Table of Contents

Preface		v
Chapter I	Sodium Iodide Crystal-photomultiplier Tube Combinations by R. W. Carlson	
	1. Introduction	1
	2. Theory	2
	3. Detector Design	6
	4. Detector Performance	12
Chapter II	The Use of Unactivated Sodium Iodide, by L. E. Beghian and G. Kegel	
	1. General Description of the Purpose and Uses of the Cooled NaI Counter	15
	2. Energy Resolution and Temperature Effects	18
	3. Electronic Equipment	20
	4. Measurements Involving the Cooled Counter	23
	5. Energy and Time Resolution Considerations	27
Chapter III	Background ,Shielding and Collimation by W. E. Kreger and R. L. Mather	
	1. Introduction	33
	2. Sources of Background	35
	3. Shielding	63
	4. Collimation of X and Gamma Radiation	100
Chapter IV	Response of Sodium Iodide to Neutrons by S. M. Shafroth	
	1. Introduction	143
	2. Response Versus Neutron Energy	144
	3. Examples of Types of Experiments where Neutron Response has been Troublesome	157
	4. Experiments where Neutron Response of NaI(Tl) has been Useful	158
	5. Methods of Overcoming the Neutron Response of NaI(Tl)	159
Chapter V	Compton Spectrometers by T. H. Braid	
	1. Introduction	163
	2. Compton Effect	165
	3. Spectrometer Characteristics	167
	4. Efficiency	177
	5. Uses and Comparisons	181

Chapter VI Detectors Sensitive to Gamma Ray Polarization by G. J. McCallum and J. Vervier

1. Introduction 183
2. Polarization-Sensitive Processes 195
3. Construction of Compton-Scattering Polarimeters 210
4. Calibration of Polarimeters 247

Chapter VII Single Crystal Spectroscopy by R. Müller and D. Maeder

1. Introduction 267
2. Primary Interactions 272
3. Theoretical Calculation of Response Function 289
4. Instrumental Smearing 322
5. Experimental Results on Response Functions 338

Chapter VIII Unfolding Measured Distributions by J. E. Monahan

1. Introduction 371
2. The Response Operator 377
3. Analysis of Discrete Spectra 380
4. Systems of Linear Equations 386
5. An Error Analysis of the Measurement Equation 396
6. Continuous Spectra 399
