

CONTENTS

Editor's Foreword	xi
INTRODUCTION by GEORGE B. FIELD	3
EVIDENCE FOR DISCORDANT REDSHIFTS by HALTON ARP	15
Distances in the Universe	16
Quasars	19
Evidence for Quasars at Conventional Redshift Distances.	20
Compromise Solutions	24
Evidence for Quasars at Closer Distances	24
Galaxies and Discordant Redshifts	31
The Virgo Cluster.	32
The Coma Cluster	33
Clusters, Groups, and Associations in General.	33
Companions to Nearby Galaxies.	34
Holmberg's Companions of More Distant Galaxies	35
Interacting Doubles in the Neighborhood of Spiral Galaxies.	37
Multiple Interacting Companions	37
Stephan's Quintet	38
Discordant Redshifts in Chains of Galaxies.	41
Discordant Redshift Systems Connected by Luminous Filaments	43
Certain Tight Groupings of Bright Galaxies.	52
Summary	54
References	56
REDSHIFTS AS DISTANCE INDICATORS by JOHN N. BAHCALL	59
Introduction.	61
Predictions of the Usual Interpretation	63
Flashlight Analogy	63
The Hubble Diagram	65
Average Galaxies	69
Mean Redshifts and Dispersion in Redshifts	71
Angular Diameters Versus Redshift.	73
Radio and Optical Redshifts.	77
Summary of Predictions and Further Tests	77
Examples of Alleged Discordant Redshifts.	81
General Remarks.	81
Connecting Filaments	83
Elementary Statistics of Apparent Connections.	88
Stephan's Quartet.	93
Clusters and Groups of Galaxies.	98
NGC 7741 and Its Companion Stars	103

Quasars

Evidence for Cosmological Hypothesis 107
 Quasars and Galaxies 113
 Summary 116
 References 117

RESPONSE TO JOHN N. BAHCALL'S PRESENTATION by HALTON ARP. 123

REPRINTS OF PAPERS SELECTED by JOHN N. BAHCALL 131
