

CONTENTS

PART I: REVIEWS

Fundamental Symmetries and Quantum Electrodynamics	3
A.O. Barut	
Recent Progress in Implementing the Tensor Operator Calculus	15
L.C. Biedenharn, R. Le Blanc and J.D. Louck	
On a Global Differential Geometric Approach to the Rational Mechanics of Deformable Media	33
E. Binz and D. Socolescu	
Berry's Connection, The Charge-Monopole System and the Group Theory of the Diatomic Molecule	85
A. Bohm	
Symmetry Models in Solid State Chemistry	123
W.O.J. Boo	
Spontaneous Symmetry Breaking in Unified Theories with Gauge Group $SO(10)$	133
F. Buccella	
Symmetries and Statistical Models	141
V. Cantoni	
Infinitely Generated Supermanifolds, Super Lie Groups and Homogeneous Supermanifolds	147
R. Cianci	
Lie Algebras and Recurrence Relations II	163
P. Feinsilver	
Diffeomorphism Groups and Local Symmetries: Some Applications in Quantum Physics	181
G.A. Goldin and D.H. Sharp	
Quasi-Particle Groups in Atomic Shell Theory	207
B.R. Judd	
Properties of Orthogonal Operators	215
B.R. Judd, D.J. Newman and B. Ng	

Group Theory for Non-Periodic Long-Range Order in Solids	225
P. Kramer	
Symmetries in the Lagrangian and Hamiltonian Formalism:	
The Equivariant Inverse Problem	243
G. Marmo, G. Morandi and C. Rubano	
Accidental Degeneracy and Structure of Matter in Strong	
Magnetic Fields	311
M. Moshinsky, G. Loyola and A. Szczepaniak	
Galilean Symmetry	323
M. Omote, S. Kamefuchi, Y. Takahashi and Y. Ohnuki	
Symmetry in Dynamic Economic Models	331
R. Sato and R. Ramachandran	
Harmonic Oscillator Representation in the Theory	
of Scattering and Reactions	347
Yu.F. Smirnov	
Representations of Lie Groups and Integral Transforms	365
N.Ja. Vilenkin and A.U. Klimyk	

PART II: SPECIAL SESSION

(Sponsor: U.S. Office of Naval Research, London)

Self-Organization and Symmetry Breaking in	
Living Matter	379
E. Del Giudice, S. Doglia, and G. Vitiello	
On Kida Class of Vortex Filament Motions	389
A. Doliwa and A. Sym	
Dynamical Symmetry of the Kaluza-Klein Monopole	399
L.Gy. Feher and P.A. Horvathy	
Nonlinear Optics in Quantum Confined Semiconductors	419
P. Horan and W. Blau	
Symmetry and Scale: From Local to Global Symmetries	423
R. Kerner	
The Mapping Class Group in Statistical Mechanics:	
A Concise Review	453
M. Rasetti	
Algebraic Properties and Symmetries of Integrable	
Evolution Equations	469
P.M. Santini	
Energy of Skyrmionic Configurations	483
E. Sorace and M. Tarlini	

Remarks About the Dynamics of the Solitary Waves	489
L. Vasquez	
Method of Studying Integrals of Dynamical Systems	
Based on Frobenius' Integrability Theorem	493
S. Wojciechowski	

PART III: RESEARCH PAPERS AND REPORTS

Form Factors of Massive Neutrinos in Extended $SU(2)_L \times U(1)$	
Models	507
M. Abak and C. Aydin	
Incompatible Observables and the Measurement of Berry's Phases	517
K. Datta	
Hidden Symmetries of a Self-Dual Monopole	525
L. Feher, P. Horvathy and L. O'Raifeartaigh	
On the Importance of the Weyl Group for Kac-Moody and	
String Algebras	531
N. Gorman, W. McGlinn and L. O'Raifeartaigh	
On Representations of the Symplectic Group	535'
V.A. Groza	
Tensor Product of Finite and Infinite Representations	
in Physics	537
W.F. Heidenreich	
String and Superstring Spectra	545
R.C. King	
The Shift Operators and the Wave Functions in Ginocchio Model	559
Y. Ling, Z. Chu and D. Ji	
Highest Weight Representations of the Lie Algebra gl_∞	
in Gel'fand-Zetlin Basis	567
T.D. Palev	
Computerized Symmetrization of Quantum States	575
M. Ramek and B. Gruber	
Note on the Experimental Evidence for Quantum Mechanical	
Coherence in Red Blood Cells	585
S. Rowlands	
The Analysis of Unitary Irreducible Representations of the	
$U(p, 1)$ Algebra by Means of the Projection Operator	
Method	587
Yu.F. Smirnov, L.Ya. Stotland and V.A. Knyr	

Calculating Properties of Lie Groups	593
B.G. Wybourne	
On Commutativity of Prime Rings with (σ, τ) -Derivations	599
M.S. Yenigul	
Index	607
