Part II
CHERENKOV COUNTERS:
DETERMINATION OF ENERGY AND DIRECTION
OF ELEMENTARY PARTICLES

PREFACE	ix
INTRODUCTION.....	xi
Chapter 1. METHODS FOR MEASURING THE AVERAGE ENERGY OF PARTICLES IN MONOENERGETIC BEAMS	1
§ 1. The Mather method.....	1
§ 2. A gas Cherenkov counter for the measurement of electron energies	11
§ 3. Simple energy monitors	14
§ 4. The diffraction method	16
§ 5. Possible methods for measuring particle energies in beams . . .	21
§ 6. Monitors for photon beams	23
Chapter 2. SOME GENERAL PROBLEMS IN THE DETECTION OF CHERENKOV RADIATION	28
§ 7. Spectral characteristics of photocathodes of Soviet-made photomultipliers and a method for calculating the number of photoelectrons from Cherenkov radiation	29
§ 8. Methods for sensitizing photomultipliers in the ultraviolet . . .	34
§ 9. Choice of radiator material.....	43
§ 10. Problems of light collection in Cherenkov counters.....	46
Chapter 3. THRESHOLD CHERENKOV COUNTERS	50
§ 11. Threshold counters for discrimination of particles with $\beta \leq 0.75$	50
§ 12. Examples threshold counters with liquid and solid radiators . . .	56
§ 13. Gas threshold Cherenkov counters	60
§ 14. Various types of gas threshold counters	70

Chapter 4.	DIFFERENTIAL CHERENKOV COUNTERS WITH SOLID AND LIQUID RADIATORS	83
§ 15.	The focusing condition for differential counters	83
§ 16.	Resolution of a differential focusing Cherenkov counter	86
§ 17.	Some optical systems and the first focusing counters with solid and liquid radiators	94
§ 18.	Achromatization of the radiation in differential Cherenkov counters	101
§ 19.	Latest developments and innovations in the field of differential Cherenkov counters	105
Chapter 5.	DIFFERENTIAL GAS CHERENKOV COUNTERS	118
§ 20.	General requirements of a gas differential Cherenkov counter	118
§ 21.	The first differential gas counters	123
§ 22.	High-resolution differential gas Cherenkov counters	130
§ 23.	The utilization of differential gas Cherenkov counters at accelerators in the 100-GeV region	142
Chapter 6.	TOTAL INTERNAL REFLECTION COUNTERS	149
§ 24.	General considerations	149
§ 25.	Certain types of total internal reflection counters	152
§ 26.	The unexploited possibilities of total internal reflection Cherenkov counters	162
Chapter 7.	TOTAL ABSORPTION CHERENKOV COUNTERS FOR PHOTONS AND ELECTRONS	172
§ 27.	Operating principles of the counter	172
§ 28.	Choice of the radiator material and dimensions for a Cherenkov gamma-spectrometer	172
§ 29.	Resolution and linearity of Cherenkov gamma-spectrometers as a function of energy	180
§ 30.	Characteristics of some Cherenkov gamma-spectrometers	184
§ 31.	Total absorption counters for charged particles	189
Chapter 8.	CHERENKOV COUNTERS FOR THE DETERMINATION OF THE CHARGE AND DIRECTION OF RELATIVISTIC PARTICLES	196
§ 32.	Operation principles of the counter and effective thresholds	196
§ 33.	Some remarks and the resolution of Cherenkov counters for the determination of Z	198
§ 34.	Counters for the direction determination of charged relativistic particles	202
§ 35.	Multichannel direction indicator for cosmic rays	204

§ 36. Cherenkov counters for the direction determination of particles in extensive air showers	206
§ 37. Cherenkov counter for the direction determination of energetic photons	210
Appendix 1. PHYSICAL AND CHEMICAL PROPERTIES OF OPTICAL GLASSES (REFERENCE TABLES).	215
Appendix 2. REFRACTIVE INDICES	222
Appendix 3. ACHROMATIZATION OF THE CHERENKOV RADIATION AND RAY TRACING IN DIFFERENTIAL COUNTERS	231
BIBLIOGRAPHY	242
