Preface

v

Part I. Constants and Conversion Factors

1. Constants and Units	3
1.1 Physical Constants	3
1.2 Astronomical Constants	9
1.3 Conversion Factors	16

Part II. Planets and their Satellites

2. Planet Earth	29
2.1 Physical Parameters and Motions of the Earth	29
2.2 Timescales on Earth.....	33
2.3 Terrestrial Atmosphere	35
2.4 Terrestrial Impact Craters	38
3. The Planets	41
3.1 The Planetary System.....	41
3.2 Physical Parameters of the Planets	43
3.3 Planetary Atmospheres	50
3.4 Planetary Rings	53
4. The Moon	56
4.1 Physical Parameters and Motions of the Moon	56
4.2 Lunar Maria and Craters	59
5. Satellites of the Planets	68
5.1 General Properties of the Satellites.....	68
5.2 Physical Elements for the Principal Satellites.....	73
5.3 Physical Elements for the Small Satellites	74
6. Asteroids and their Debris	75
6.1 General Properties of the Asteroids	75
6.2 Selected Asteroids: Physical and Orbital Elements	78
6.3 Concentrations of Asteroids.....	80

6.4 Asteroid Debris.....	82
6.5 Solar System Abundances of the Elements	84
7. Comets and their Debris	86
7.1 Structural Properties of Comets.....	86
7.2 Origin and Statistics of Comets	88
7.3 Comets of Special Interest	89
7.4 Long Period and Short Period Comets	92
7.5 Cometary Debris	98

Part III. The Stars

8. The Sun	103
8.1 Basic Solar Data	103
8.2 Standard Solar Model	106
8.3 Solar Neutrinos	108
8.4 The Outer Solar Atmosphere	109
9. Basic Stellar Data	113
9.1 Physical Parameters of the Stars	113
9.2 Numerical Relations and Laws	116
9.3 Observed Angular Diameters of Stars	118
9.4 Stellar Masses	120
9.5 Spectral Classification of the Stars	125
9.6 Stellar Mass, Radius, Density and Rotation	132
9.7 Stellar Temperature and Luminosity	136
9.8 Absolute Visual Magnitudes of the Stars	144
9.9 Colors of the Stars	147
10. Bright and Nearby Stars	154
10.1 Named Stars and Constellations	154
10.2 The Nearest and Brightest Stars	161
10.3 Catalogue of 446 Stars Brighter than Apparent Visual Magnitude 4.00.....	168
11. Wolf-Rayet Stars	194
11.1 Basic Data for Wolf-Rayet Stars.....	194
11.2 Catalogue of Wolf-Rayet Stars	209
12. Magnetic Stars	216
12.1 Basic Data for Magnetic Stars	216
12.2 Catalogue of Nondegenerate Magnetic Stars.....	221
13. Stellar Activity	227
13.1 General Properties of Flare Stars	227
13.2 Catalogue of Nearby Flare Stars	232
13.3 Catalogue of RS CVn and BY Dra Binaries — Part I	238
13.4 Catalogue of RS CVn and BY Dra Binaries — Part II	250

Part IV. Star Clusters and Associations

14. Globular Clusters	257
14.1 Basic Data for Globular Clusters	257
14.2 Catalogue of Globular Clusters — Part I.....	263
14.3 Catalogue of Globular Clusters — Part II.....	268
15. Open Clusters	278
15.1 Basic Data for Open Clusters.....	278
15.2 Catalogue of Open Clusters.....	284
16. OB Associations	350
16.1 Basic Data for OB Associations.....	350
16.2 Catalogue of OB Associations	353

Part V. The Stellar Environment

17. Regions of Star Formation	359
17.1 Molecular Clouds and Dust Clouds	359
17.2 T Tauri Stars and Related Objects	375
17.3 Herbig-Haro Objects.....	398
18. Diffuse Emission Nebulae or H II Regions	405
18.1 Basic Data for Emission Nebulae	405
18.2 Emission Nebulae at Optical Wavelengths.....	410
18.3 Emission Nebulae at Radio Wavelengths	422
19. Reflection Nebulae	438
19.1 Basic Data for Reflection Nebulae	438
19.2 Catalogue of Reflection Nebulae	444
20. Planetary Nebulae	462
20.1 Basic Data for Planetary Nebulae.....	462
20.2 Catalogue of Planetary Nebulae — Part I.....	464
20.3 Catalogue of Planetary Nebulae — Part II.....	510

Part VI. Dying Stars

21. White Dwarf Stars	535
21.1 Basic Data for White Dwarf Stars	535
21.2 Catalogue of White Dwarf Stars	546
21.3 Cross-Reference Name Index for White Dwarf Stars.....	578
22. Pulsars	605
22.1 Basic Data for Pulsars.....	605
22.2 Catalogue of Pulsars - Part I	614
22.3 Catalogue of Pulsars - Part II	640

23. Candidate Black Holes	653
23.1 Catalogue of Candidate Black Holes	653

Part VII. Interacting Binary Systems

24. Cataclysmic Binary Systems.....	657
24.1 Basic Data for Cataclysmic Binary Systems.....	657
24.2 Cataclysmic Binaries with Known Periods	665
24.3 Catalogue of Classical Novae	670
24.4 Catalogue of Dwarf Novae	684
25. Symbiotic Stars	690
25.1 Basic Data for Symbiotic Stars	690
25.2 Catalogue of Symbiotic Stars	694

Part VIII. Supernovae Explosions and their Remnants

26. Supernovae	701
26.1 Basic Data for Supernovae.....	701
27. Supernova Remnants	709
27.1 Basic Data for Supernova Remnants	709
27.2 X-Ray Radiation from Supernova Remnants	721
27.3 Catalogue of Galactic Supernova Remnants	725
27.4 Cross-Reference Name Index for Supernova Remnants.....	730

Part IX. High Energy Radiation From Stars

28. X-Ray and Gamma Ray Sources	733
28.1 Compact X-Ray Sources.....	733
28.2 Low-Mass X-Ray Binaries	745
28.3 Gamma Ray Sources	754
29. Appendix	758
29.1 Catalogue of Nearby Stars	758
References	889
Index	919
