CHAPTER	PAGE
1. INTRODUCTION	1
1.1 Background	1
1.2 Hamiltonian dynamics	5
1.3 Prequantization	6
1.4 Representation space	8
1.5 Blattner-Kostant-Sternberg kernels	12
1.6 Quantization	14
1.7 Schrödinger representation	18
1.8 Other representations	23
1.9 Time-dependent Schrödinger equation	27
1.10 Relativistic dynamics in an electro- magnetic field	30
1.11 Pauli representation	34
2. HAMILTONIAN DYNAMICS	38
2.1 Poisson algebra	38
2.2 Local expressions	40
2.3 Relativistic charged particle	42
2.4 Non-relativistic dynamics	45
3. PREQUANTIZATION	51
3.1 Connections in line bundles	51
3.2 Prequantization line bundle	55
3.3 Prequantization map	57
4. REPRESENTATION SPACE	60
4.1 Polarization	60
4.2 The bundle $\sqrt{\hbar}^n F$	63
4.3 Square integrable wave functions	67
4.4 Bohr-Sommerfeld conditions	71

CHAPTER	PAGE
4.5	Distributional wave functions 73
5.	BLATTNER-KOSTANT-STERNBERG KERNELS 77
5.1	Transverse polarizations 77
5.2	Strongly admissible pairs of polarizations 82
5.3	Metaplectic structure 87
5.4	Induced metaplectic structure 96
6.	QUANTIZATION 101
6.1	Lifting the action of ϕ_f^t 101
6.2	Polarization preserving functions 103
6.3	Quantization via Blattner-Kostant-Sternberg kernels 107
6.4	Superselection rules 112
7.	SCHRÖDINGER REPRESENTATION 114
7.1	Single particle 114
7.2	System of particles 120
7.3	Blattner-Kostant-Sternberg kernels, quasi-classical approximations and Feynman path integrals 134
8.	OTHER REPRESENTATIONS 142
8.1	Bargmann-Fock representation 142
8.2	Harmonic oscillator energy representation 149
9.	TIME-DEPENDENT SCHRÖDINGER EQUATION 160
10.	RELATIVISTIC DYNAMICS IN AN ELECTROMAGNETIC FIELD 168
10.1	Relativistic quantum dynamics 168
10.2	Charge superselection rules 180
10.3	Quantization in the Kaluza theory 188

CHAPTER	PAGE
11. PAULI REPRESENTATION FOR SPIN	198
11.1 Classical model of spin	198
11.2 Representation space	200
11.3 Quantization	206
BIBLIOGRAPHY	214
INDEX	224
GLOSSARY OF NOTATION	227
