

CONTENTS

	Page
I. INTRODUCTION	1
<i>M. Jacob and H. Satz</i>	
II. GENERAL SURVEYS	
A. <u>Theory</u>	
Deconfined Phases of Strongly Interacting Matter	17
<i>G. Baym</i>	
Parameters and Signals for Quark-Gluon Matter Formation in Nucleus-Nucleus Collisions	39
<i>K. Kajantie</i>	
Space Time Pictures of Ultrarelativistic Nucleus-Nucleus Collisions	63
<i>L. McLerran</i>	
Formation of a Quark-Gluon Plasma in Nuclear Collisions	81
<i>M. Gyulassy</i>	
The Dynamics of Heavy Ion Reactions at Relativistic Energies	95
<i>J. Knoll</i>	
Collective Aspects of Hadrons and Quarks in Nucleus-Nucleus Collisions	115
<i>J. Kapusta</i>	
Models for Particle Production in Nucleus-Nucleus Collisions at High Energies	139
<i>A. Białas</i>	
B. <u>Experiments</u>	
Experimental Results from Light Ion Collisions	169
<i>M. Faessler</i>	
Recent Results from the Bevalac	185
<i>H. Pugh</i>	

	Review of Recent Developments in Cosmic Ray Experiments at Very High Energies	213
	<i>G.B. Yodh</i>	
C.	<u>Accelerators</u>	
	The Acceleration of Heavy Ions to Very High Energies	237
	<i>M. Barton</i>	
	Light Ions at CERN	253
	<i>H. Haseroth</i>	
	Possibilities of Heavy-Ion Acceleration in the KEK Proton Synchrotron	273
	<i>K. Nakaï</i>	
III.	SUMMARIES	
	Present Heavy-Ion Experiments and Their Theoretical Interpretation	281
	<i>S. Nagamiya</i>	
	Accelerator Prospects for High Energy Heavy Ion Collisions	319
	<i>H. Pugh</i>	
	Future Experiments in Ultrarelativistic Heavy Ion Collisions	329
	<i>M. Albrow</i>	
	The Theoretical Situation	349
	<i>L. Van Hove</i>	
IV.	SPECIALIZED TOPICS	
A.	<u>Theory</u>	
	The SU(N) Yang-Mills System at Finite Temperature	373
	<i>J. Engels</i>	
	Perturbative Calculability and Infrared Behavior in QCD at High Temperature	391
	<i>E. D'Hoker</i>	
	Fermions in Lattice Quantum Chromodynamics	397
	<i>I. Montvay</i>	

Lattice QCD with Wilson-Fermions at Finite Temperature	409
<i>F. Karsch</i>	
New Stochastic Method in Lattice Theories	423
<i>J. Kuti</i>	
Signatures of Quark-Gluon Plasma Formation in Nuclear Collisions	435
<i>M. Gyulassy</i>	
Towards a Classical Dynamical Description of the Quark-Gluon Plasma in Heavy Ion Collisions	439
<i>U. Heinz</i>	
B. <u>Experimental Working Groups</u>	
Past and Future Possible Experiments with Light Ions at CERN	449
<i>M. Faessler, S. Frankel and R. Szwed</i>	
Photons and Leptons	463
<i>G. London and K. Nakai</i>	
Few Particle Correlations in Heavy Ion Interactions at High Energies	485
<i>H. Bøggild and I. Otterlund</i>	
Peripheral Collisions	513
<i>R. deVries and H. Fischer</i>	
Inclusive Measurements and Particle Identification	519
<i>S. Nagamiya and H. Specht</i>	
Large Solid Angle Detectors	537
<i>C. Fabjan, H. Gutbrod, A. Sandoval and A. Wagner</i>	
C. <u>The PS Proposal</u>	
Study of Relativistic Nucleus-Nucleus Reactions Induced by ^{16}O Beams of 9-13 GeV per Nucleon at the CERN PS	557
<i>GSI-LBL-Heidelberg-Marburg-Warsaw-Collaboration</i>	
LIST OF PARTICIPANTS	583
