<i>Preface</i>	xi
<i>Acknowledgements</i>	xii
1 Introduction	1
1.1 Low light level detectors	1
1.2 Photon arrival rates	2
1.3 Photon statistics and noise	6
1.4 The assessment of detector performance	10
References	14
2 The photographic emulsion as a detector	15
2.1 Advantages and disadvantages	15
2.2 The characteristic curve	17
2.3 Factors influencing the characteristic curve	23
2.4 Low intensity reciprocity failure	29
2.5 Latent image formation	32
2.6 Calibration and sensitometry	36
2.7 Signal-to-noise ratio	43
References	50
3 Current photographic techniques in astronomy	51
3.1 Available materials	51
3.2 Hypersensitisation	56
3.3 Processing for uniformity and permanence	65
3.4 Image enhancement by copying	71
References	77
Appendix A	77
Appendix B	78

Contents

4	Image tubes and electronography	80
4.1	Image intensifiers	80
4.2	Electronographic cameras	83
4.3	Recording emulsions for electronography	86
4.4	Performance characteristics	89
4.5	Measurement and calibration	92
4.6	Advantages and disadvantages of electronography	95
4.7	Electronographic observations	97
	References	99
5	Photoconductive detectors	100
5.1	Intrinsic semiconductors	100
5.2	Doped semiconductors	104
5.3	The photoconductive process	106
5.4	The junction diode	109
5.5	Practical photodiode operation	114
	References	118
6	Photoemissive detectors	119
6.1	The photocathode	119
6.2	Photomultiplier tubes	123
6.3	Practical photomultiplier tube operation	127
6.4	Channel electron multipliers	133
	References	136
7	Television-type imaging detectors	137
7.1	Electron beam target readout	137
7.2	Return-beam tubes	140
7.3	Secondary electron conduction tubes	143
7.4	Vidicon and lead oxide vidicon	144
7.5	Silicon target vidicon and SIT	148
7.6	Intensified camera tubes	151
7.7	Typical television-type detector operation	154
7.8	Image-dissector scanner	156
	References	157

Contents

8 Solid state imaging detectors	158
8.1 Charge storage in MOS capacitors	158
8.2 The surface channel CCD	159
8.3 Buried channel CCDs	165
8.4 Charge readout techniques	166
8.5 CCD architectures	170
8.6 Practical CCD operation	173
8.7 Charge injection device	177
8.8 Digicon and Reticon diode arrays	179
References	182
Index	183
