

# *Contents*

|   |     |
|---|-----|
| <i>List of Contributors</i> .....   | v   |
| <i>Preface</i> .....  | vii |
| <i>Contents of Volume I.</i> .....  | xi  |
| <b>Chapter I. Magnets for Bubble and Spark Chambers</b>   |     |
| <b>T. H. FIELDS</b>   |     |
| I. General Considerations .....   | 1   |
| II. Special Considerations for Bubble Chamber Magnets .....                                     | 22  |
| III. Special Considerations for Spark Chamber Magnets .....                                     | 26  |
| IV. Design of Iron-Copper DC Magnets .....  | 28  |
| V. Superconducting Magnets .....  | 43  |
| VI. Field Monitoring .....  | 49  |
| References.....   | 49  |
| <b>Chapter II. Conventional and Semiautomatic Data Processing and Interpretation</b>            |     |
| <b>MARGARET ALSTON, JACK V. FRANCK, and LEROY T. KERTH</b>                                      |     |
| I. General Introduction .....   | 52  |
| II. Interpretation of Experimental Data.....  | 59  |
| III. Bubble Chamber Data Processing.....  | 67  |
| IV. Spark Chamber Data Processing .....   | 121 |
| References.....   | 137 |
| <b>Chapter III. Fast Precision Digitizers On-Line to Computers for Measurement and Scanning</b> |     |
| <b>PAUL V. C. HOUGH</b>   |     |
| I. Introduction.....  | 141 |
| II. Measuring Instruments Designed for Input to a Computer.....                                 | 142 |
| III. The Filter Problem. Building Blocks for Future Scanning Programs.....                      | 163 |

|   |     |
|---|-----|
| IV. Use of the New Analysis Systems in Experiments..... | 179 |
| V. Concluding Remarks.....                              | 192 |
| References.....   | 193 |

## Chapter IV. Beam Production at Modern Accelerators

JACK SANDWEISS

|   |     |
|---|-----|
| I. Introduction.....  | 196 |
| II. Review of Beam Requirements for Bubble Chambers and Spark Chambers..... | 196 |
| III. Targeting Methods.....   | 197 |
| IV. Classification of Beam Systems for Visual Detectors.....                | 208 |
| V. Electrostatically Separated Beams.....                                   | 220 |
| VI. Radio Frequency Separated Beams.....                                    | 258 |
| VII. Control of Fluctuations in Beam Intensity and Distribution.....        | 275 |
| Appendix I. Computer Programs for Beam Design.....                          | 276 |
| Appendix II. Beam Transport Magnets at the Brookhaven AGS.....              | 281 |
| References.....   | 281 |

## Chapter V. Summary and Future Outlook

ALAN M. THORNDIKE

|   |     |
|---|-----|
| I. Equipment Required for an Experiment.....            | 290 |
| II. Personnel Involved in an Experiment.....            | 294 |
| III. Some Technical Developments of Promise.....        | 301 |
| IV. Limitations on the Rate of Future Developments..... | 304 |
| References.....   | 305 |
| <i>Author Index</i> .....                               | 307 |
| <i>Subject Index</i> .....                              | 313 |
