

CONTENTS

<i>Preface</i>	vii
Gas in galaxies <i>W. W. Roberts, Jr.</i>	1
The mass of gas within 500 pc of the galactic centre <i>C. L. Bhat, C. J. Mayer and A. W. Wolfendale</i>	13
Gamma ray estimates of galactic gas contents <i>C. J. Mayer</i>	21
Gas in early-type galaxies <i>E. M. Sadler</i>	27
Predicting star formation in interacting and colliding galaxies; the special case of ring galaxies <i>P. N. Appleton, C. Struck-Marcell and P. A. Foster</i>	33
Ring formation in gaseous disks <i>P. A. Foster</i>	39
The dynamics of the interstellar gas and the kinetics of the galactic magnetic field <i>P. A. H. Seymour</i>	43
Gas in galactic centres <i>M. E. Bailey</i>	49
Wind-driven shells in E/SO galaxies: a research note <i>A. Wilkinson and M. E. Bailey</i>	63
The effect of expanding radio components in Seyfert II nuclei <i>A. Pedlar, S. W. Unger, J. E. Dyson and J. Meaburn</i>	65
Supernova remnants <i>T. W. Hartquist</i>	77
Supernova origin of cosmic rays <i>C. L. Bhat and B. P. Houston</i>	93
Simplified models for supernova remnant evolution using energetic particle hydrodynamics <i>H. J. Völk, L. O'C. Drury and E. Dorfi</i>	101
The outburst of RS Ophiuchi in 1985 <i>M. F. Bode and F. D. Kahn</i>	111
Shocks and cosmic ray acceleration <i>W. I. Axford</i>	119
Structure of cosmic ray modified shocks <i>L. O'C. Drury</i>	131
Time-dependent cosmic ray/gas interactions <i>E. A. Dorfi</i>	137
Non-steady radiative shocks <i>D. E. Innes, J. R. Giddings and S. A. E. G. Falle</i>	143

Numerical gasdynamics	
<i>S. A. E. G. Falle</i>	149
Chemical and physical conditions that favour continuous rather than jump MHD shocks	
<i>D. R. Flower, G. Pineau des Forets and T. W. Hartquist</i>	163
The energetics of nebulae associated with Wolf–Rayet stars	
<i>J. E. Dyson and L. J. Smith</i>	173
Echelle observations of high speed flows in the interstellar medium	
<i>J. Meaburn, J. R. Walsh and C. A. Clayton</i>	189
Gas flow in the barred spiral galaxy NGC 5383	
<i>O. Bienaymé, A. Bosma and E. Athanassoula</i>	205
The Cone Nebula and the infrared source GL989	
<i>N. Brosch and J. M. Greenberg</i>	213
Masers and circumstellar flows	
<i>R. J. Cohen</i>	223
Propagation of radiation damped acoustic waves in stellar atmospheres	
<i>P. Ulmschneider</i>	237
Collapse of an isothermal protostar: the effect of initial and boundary conditions	
<i>R. E. Dentus</i>	243
The jets and discs associated with R and T Cr A	
<i>R. D. Wolstencroft</i>	251
The reconfinement of jets	
<i>M. J. Wilson and S. A. E. G. Falle</i>	259
Herbig–Haro objects	
<i>J. Cantó</i>	267
Optical polarimetry of nebulae with emission line jets	
<i>S. M. Scarrott, R. F. Warren-Smith, P. W. Draper and T. M. Gledhill</i>	281
Radio emission from T Tauri stars and associated structures	
<i>A. Brown</i>	287
The high velocity outflow in Herbig–Haro 7-11	
<i>J. F. Lightfoot and W. M. Glencross</i>	293
Interstellar collimation in the bipolar outflow source G35.2N	
<i>W. R. F. Dent</i>	299
Conference summary	
<i>F. D. Kahn</i>	307
<i>Author index</i>	317
<i>Subject index</i>	327
