## PART I. THE NUCLEAR FORCE PROBLEM

CHAPTER 1. INTRODUCTORY REMARKS . . . . .	3
1-1 Objectives . . . . .	3
1-2 The mechanics of nuclear physics . . . . .	5
1-3 The nuclear particles . . . . .	7
CHAPTER 2. QUALITATIVE DISCUSSION OF NUCLEAR FORCES . . . . .	10
2-1 Consequences of $A \approx 2Z$ . . . . .	10
2-2 The shape of the potential . . . . .	11
2-3 Saturation of nuclear forces . . . . .	14
2-4 Structure of the chart of stable nuclei . . . . .	17
2-5 Conclusion . . . . .	24

## PART II. THE TWO-BODY PROBLEM

CHAPTER 3. GROUND STATE OF THE DEUTERON . . . . .	27
3-1 Properties of the deuteron . . . . .	27
3-2 Binding energy. Square well . . . . .	29
3-3 Binding energy. Other central potentials . . . . .	33
3-4 Magnetic moment of the deuteron . . . . .	38
3-5 The quadrupole moment of the deuteron . . . . .	43
3-6 The tensor coupling . . . . .	53
CHAPTER 4. EXCITED STATES OF THE DEUTERON . . . . .	56
4-1 Triplet states . . . . .	56
4-2 The Majorana interaction . . . . .	59
4-3 Singlet states . . . . .	63
4-4 Low energy neutron-proton scattering . . . . .	65
4-5 Low energy n-p scattering. Square well . . . . .	70
4-6 n-p Scattering. Effective range theory . . . . .	79
CHAPTER 5. S-SCATTERING BY BOUND NUCLEI . . . . .	89
5-1 The chemical binding effect . . . . .	89
5-2 Effect of target motion . . . . .	96
5-3 Scattering of neutrons by ortho- and parahydrogen . . . . .	98
5-4 The coherent scattering length . . . . .	104
5-5 Critical reflection of neutrons . . . . .	108
CHAPTER 6. FURTHER CONSIDERATIONS OF THE TWO-BODY PROBLEM . . . . .	112
6-1 Neutron-proton scattering at intermediate and high energies . . . . .	112
6-2 Proton-proton scattering. Low energy . . . . .	120
6-3 Proton-proton scattering. High energy . . . . .	131

6-4	Photodisintegration of the deuteron . . . . .	133
6-5	Capture of neutrons by protons . . . . .	140
6-6	Summarizing remarks on the two-body problem . . . . .	150
CHAPTER 7. REMARKS ON THE MESON THEORY OF NUCLEAR FORCES . .		156
7-1	I-spin and the generalized Pauli principle . . . . .	156
7-2	The neutral scalar field . . . . .	161
7-3	Charged and pseudoscalar fields . . . . .	167
PART III. COMPLEX NUCLEI		
CHAPTER 8. STRUCTURE OF COMPLEX NUCLEI . . . . .		173
8-1	Introductory remarks . . . . .	173
8-2	Nuclear multiplets . . . . .	175
8-3	Structure of $H^3$ and $He^3$ . . . . .	180
8-4	The Wigner coupling scheme . . . . .	190
8-5	The independent particle model. Russell-Saunders coupling . . . . .	197
8-6	The independent particle model. Mayer-Jensen coupling . . . . .	204
8-7	The spin-orbit coupling . . . . .	213
8-8	Saturation conditions . . . . .	217
8-9	Excited states of complex nuclei . . . . .	225
CHAPTER 9. ELECTROMAGNETIC INTERACTIONS OF NUCLEI . . . . .		232
9-1	Multipole moments and transitions. Selection rules . . . . .	232
9-2	Exchange effects . . . . .	241
9-3	Nuclear magnetic moments . . . . .	245
9-4	Nuclear quadrupole moments . . . . .	258
9-5	Internal conversion . . . . .	263
9-6	Nuclear isomerism . . . . .	269
CHAPTER 10. NUCLEAR REACTIONS . . . . .		277
10-1	The compound nucleus . . . . .	278
10-2	The collision matrix . . . . .	284
10-3	Dispersion theory of nuclear reactions . . . . .	290
10-4	The Breit-Wigner one-level formula . . . . .	297
10-5	Interpretation of the one-level formula . . . . .	304
10-6	Alpha radioactivity . . . . .	313
10-7	Selection rules and related matters . . . . .	316
10-8	Stripping reactions . . . . .	321
CHAPTER 11. CONCERNING BETA DECAY . . . . .		326
11-1	Form of the interaction . . . . .	327
11-2	Shape of the allowed spectrum . . . . .	333
11-3	Half-life for beta-decay and $K$ -capture . . . . .	335
11-4	Selection rules . . . . .	338
11-5	Special cases . . . . .	342

APPENDIX 1. THEOREM ON ORDERING OF LEVELS IN A CENTRAL POTENTIAL	348
APPENDIX 2. FESHBACH-SCHWINGER SOLUTION OF THE DEUTERON GROUND STATE PROBLEM FOR A YUKAWA POTENTIAL INCLUDING TENSOR INTERACTION . . . . .	350
APPENDIX 3. THE TIME-REVERSAL PROPERTIES OF THE SCHROEDINGER EQUATION . . . . .	353
APPENDIX 4. QUADRUPOLE MOMENTS OF ODD Z-EVEN $N$ NUCLEI FOR MAYER-JENSEN COUPLING . . . . .	359
APPENDIX 5. CONFIGURATIONS OF ODD-EVEN NUCLEI FOR MAYER-JENSEN COUPLING . . . . .	363
AUTHOR INDEX . . . . .	369
INDEX . . . . .	373
