

TABLE OF CONTENTS

Foreword	ix
List of Lecturers	xiii
List of Attendants	xvii
Part I. PHOTOELECTROCHEMISTRY	
J.B. Goodenough Electronic states in ionic solids	3
H. Gerischer Semiconductor electrodes and their interaction with light	39
R. Memming Kinetic aspects in photoelectrochemical solar cells	107
J.B. Goodenough Choosing a photoelectrode	155
J.B. Goodenough Materials engineering: General considerations	175
H. Gerischer Concluding remarks on: Photoelectrochemistry	193

Part II. HOMOGENEOUS PHOTOCATALYSIS

L. Moggi	
Fundamental aspects of photochemistry and photophysics of transition metal complexes	197
M. Grätzel	
Photostorage of solar energy in colloidal semiconductor systems	217
K. Kalyanasundaram	
Redox catalysis in photochemical and photoelectrochemical solar energy conversion systems	239
E. Pelizzetti and E. Pramauro	
Effect of organized assemblies on electron transfer reactions and charge separation processes	271
E. Pelizzetti, E. Borgarello and N. Serpone	
Photoassisted cleavage of hydrogen sulfide with semiconductor particles. The thiosulfate cycle	293
E. Pelizzetti, E. Borgarello and N. Serpone	
Photocatalytic reactions of organic compounds. Hydrogen generation from organics and degradation of wastes	305
J.-F. Reber	
Prospectives of exploitation of photocatalytic and photoelectrochemical processes for solar energy conversion	321
N. Serpone	
Applications of picosecond absorption and emission spectroscopy. The mapping of primary events in photochemistry and photocatalysis	351
E. Pelizzetti	
Concluding remarks on: Homogeneous photocatalysis	373

Part III. HETEROGENEOUS PHOTOCATALYSIS

R.I. Bickley	
Fundamental aspects of the adsorption and the desorption of gases at solid surfaces under illumination	379
G.A. Somorjai	
Adsorption of energy in photocatalytic reactors	389
P. Pichat	
Photocatalytic reactions	425
S.J. Teichner and M. Formenti	
Heterogeneous photocatalysis	457
R.I. Bickley	
Some experimental investigations of photosorption phenomena at the gas-solid interface	491
M. Schiavello and A. Sclafani	
Photocatalytic reactions: an overview on the water splitting and on the dinitrogen reduction	503
R.I. Bickley	
Concluding remarks on: Heterogeneous photocatalysis at the gas/solid interface	521

Part IV. PHOTOREACTORS

P.L. Yue	
Introduction to the modelling and design of photoreactors	527
F. Santarelli	
Radiative transfer in photochemical processes	549
P.L. Yue	
Studies of photoreactions in homogeneous photoreactors	561

P.L. Yue	
Studies of photoreactions in heterogeneous photoreactors	575
L. Rizzuti	
Absorption of light energy in photoreactors	587
V. Augugliaro	
Current problems in the modelling of photochemical reactors	605
P.L. Yue	
Guidelines for photoreactor research	619
INDEX	625
