

CONTENTS

Editor's Foreword	v
Preface	vii
Chapter 1 General Theory	1
1-1 The continuation of partial-wave amplitudes	1
1-2 The Sommerfeld-Watson transform	4
1-3 Regge poles	6
1-4 The Mandelstam-Sommerfeld-Watson transform	10
1-5 Use of the M-S-W transform for negative energy	13
Chapter 2 Potential Scattering	16
2-1 Definition of the partial-wave amplitude	16
2-2 Analyticity properties of $a(l, k)$	19
2-3 Behavior for large l and the "J-parity" concept	24
2-4 Continuation to $\text{Re } l < -\frac{1}{2}$	26
2-5 Properties of Regge poles	30
2-6 Many-channel problems with arbitrary spin	36
Chapter 3 Relativistic S-Matrix Theory	42
3-1 The Froissart-Gribov definition of $a(l, s)$	42
3-2 Coupled channels and spin	48
3-3 Direct channel unitarity	50
3-4 Unitarity in the cross channel	55
3-5 Regge poles in S-matrix theory	60
Chapter 4 Application and Experimental Evidence	63
4-1 Summary of J -plane properties	63

4-2	The Pomeranchuk trajectory	64
4-3	Bound states and resonances	69
4-4	High-energy cross sections	74
4-5	Regge poles and dispersion relations	78
Chapter 5	Miscellany	80
5-1	Scattering by nuclei—a paradox	80
5-2	Regge poles and field theory	83
5-3	The photon	85
5-4	A modified Regge representation	88
	References	92
	Bibliography	96
	Recent Developments	99
	Reprints:	
	Regge Pole in π - π Scattering, G. F. Chew, S. C. Frautschi, and S. Mandelstam, <i>Phys. Rev.</i> , 126 , 1202 (1962)	101
	Asymptotic Behavior and Subtractions in the Mandelstam Representation, Marcel Froissart, <i>Phys. Rev.</i> , 123 , 1053 (1961)	108
	Constraints Imposed on Mandelstam Representation by Unitarity, André Martin, <i>Phys. Rev. Letters</i> , 9 , 410 (1962)	113
	Behavior of Scattering Amplitudes at High Energies, Bound States, and Resonances, R. Blankenbecler and M. L. Goldberger, <i>Phys. Rev.</i> , 126 , 766 (1962)	118
	Analyticity in the Complex Angular Momentum Plane of the Coulomb Scattering Amplitude, Virendra Singh, <i>Phys. Rev.</i> , 127 , 632 (1962)	139
	High-Energy Cross Sections, Pomeranchuk Theorems, and Regge Poles, B. M. Udgaonkar, <i>Phys. Rev. Letters</i> , 8 , 142 (1962)	144
	Low-Energy Pion-Pion Scattering, L. A. P. Balázs, <i>Phys. Rev.</i> , 128 , 1939 (1962)	148
	Low-Energy Pion-Pion Scattering, II, L. A. P. Balázs, <i>Phys. Rev.</i> , 129 , 872 (1963)	154
