

CONTENTS

List of participants	xxv
<u>SESSION 1: FUNDAMENTAL MECHANISMS</u>	
Chairman: E. Schopper	
H. Paretzke Invited paper	Can dosimetric quantities describe charged particle tracks in matter? 3
A. Chambaudet J. Roncin	I.R., U.V. and E.S.R. studies on plastic track detectors irradiated by heavy ions 15
S.R. Hashemi-Nezhad R.K. Bull S.A. Durrani	Electron and alpha particle damage in biotite mica: implications for track formation mechanisms 23
R. Gold J.H. Roberts F.H. Ruddy	Annealing effects in solid state track recorders 27
J.P. Duraud Y. Langevin M. Maurette	New concepts for fossil track studies in lunar silicates 37
M. Chipara L. Georgescu M. Chipara	Latent and etched track formation in polymeric detectors - a thermodynamic approach 41
K.K. Saini I.M. Talwar N. Lal K. Mahesh K.K. Nagpaul	Electret studies of CN-85 45
G. Schnoor H. Schütt R. Beaujean W. Enge	Electrolytical studies of submicroscopic nuclear tracks in plastic detectors 51

D. Albrecht P. Armbruster M. Roth R. Spohr	Small angle neutron scattering from oriented latent nuclear tracks	55
J. C. Vareille J. L. Decossas J. P. Moliton J. L. Teyssier B. Delaunay	Influence of the atomic number and energy of bombarding ions on the spatial distribution of damage produced in cellulose triacetate	59
T. D. M ^{ark}	Ion induced track formation mechanism in apatite	65
T. A. Gruhn E. V. Benton	The chemical basis of the photo-oxidative enhancement of track etching in the polycarbonate of bisphenol-A	69
<u>SESSION 2: PRACTICAL DETECTORS</u>		
<u>SESSION 2.1: NEW DETECTORS</u>		
Chairman: E. Schopper		
M. Najžer M. Humar R. Ilić	Microautoradiography with gelatine	77
D. O'Sullivan P. B. Price K. Kinoshita C. G. Willson	Correlative studies of track-etch behaviour and chemical development of lithographic polymer resists	81
D. O'Sullivan A. Thompson	Tuffak polycarbonate as a track detector	85
<u>SESSION 2.2: EMULSION</u>		
R. Katz	Specification of emulsion response through track theory	91
G. J ^{on} sson C. Bjarle	Track widths of low energy heavy fragments in nuclear emulsion	95
<u>SESSION 2.3: POLYMERS</u>		
Chairman: P. B. Price		
G. Somogyi Invited paper	Status of development in the field of CR-39 track detectors	101

D.L. Henshaw S. Amin V.M. Clapham P.H. Fowler D.J. Webster A. Thompson D. O'Sullivan	The form of the CR-39 response curve and its effect on particle resolution and areas of application	115
K. Schaupert K. Keiner G. Fiedler R. Spohr	SSNTDs for high energetic heavy ions	119
T. Hayashi R. Hamasaki T. Doke	Characteristics of CR-39 for detection of cosmic ray particles	123
G. Baroni A.M. Cecchetti F. Meddi G. Rosa	Track measurements on plastic sheets exposed to the CERN-SC carbon beam	127
G. Rimpl R. Salzberger B. Uebigau	Improvement of CR-39 foils for applications in the dosimetry of biological systems	133
D.L. Henshaw N. Griffiths O.A.L. Landen S.P. Austin A.A. Hopgood	Track response of CR-39 manufactured in specifically controlled temperature- time curing profiles	137
T.W. Turner V.M. Clapham A.P. Fews D.L. Henshaw	On the quantitative analysis and effects of internal temperature fluctuations during cure of the polycarbonate CR-39	141
J.H. Adams Jr.	A curing cycle for detector-quality CR-39	145
A. Thompson D. O'Sullivan D.L. Henshaw S. Amin V.M. Clapham P.H. Fowler D.J. Webster	An improved CR-39 track detector for cosmic ray applications	149
E.V. Benton T. Gruhn M. Tran R. Spohr	Effect of oxygen on track etching in CR-39	155

K. Ogura E. Tamai	The effect of thermal treatment after irradiation on the etching properties of CR-39 track detector	159
J.H. Adams, Jr L.P. Beahm	A study of long-term thermal annealing on lexan plastic track detector	163
S.A.R. Al-Najjar R.K. Bull S.A. Durrani	Track-profile and range studies of heavy and light ions in CR-39: Effect of thermal pre-treatment on etching characteristics	167
A. Thompson D. O'Sullivan J.H. Adams, Jr. L.P. Beahm	The dependence of track response on registration temperature in Lexan and CR-39	171
S.A. Amin D.L. Henshaw	Effect of various etching solutions on the response of CR-39 plastic track detector	175
P.F. Green A.G. Ramli S.R. Hashemi-Nezhad S.A.R. Al-Najjar C.M. Ooi F. Abu-Jarad R.K. Bull S.A. Durrani	On the optimisation of etching conditions for CR-39 and other plastic track detectors	179
R. Ilic M. Najzer A. Podgornik M. Humar	Radiographic characteristics of CR-39 detector	183
Shi-Lun Guo	Study of solid state nuclear track detectors in the Institute of Atomic Energy of the Academy of Sciences of China	189
M. Fantini G. Renard	Influence of chemical and physical parameters on the quality and reproducibility of tracks in cellulose nitrate films	193

SESSION 2.3: POLYMERS continued

Chairman: M. Maurette

L. Tommasino	Invited paper	Nuclear track detection by avalanche-type processes: Electrochemical etching, spark and breakdown counter	199
--------------	---------------	---	-----

L. Tommasino G. Zapparoli F. Caiazzo	A new method for electrochemical etching: I. Results with dc voltage	211
L. Tommasino G. Zapparoli F. Caiazzo	A new method for electrochemical etching: II. Results with ac voltage	215
Zhu Tiancheng Xie Yunrui	A study of the basic properties of ECE tracks in polycarbonate foils	221
H.B. Luck K. Turek F. Spurný	Some aspects of treeing on particle tracks under different conditions	225
A.M. Bhagwat S.D. Soman	On the investigation of solution (etchant) parameters influencing the development of charged particle tracks by electrochemical etching (ECE)	229
A.M. Bhagwat S.D. Soman	A study of the role of electrical parameters in the electrochemical etching (ECE) process	233
A.G. Ramli S.A. Durrani	Electrochemical etching of CR39: optimization of parameters for the processing of neutron-irradiated samples	237
G. Espinosa García J.I. Golzarri L. Tommasino F. Raponi	Electrochemical etching registration and track formation time	241
G. Somogyi Gy. Almási	Study of the electrical treeing produced around nuclear tracks by sequential electrical and chemical treatment (SECT)	245
Z. Lferde M. Monnin	Electrochemical etching of CR-39	251
A. Vidal-Quadras F. Fernández M. Gonzalo M. Ortega C. Baixeras M. Casas	Sensitivity of cellulose nitrate to mass differences in the low Z region	257

F. Fernández A. Vidal-Quadras M. Ortega C. Baixeras M. Gonzalo M. Casas	A systematic experimental study of low charge discrimination with cellulose nitrate	261
Shi-Lun Guo Shu-Hua Zhou Wu Meng Sheng-Fen Sun Ru-Fa Shi	Detection efficiencies of solid state nuclear track detectors for fission fragments	265
E. Dietz G. Rassl	A calculation of the efficiency of makrofol fission track detectors for fission fragments from thin and thick fission foils	271
G. " Jonsson	On the detection of alpha particles by Kodak LR-film at various angles of incidence	275
M. Zamani S. Charalambous	The statistical behavior of registration of alphas in cellulose nitrate (preirradiated and non-preirradiated)	279
M. Balcázar-García V. Cuauhtécatl	A method to determine the energy per nucleon of isotopic beams utilizing SSNTDs	283
M. Balcázar-García H. Pineda	Versatile irradiation chamber to perform experiments with SSNTDs	287
M. Gonzalo A. Vidal-Quadras M. Ortega F. Fernández C. Baixeras M. Casas J. Sequeiros J. Medina	Sensitivity of lexan polycarbonate to mass differences in the iron peak	291
G. Sermund I. Milanowski G. Törber R. Beaujean G. Siegmon W. Enge	Fe-ion registration in cellulose nitrate plastic detectors	295

M. Monnin M. Lferde J-L. Seidel G. Somogyi M. Toth-Szilagy	Invited paper	Diffusion processes in dyed detectors	299
G. Törber W. Enge R. Beaujean G. Siegmon		The diffusion-etch-model Part I: Proposal of a new two phase track developing model	307
I. Milanowski W. Enge G. Sermund R. Beaujean G. Siegmon		The diffusion-etch-model Part II: First application for quasi- relativistic Fe-ion registration in daicel-cellulose nitrate	311
G. Braune W. Enge		Improvements of the α -particle registration applying the diffusion etch model	315

SESSION 2.4: GLASSES AND MINERALS

Chairman: R.L. Fleischer

A.P. Sharma J.S. Yadav K.L. Gomber V.P. Perelygin S.G. Stetsenko		On the improved energy resolution of glass track recorders	321
A.P. Sharma V.P. Singh J.S. Yadav K.L. Gomber		Etching conditions for track revelation of ^{252}Cf fission fragments in soda glass detectors	325
S.M. Farid S. Chander A.P. Sharma		Development of a better etchant for soda glass nuclear track detectors	329
S.K. Chakarvarti N. Lal K.K. Nagpaul		Effects of magnetic field on glass detectors	333
J. Borg J. Chaumont J.P. Duraud Y. Langevin M. Maurette J.C. Petit		Implantation of low energy ions ($E \leq 3 \text{ keV/a.m.u.}$) in solid state track detectors: individual tracks in mica	337

J. Borg	Implantation of low energy ions	
J.C. Dran	($E \leq 3$ keV/amu) in solid state track	
J.P. Duraud	detectors: "Planar" tracks in various	
Y. Langevin	silicates	341
M. Maurette		
J.C. Petit		
S.A. Durrani	Alpha-recoil tracks in mica revisited	345
S.R. Hashemi-Nezhad		
H.A. Khan	Scanning electron microscopic studies	
R. Spohr	of etched track profiles	349
W. Ritter	Absorption spectroscopy of fission	
T.D. Märk	track induced radiation damage in	
E. Bertagnolli	apatite	353

SESSION 3: APPLICATIONSSESSION 3.1: FISSION TRACK DATING

Chairman: R.L. Fleischer

S.A. Durrani	Invited paper	The current status and problems of fission-track dating	361
Shi-Lun Guo		Some methods in fission track dating of Peking man	371
Z. Yegingil		Fission track dating of obsidians	375
Y. Göksu			
W. Ritter		Fission track temperature ages of	
E. Bertagnolli		sphene from the Caledonides in	
T.D. Märk		Sweden	381
H.J. Koark			
E. Bertagnolli		Fission track temperature age theory	389
M. Pahl			
R. Keil			
E. Märk		A new method of estimating accuracy	
T.D. Märk		and precision of fission track ages	395
D. Chaillou		Fission track dating applied to the	
A. Chamaudet		Plio-Pleistocene	399
A. Chamaudet			
J. Couthures			

P. F. Green A. J. Hurford	Current problems in fission track dating, and some possible solutions	403
<u>SESSION 3.2: REACTOR ENVIRONMENT AND NEUTRON DOSIMETRY</u>		
Chairman: P. H. Fowler		
B. Edmondson	Invited paper	The interaction between basic science and engineering technology in the nuclear power field
H. Bock H. Muller N. Vana		The application of solid state nuclear track detectors in nuclear safeguards
J. H. Roberts R. Gold F. H. Ruddy		Selected etching and annealing properties of Brazilian quartz crystals for solid state track recorder applications
Shi-Lun Guo Sheng-Fen Sun Guo-Fu Huang Jia-Fu Liu		Measurement of nuclear reactor neutron flux with glass track detectors
N. Segovia J. Cejudo		Study of the behaviour of track detectors in gamma dose fields and high temperature conditions
M. M. Dhawan K. K. Nagpaul		Determination of uranium trace content in stainless steel using solid state nuclear track detectors
Li Huantie Zhu Tiancheng Xie Yunrui Xie Jianlun Jian Dexi Huang Chenguang Xu Shenke		Application of solid state nuclear track detector in neutron dosimetry
F. H. Ruddy R. Gold J. H. Roberts C. C. Preston E. V. Benton H. Schraube		Neutron response characteristics of CR-39 polymer for reactor and dosimetry applications

S. Faermann Y. Eisen R. Weingarten E. Ovadia Z. Karpinovitch Y. Shamai T. Schlesinger	CR-39 as a track-detector for a Rem-equivalent personnel neutron dosimeter	441
G. Somogyi G. Dajkó K. Turek F. Spurný	Characteristics of neutron-irradiated CR-39 foils treated by sequential chemical and electrochemical etching	445
E. Pitt A. Scharmann B. Werner H.-U. Demisch F.K. Dolezalek A. Grabowski	Development of thin CR-39 detector films for spark counting of recoil proton tracks	451
H. Francois C. Heilmann M. Jung R. Demoulin A. Kappler R. Oppel	Nuclear emulsion activation and fast neutron dosimetry	455
K.G. Harrison C.A. Perks	Neutron dosimetry studies using CR-39 plastic	461
J.C.H. Miles K.G. Harrison	Results of measurements using Landauer Neutrak-144 neutron dosemeters	465
M.A. Kenawy M.A. Gomaa A.M. Ahmed R.V. Griffith	Neutron dosimetry using a CR-39- ⁶ LIF albedo system	469
J. Pálfalvi	Neutron dose distribution measurements in a water filled phantom by SSNTDs	481
Lj. Vasiljević D. Velicković I. Mirić	Sensitivity of cellulose nitrate track detectors in dependence on neutron energy	487
S.A.R. Al-Najjar R. Koohi-Fayegh S.A. Durrani	Neutron spectrometry using chemical and electrochemical etching of CR-39	491
G.M. Hassib E. Piesch	A new personnel albedo neutron dosimeter using track etch detectors - design and performance	495

SESSION 3.3: RADON MONITORING

Chairman: D. Lal

R. L. Fleischer A. Mogro-Campero	Invited paper	Radon transport in the earth: a tool for uranium exploration and earthquake prediction	501
M. Monnin J. L. Seidel		An automatic device for radon activity measurements	513
J. L. Seidel M. Monnin		Some radon activity measurements of geophysical significance	517
G. Somogyi Gy. Németh J. Palfalvi I. Gerzson		Subsurface radon-distribution measurements with LR-115, CR-39 and TL-detectors	525
A. L. Frank E. V. Benton		Properties of a small radon diffusion chamber with plastic track detectors	531
J. Kvasnička		Detection of alpha particles in the environment by track detector Kodak LR 115	535
P. Pfligersdorffer W. Hofmann E. Pohl		Applicability of nuclear track detectors to the measurement of environmental levels of radon and decay products	539
A. Sadiq A. Waheed H.A. Khan R.A. Akber		Use of cylindrical geometry for radon dosimetry	543
M. Humar M. Najzer R. Ilic		Moisture-insensitive probes for separate measurement of radon isotopes	549
D. L. Henshaw M.S. Hobbs C.H. Williams A.P. Fews		Size distribution of airborne aerosol Particles with attached α -active nuclei	553
A.E. Liehu I. Mäkeläinen M. Valkainen K. Winqvist		Calibration of LR-115 and CR-39 for radon and comparative measurements in indoor air in Finland	557
F. Abu-Jarad J.H. Fremlin		The response of plastic detectors to radon activity inside houses	561

F. Abu-Jarad J.H. Fremlin	Radon emanation from uranium corridor in Orkney Islands and in Kinver caves	565
J.C.H. Miles E.J. Dew	A passive radon gas detector for use in homes	569
M.A. Gomaa B.A. Henaish A.M. Eid A.A. Elsayed	Experience gained in the field of radiation dosimetry using CR-39 carbonate plastic detector	573
M. Urban E. Piesch	A passive radon dosimeter for survey programs in dwellings	577

SESSION 3.4: DETECTION OF URANIUM AND MAPPING

Chairman: D. Lal

D. Veličković I. Mirić P. Mirić P. Bojović	Determination of natural uranium traces using solid state track detectors	583
H.S. Virk P.S. Suri S. Singh	Uranium estimation in plants of Siwalik Himalayas Himachal Pradesh, India	587
G. Espinosa A. Moreno J.I. Golzarri	Uranium determination in water using solid state nuclear track detectors	591
V.K. Din P. Henderson	Application of CR-39 to the mapping of B in minerals and rocks	597
S.R. Hashemi-Nezhad S.A. Durrani R.K. Bull	Determination of U-content of uranium- bearing veins and inclusions	601
W. Ritter T.D. Märk E. Bertagnolli R. Vartanian	Fission track determination of uranium in sea, lake and spring water	605
R.L. Fleischer	Alpha-recoil damage and preferential solution effects: mechanism of track- production and implications for isotopic disequilibrium, radon release, and nuclear waste disposal	609

S.M. Houstoun N.L. Jefferies	CR-39 α -particle autoradiographs of some radioactive minerals from SW England	621
---------------------------------	---	-----

SESSION 3.5: MEDICINE AND BIOLOGY, α -SPECTROSCOPY AND LE T SPECTRA

Chairman: H.G. Paretzke

E.V. Benton	Invited paper	Application of nuclear track detectors in biology and medicine	629
A.P. Fews D.L. Henshaw		High resolution α -particle spectroscopy using CR-39 plastic track detector	641
J.R. Harvey A.R. Weeks		A study of the growth of etch pits in CR-39 using a silicon rubber cast technique	647
E. Wittendorp-Rechenmann B. Senger J.B. Sanders R.V. Rechenmann		Energetic nuclear collisions induced by medium energy α -particles crossing dense media	653
B. Senger E. Wittendorp-Rechenmann R.V. Rechenmann		Ionization cross-sections in the case of heavy charged particles traversing complex media	657
E.V. Benton R.P. Henke C.A. Tobias W.R. Holley J.I. Fabrikant D.L. Henshaw		Charged-particle radiography and computerized tomography	661
E.V. Benton R.P. Henke C.S. Johnson W. Heinrich R. Rudat		LE T-spectra measurements from accelerated beams of energetic heavy particles	667
J. Beer W. Heinrich		A measurement of cosmic-ray LE T-spectra using a microprocessor supported microscope	671
A. Aframian S. Ghahremani		Range and energy loss rates for heavy ions; some anomalous properties	675
J.H. Wyatt R.J. Dixon K.W. Bentley		Microanatomical localisation of fissionable elements in histological sections using lexan replicas	679

W.R. Ellis R.A. Jeffree	Determination of the distribution of alpha emitters in the tissues of the freshwater mussel <i>Velesunio Angasi</i> using the alpha track etch method	683
T.J. Jenner D.J. Gore	A technique for the determination of the spatial distribution of fissionable radionuclides in lung sections using lexan	691
W. Hofmann	Experimental investigation of the microdistribution of inhaled radon decay products in various tissues by autoradiography with CR-39	697
J.B. Vuković	Scanning electron microscopy radioautography by emulsion and polymer track detectors	701
A.P. Fews D.L. Henshaw	The microdistribution of α -active nuclei in the human lung I - Techniques	705
D.L. Henshaw A.P. Fews	The microdistribution of α -active nuclei in the human lung II - Results	711
A.P. Fews D.L. Henshaw	Analysis of uranium fragments found in the human lung	717
<u>SESSION 3.6: MICROFILTERS</u>		
Chairman: H.G. Paretzke		
G. Tress P. Vater E.U. Khan H.A. Khan R. Brandt M. Kadner R. Spohr	Applications of mica track microfilters: surveillance of hot contaminated air at an industrial plant	723
W.-D. Mittmann G. Siegmon R. Beaujean W. Enge	Electrolytically controlled nuclear track plastic-filter production	727
I. Röll G. Siegmon W. Enge	Electron microscope studies on nuclear track filters	731

SESSIONS 3.7-3.12: ATOMIC, NUCLEAR, PARTICLE AND COSMIC RAY PHYSICS

Chairman: G. Somogyi

P.B. Price	Invited paper	Applications of plastic track detectors to atomic, nuclear, particle and cosmic ray physics	737
M. Várnagy J. Csikai		Application of solid state nuclear track detectors for measuring fission cross-section ratios	753
Ž. Todorović R. Antanasićević B. Grabež		Identification of light fragments from binary events produced in the interaction of 12.7 GeV α -particles with Au target	757
M. Debeauvais J. Ralarosy J. Tripier S. Jokic		Fission of ^{238}U projectiles induced by a ^{12}C target	763
B. Grabež R. Beckmann P. Vater R. Brandt		Investigation of reaction $84\text{ MeV/u C}^{12} + \text{Pb}^{208}$ by using CR-39 plastic track detector	769
H.A. Khan R. Beckmann P. Vater P.-A. Gottschalk R. Brandt K. Jamil		Observation of rare four-pronged events (due to double-sequential fission) in the reaction $12.5\text{ MeV/u Kr-84} + \text{U-nat.}$ by use of mica SSNTD	775
G. Fiedler R. Haag P. Crombach G. Breitbach P.A. Gottschalk P. Vater E.U. Khan R. Beckmann R. Brandt		Application of SSNTDs to heavy ion reaction-studies	779

SESSION 3.8: NUCLEAR FRAGMENTATION

Chairman: G. Somogyi

W. Heinrich H. Drechsel R. Schucht E.V. Benton R. Cassou D.J. Hildebrand	An investigation of interactions of heavy ion fragments using computerized track analysis	785
---	---	-----

SESSION 3.9: HIGH ENERGY NUCLEAR REACTIONS

Chairman: G. Somogyi

C. Jacquot	First results using emulsion telescope technique to a 300 GeV negative pion beam in a magnetic field	791
M. Lopez-Quelle		
R. Niembro		
A. Ruiz		
R. Schmitt		
J.N. Suren		
E. Villar		
A. Waheed	Pion emission from light emulsion nuclei due to 1.5 GeV/c K ⁻ meson interactions	799
M. Ayub		

SESSION 3.10: NOVEL SITUATIONS

Chairman: G. Somogyi

P.J. McNulty	Optical properties of particle tracks in SSNTD detectors	807
S.R. Palmer		
D.D. Cooke		
D. Mapper		
D.J. Bolus		
J. Stephen	The application of uranium fission track autoradiography as a method of investigating the problem of soft errors in VLSI silicon memory devices	815
C. Altstetter	Ion beam analysis of light isotopes	825
R. Illic		
Ching-shen Su	Diffusion of uranium in rhenium determined by solid state nuclear track detector	829
Hsien-fong Young		

SESSIONS 3.11 and 3.12: METEORITES AND COSMIC RAYS

Chairman: M. Monnin

D. Lal	Invited paper	The cosmic ray track record of events in early solar system	835
P. Mold			
R.K. Bull			
S.A. Durrani		Plutonium-244 concentrations in chondritic phosphates and their significance in fission-track dating of meteorites	851
R.K. Bull			
P. Mold		Fission tracks in chondritic meteorites and the search for siderophile superheavy elements	855

W. Hunger G. Siegmon G. Sermund R. Beaujean W. Enge W.R. Webber G.A. Simpson	Isotope-measurement of cosmic ray nuclei from Ca to Fe by a plastic-electronic-experiment	859
W. Heinrich M. Simon H.O. Tittel J.F. Ormes V.K. Balasubrahmanyam R.E. Streitmatter	A large area cosmic ray isotope experiment using Cherenkov range detector techniques	863
J.H. Adams, Jr. L. Beahm J.A. Maturi B. Stiller A. Thompson	A method for measuring the isotopic abundances of cosmic rays	867
D. O'Sullivan A. Thompson P.H. Fowler D.L. Henshaw	The abundance of zinc in the cosmic radiation	871
J. Sequeiros J. Medina	Correction for efficiency of cosmic ray charge spectrum obtained with a SSNTD stack	875

SESSION 4: AUTOMATED ANALYSIS SYSTEMS

E.V. Benton R.P. Henke D.J. Hildebrand R.M. Cassou H. Drechsel W. Heinrich R. Rudat	Computerized track analysis of high-energy accelerated argon-projectile fragments	881
J.H. Roberts R. Gold F.H. Ruddy	Optical efficiency and observer objectivity for fission track counting in muscovite solid state track recorders	887
R. Gold J.H. Roberts F.H. Ruddy	Buffon needle method of track counting	891
L. Faiman	Enhancing the energy-sensitivity of track diameters for α -particles in CR-39	899

M. Balcazar-Garcia J. Lira A. Uria	Radon isodose curve drawings from a microdensitometer-computer ensemble	903
J. Lira M. Balcazar-Garcia	Computerized method for automatic track evaluation from microdensitometer readings	907
W. Heinrich W. Trakowski J. Beer R. Schucht	A microprocessor based picture analysis system for automatic track measurements	911
J. H. Adams, Jr. L. P. Beahm B. Stiller	A precision measuring microscope employing laser interferometry	915
<u>SUPPLEMENTARY PAPERS</u>		
Y. V. Rao M. P. Hagan J. Blue	Application of CR-39 track detector for detection of protons; ^3He and ^4He ions	921
P. B. Price D. O'Sullivan S. P. Ahlen	Thin-film dosimetry for neutrons and alpha particles	925
P. B. Price D. O'Sullivan	Improving the etching properties and tailoring the response of CR-39 plastic track detectors with dopants	929
Hueyshan Wu Mingchang Yu Changlong Tan Zengfu Li Yaozhao Han	Some principles in the use of an alpha track technique for uranium exploration	933
Hueyshan Wu Yaozhao Han Mingchang Yu Yufei Lin Chenglong Tan	Interpretation of the results of the track-etch survey in sandstone areas	939
Tehal Singh Surinder Singh H. S. Virk	A new track etchant for plastic detectors	947
Author index		949
Subject index		953
