PREFACE.	V
GENERAL CONSTANTS	XII
DERIVED CONSTANTS	XII
INTRODUCTION	1

ATOMIC AND MOLECULAR WEIGHTS

1 Measurement of relative density	9
2 Measurement of mass, volume, and pressure	11
3 Mass spectrograph	13
4 Ultracentrifuge	15
5 Measurement of vapour pressure and heat of evaporation	18
6 Osmotic pressure	20
7 Mass-energy relation	25

AVOGADRO'S NUMBER

8 Viscosity and virial coefficient of gas	27
9 Unimolecular film and density of liquid	31
10 Diffusion coefficient	33
11 Ionic conductance.	35
12 Distribution in gravitational field	37
13 Brownian movement	39
14 Radioactive disintegrations.	41
15 Electronic charge	44
16 Lattice constant	50
17 Black-body radiation	52

MOLECULAR VELOCITIES

18 Distribution in given direction	56
19 Impacts on surface	58
20 Collision frequency	60

INTERATOMIC DISTANCES

21 Diamond structure	62
22 Unit cell in rutile	64
23 Positions of oxygen atoms in rutile	66
24 Scattering factor	70
25 Rotational Raman spectrum of benzene	72

MOMENTS OF INERTIA

26 Rotation spectrum of hydrogen chloride	74
27 Micro-wave spectrum of carbon oxysulphide	76
28 Vibration-rotation spectrum of hydrogen chloride	78

29	Isotopic substitution	81
30	Electron diffraction	83

CHARACTERISTIC FREQUENCIES

31	Hydrogen chloride	85
32	Acetylene	87
33	Inactive frequency of ethylene	89
34	Hindered rotation of ethane	94
35	Isotopic shifts	98
36	Inversion of ammonia	100

ELECTRIC MOMENTS AND POLARIZABILITIES

37	Gases	103
38	Solutions	106
39	Single liquids	111
40	Atomic polarizability	114

ENERGIES AND ENTHALPIES

41	Energy and enthalpy of combustion	117
42	Enthalpy of formation	120
43	Enthalpy change in hypothetical reaction	122
44	Resonance energies	123
45	Energy of dissociation from continuous absorption	125
46	Energy of dissociation from vibrational levels of excited state	127
47	Energy of dissociation from vibrational levels of ground state	130
48	Morse curve	133
49	Ionization potential	135
50	Lattice energy	137

ENTROPIES

51	Monatomic gas	141
52	Nitrogen	142
53	Carbon monoxide	145
54	Ordinary hydrogen	147
55	Para hydrogen	149
56	Rhombic and monoclinic sulphur	151

HEAT CAPACITIES

57	Formaldehyde	153
58	Nitric oxide	155
59	Ordinary hydrogen	157

EQUATION OF STATE

60	Second virial coefficient at given temperature	159
61	Second and third virial coefficients at given temperature	161
62	Second virial coefficients and Joule-Thomson coefficients	163
63	Second virial coefficient's temperature dependence	166
64	Orthobaric densities	169

65	Corresponding states	172
66	Vapour pressure of liquid	176

MIXTURES OF NON-ELECTROLYTES

67	Comparison of osmotic pressure and vapour pressure	178
68	Heat of dilution from vapour pressure	181
69	Vapour pressure of regular solution	183
70	Heat of mixing of regular solution	185
71	Free energy and enthalpy of mixing	187
72	Vapour pressure of polymer solution.	190
73	Partial volume	193
74	Determination of purity	195
75	Number of theoretical plates	198
76	Molecular diameter from diffusion	200

ELECTROLYTE SOLUTIONS

77	Cryoscopic constant of water	202
78	Debye-Hückel coefficient	205
79	Osmotic coefficient from freezing point	208
80	Osmotic coefficient from vapour pressure.	212
81	Activity coefficient from e.m.f.	215
82	Standard potential	219
83	Gibbs-Duhem relation	223
84	Activity coefficient from solubility	228
85	Activity coefficients in mixtures	231
86	Activity coefficient from cell with transference	234
87	Solubility product by electrometric titration	238
88	Solubility product from e.m.f.	242
89	Solubility product from conductance	246
90	Solubility from tables	248
91	Heat of dilution	249
92	Charge on mercurous ion	255

CONDUCTANCE AND DIFFUSION OF ELECTROLYTES

93	Effective diameter from conductance	257
94	Onsager coefficients	259
95	Limiting conductance of univalent chlorides	262
96	Limiting conductance of lanthanum trichloride	269
97	Determination of kinematic diffusion coefficient	273
98	Diffusion coefficient's dependence on concentration	276
99	Transport number by gravimetric method	280
100	Transport number by moving boundary	282

GASEOUS EQUILIBRIA

101	Measurements of $I_2 \rightleftharpoons 2I$ equilibrium	284
102	$I_2 \rightleftharpoons 2I$ equilibrium from spectroscopic data	286
103	$2HI \rightleftharpoons H_2 + I_2$ equilibrium from spectroscopic data	290
104	$\frac{1}{2}N_2 + \frac{3}{2}H_2 \rightleftharpoons NH_3$ equilibrium from tables	294
105	Equilibrium between para and ortho hydrogen	296

CHEMICAL EQUILIBRIA INVOLVING SOLIDS

106	$\text{Mg}(\text{OH})_2 \rightleftharpoons \text{MgO} + \text{H}_2\text{O}$ from spectroscopic and calorimetric data	298
107	$\text{C} + \text{CO}_2 \rightleftharpoons 2\text{CO}$ from tables	304
108	Stability of naphthalene picrate from e.m.f.	306

SOLUTION EQUILIBRIA

109	Esterification.	308
110	Bromine + chlorine	312
111	Dimerization of benzoic acid	315
112	Keto \rightleftharpoons enol	318
113	Acenaphthene + trinitrobenzene	320

ACID-BASE EQUILIBRIA

114	Dinitrophenol by spectrophotometry	323
115	Iodic acid by comparison with dinitrophenol	326
116	Ionization constant of water by conductance	328
117	Ionization constant of water by e.m.f.	330
118	Acidity constant of acetic acid by conductance	333
119	Acidity constant of acetic acid by e.m.f.	337
120	Acidity constant of H_2PO_4^- by e.m.f.	340
121	Heat of neutralization by calorimetry	343
122	Heat of neutralization by e.m.f.	344
123	Nitric acid by Raman spectrum.	346

GENERAL ELECTROLYTE EQUILIBRIA

124	$\text{I}_3^- \rightleftharpoons \text{I}_2 + \text{I}^-$	348
125	$\text{I}_2 \rightleftharpoons \text{I}^+ + \text{I}^-$	350
126	Oxidation-reduction	353
127	Silver-ammine one stage	355
128	Silver-ammine two stage	358
129	Stability constant of $\text{Ag}(\text{CN})_2^-$	362
130	Dissociation of lanthanum cobalticyanide	364
131	Hydrolysis of bromine.	368

SOLID SURFACES

132	Langmuir isotherm	371
133	Heat of desorption from Langmuir isotherm	375
134	B.E.T. isotherm	379
135	Area by dyestuff adsorption and by radioactive indicator	386

LIQUID SURFACES

136	Adsorption from surface tension	388
137	Verification of Gibbs' formula	391
138	Relative adsorption	394
139	"Liquid" monolayer	397
140	"Gaseous" monolayer	399
141	Two phase monolayer	402

GAS KINETICS

142	Second-order dimerization	404
143	Bimolecular collision theory	407
144	Measurement of $2\text{HI} \rightleftharpoons \text{H}_2 + \text{I}_2$ rate constants	410
145	Collision theory of $2\text{HI} \rightarrow \text{H}_2 + \text{I}_2$	413
146	First-order decomposition	416
147	First-order isomerization of cyclopropane	419
148	Effect of pressure on cyclopropane isomerization	421
149	Para-ortho hydrogen interconversion	426
150	$\text{H}_2 + \text{Br}_2 \rightarrow 2\text{HBr}$ thermal reaction	429
151	$\text{H}_2 + \text{Br}_2 \rightarrow 2\text{HBr}$ photochemical reaction	431
152	Reaction between sodium and ethyl chloride	434
153	Decomposition of ammonia on tungsten surface	436
154	Decomposition of ammonia on platinum surface	438

SOLUTION KINETICS

155	First-order reaction	442
156	Second-order reaction	445
157	Stirred-flow reactor	448
158	Rapid reaction by flow technique	450
159	Reduction of ferric ion by iodide	453
160	Condensation polymerization	457
161	Radical polymerization	459
162	Nature of radicals.	464
163	Primary salt effects	466
164	Secondary salt effects	471
165	Acid-base catalysis	474
166	Determination of hydrogen ion concentration.	477

RADIOACTIVITY

167	Rate of helium production	480
168	Decay period by counting α -particles	483
169	Decay constant from activity	484
170	Decay constant from steady-state composition	488
171	Decay constant from α -particle range	489
