Preface

Introduction

Changes introduced in the 7th edition – general features of the *Table of Isotopes* – detailed description of the data listings and level schemes

1. Isotope Index — Index– 1–9

   Isotopes by element – abundance – half–life – class – page

2. Table of Isotopes — 1–1523

   Mass–chain decay scheme – natural isotopic abundance – atomic mass excess – spin – neutron cross section (capture and fission) – type of decay – genetic branching – half–life – class and means of identification – means of production – alpha, beta, neutron, proton, and gamma radiation data (energies, intensities, internal conversion coefficients) – angular and polarization correlations of radiations – half–lives of excited states – electron capture subshell and capture to positron ratios – internal bremsstrahlung endpoints – detailed level scheme (levels populated by radioactive decay) – detailed level scheme (levels populated by nuclear reactions)

3. Reference–code List — Reference Codes– 1–12

4. Appendices

   APPENDIX I. CONSTANTS AND CONVERSION FACTORS — Appendices– 1–2
   Fundamental constants – energy conversion factors

   APPENDIX II. NUCLEAR SPECTROSCOPY STANDARDS — Appendices– 2–7
   Gamma–ray energies and intensities – conversion–electron intensities – internal conversion coefficients – alpha–particle energies

   APPENDIX III. ATOMIC LEVELS — Appendices– 8–12
   Electron binding energies – K x–rays (energies, relative intensities, and fluorescence yields)

   APPENDIX IV. ABSORPTION OF RADIATION IN MATTER — Appendices– 13–17
   Half–thickness for gamma–ray absorption – range and stopping power for electrons – range and stopping power for heavy charged particles

   APPENDIX V. NUCLEAR DECAY RATES — Appendices– 18–36
   Specific activities – log ft values – K–capture to positron ratios – electron capture subshell ratios – alpha decay hindrance factors – photon transition probabilities and lifetimes – theoretical internal conversion coefficients

   APPENDIX VI. THEORETICAL NUCLEAR LEVEL DIAGRAMS — Appendices– 37–41

   APPENDIX VII. TABLE OF NUCLEAR MOMENTS — Appendices– 42–64
