron Radiation .....	565
K. J. Kim	
Review of Linear Collider Beam-Beam Interaction .....	633
P. Chen	
The Linear Collider Beam-Beam Problem .....	680
R. Hollebeek	
A Quantum Treatment of Beamstrahlung and its Application to Ribbon Pulses .....	711
R. Blankenbecler and S. D. Drell	
Methods of Beam Optics .....	758
F. Willeke and G. Ripken	
Nonlinear Dynamics .....	820
G. Guignard	
Phase Space Concepts .....	891
L. Michelotti	
Comments on Nonlinear Dynamics Studies in Storage Rings .....	946
A. W. Chao	
The Description of Particle Accelerators Using High-Order Perturbation Theory on Maps .....	961
M. Berz	
Methods of Stability Analysis in Non-linear Mechanics .....	995
R. L. Warnock, R. D. Ruth, W. Gabella, and K. Ecklund	

<b>Advanced Nonlinear Theory: Long-Term Stability at the SSC .....</b>	<b>1015</b>
S. Heifets	
<b>A Review on the Lattice Design of Large Hadron Colliders .....</b>	<b>1062</b>
S. Y. Lee	
<b>The Physics of Codes .....</b>	<b>1084</b>
R. K. Cooper and M. E. Jones	
<b>Canonical Integrators as Tracking Codes .....</b>	<b>1106</b>
E. Forest	

## *VOLUME TWO*

<b>A Compendium of Computer Codes Used in Particle Accelerator Design and Analysis .....</b>	<b>1137</b>
Los Alamos Accelerator Code Group	
<b>Superconducting Magnet System .....</b>	<b>1327</b>
P. Dahl	
<b>Superconductor Developments .....</b>	<b>1377</b>
D. Larbalestier	
<b>Radio-Frequency Acceleration .....</b>	<b>1393</b>
M. Puglisi	
<b>Principles and Technology of RFQs .....</b>	<b>1477</b>
A. Schempp	
<b>Photocathode RF guns .....</b>	<b>1500</b>
R. L. Sheffield	
<b>Low Emittance Thermionic Electron Guns .....</b>	<b>1532</b>
W. B. Herrmannsfeldt	
<b>Intense, Low Emittance Injectors for RF Electron Linacs .....</b>	<b>1543</b>
T. I. Smith	
<b>Final Focus Systems for Linear Colliders .....</b>	<b>1553</b>
R. A. Erickson	
<b>Positrons for Linear Colliders .....</b>	<b>1592</b>
S. Ecklund	
<b>Free-Electron Lasers .....</b>	<b>1615</b>
C. A. Brau	
<b>Free-Electron Lasers .....</b>	<b>1707</b>
R. H. Pantell	
<b>Fundamentals of Intense Relativistic Electron Beams .....</b>	<b>1729</b>
R. B. Miller	
<b>Application of Pulse Power Technology to Ultra High Energy Electron Accelerators .....</b>	<b>1759</b>
J. A. Nation	
<b>Coherence and Statistical Properties of Photon Beams with Application to the Free-Electron Laser .....</b>	<b>1776</b>
A. Bhattacharjee and I. Gjaja	
<b>Plasma Acceleration of Particle Beams .....</b>	<b>1798</b>
T. Katsouleas and J. M. Dawson	

## THE TEVATRON

<b>Introduction .....</b>	<b>1830</b>
D. A. Edwards	
<b>Antiproton Source .....</b>	<b>1845</b>
J. Peoples	
<b>Primer on Beam Dynamics in Synchrotrons .....</b>	<b>1878</b>
L. C. Teng	
<b>Emittances Through the Fermilab Accelerator Chain .....</b>	<b>1910</b>
D. Finley	
<b>Detection and Compensation of Transverse Resonances .....</b>	<b>1928</b>
R. Gerig	
<b>Longitudinal Phase Space in Circular Accelerators .....</b>	<b>1941</b>
P. S. Martin and S. Ohnuma	
<b>Longitudinal Instabilities and Stability Criteria .....</b>	<b>1969</b>
K. Y. Ng	
<b>Resonant Extraction at the Tevatron .....</b>	<b>2009</b>
M. Harrison	
<b>Beam Loss .....</b>	<b>2033</b>
A. Van Ginneken, D. Edwards, and M. Harrison	
<b>Design and Operation of the Quench Protection System for the Fermilab Tevatron .....</b>	<b>2073</b>
P. S. Martin	

## PERSPECTIVES

<b>Science in the Age of Accelerators .....</b>	<b>2098</b>
M. L. Perl	
<b>Accelerator Projects, Worldwide .....</b>	<b>2116</b>
L. C. Teng	
<b>Technology and Particle Beams .....</b>	<b>2127</b>
D. L. Hartill	
<b>Synchrotron Radiation .....</b>	<b>2138</b>
H. Winick	
<b>Induction Accelerators and Free-Electron Lasers at LLNL .....</b>	<b>2183</b>
R. J. Briggs	
<b>Progress on Next Generation Linear Colliders .....</b>	<b>2208</b>
R. D. Ruth	
<b>The SSC Project .....</b>	<b>2227</b>
J. Peoples	
<b>Parameter Choices for the SSC .....</b>	<b>2240</b>
J. M. Peterson	
<b>Supercollider Physics .....</b>	<b>2255</b>
C. Quigg	
<b>Particle Accelerators and Discoveries in Elementary Particle Physics .....</b>	<b>2280</b>
L. W. Jones	
<b>Federal Science Policy .....</b>	<b>2300</b>
Harold P. Hanson
