<i>Preface</i>	xiii
<i>Introduction</i>	xv

I Earth

1. The Photochemistry of the Early Atmosphere

JOEL S. LEVINE

I. Introduction	3
II. Structure of the Atmosphere	5
III. Formation of the Earth	9
IV. Composition of the Prebiological Atmosphere	12
V. Photochemistry of the Prebiological Atmosphere	15
VI. Photochemistry and Chemical Evolution	31
VII. Photosynthesis, Oxygen, and Ozone	34
VIII. Directions for Future Research	37
References	37

2. The Photochemistry of the Troposphere

T. E. GRAEDEL

I. Historical Perspective	39
II. Chemical Perspective	43
III. The Role of Meteorology	45
IV. Atmospheric Oxidizers and Their Sources	49
V. Photochemistry in the Troposphere	50
VI. Chemistry in Atmospheric Water Droplets	58
VII. Aerosol Chemistry	61

VIII.	Concentration of Tropospheric Trace Species	62
IX.	Chemical Budgets in the Troposphere	64
X.	Consequences of Tropospheric Photochemistry	69
XI.	Future Study	74
	References	74

3. The Photochemistry of the Stratosphere

RICHARD P. TURCO

I.	Introduction	77
II.	Composition and Chemical Families	78
III.	Photochemical Data Base	83
IV.	The Chapman Ozone Cycle	86
V.	Water Vapor and the Odd-Hydrogen Cycle	89
VI.	Nitrous Oxide and the Odd-Nitrogen Cycle	93
VII.	Methane–Hydrocarbon Photochemistry	99
VIII.	The Chlorine Cycle	102
IX.	The Sulfur Cycle	106
X.	Heterogeneous Chemistry	109
XI.	Additional Photochemistry	112
XII.	Ozone Perturbations	115
XIII.	Summary and Research Requirements	123
	References	125

4. Photochemistry, Composition, and Climate

WILLIAM R. KUHN

I.	Introduction	129
II.	Radiative Climate Modeling of the Earth	132
III.	Chemical Constituents	145
IV.	Impact of Anthropogenic Activities on Climate	150
V.	Projections for Future Research	160
	References	162

5. The Photochemistry of the Upper Atmosphere

DOUGLAS G. TORR

I.	Composition	165
II.	Photochemistry	171
III.	Measurements	239
	Appendix	245
	References	276

II**The Other Planets****6. The Photochemistry of the Atmosphere of Venus**

RONALD G. PRINN

I. Introduction	281
II. Atmospheric Structure, Circulation, and Composition	290
III. Chemistry and Photochemistry	304
IV. Atmospheric Origin and Evolution	327
References	331

7. The Photochemistry of the Atmosphere of Mars

CHARLES A. BARTH

I. Introduction	337
II. The Astronomical Setting	338
III. Space Exploration	340
IV. Composition and Structure of the Atmosphere	345
V. Photochemistry of the Lower and Upper Atmosphere	354
VI. Escape of Gases from the Mars Atmosphere	385
VII. Climatic Change on Mars	388
VIII. Directions for Future Research	390
References	390

8. The Photochemistry of the Atmospheres of the Outer Planets and Their Satellites

DARRELL F. STROBEL

I. Introduction	394
II. Observations	401
III. Composition and Thermal Structure	402
IV. Some Basic Principles	407
V. Photochemistry of the Outer Planets	409
VI. Photochemistry of Titan	425
VII. Photochemistry of Io	431
VIII. Directions for Future Research	432
References	433

III**Comets****9. The Photochemistry of Comets**

WALTER F. HUEBNER

I. Introduction	438
II. Classification	438

III.	Composition and Structure	442
IV.	Origin of Comets	452
V.	Measurements	454
VI.	Photochemistry of the Coma	456
VII.	Halley's Comet and Other Unusual Comets	473
VIII.	Directions for Future Research	479
	References	480

IV

Appendixes

<i>Appendix I.</i>	<i>Unattenuated Solar Photo Rate Coefficients at 1 AU Heliocentric Distance</i>	
--------------------	---	--

485

<i>Appendix II.</i>	<i>Chemical Reaction Rates</i>	
---------------------	--------------------------------	--

497

<i>Index</i>	
--------------	--

509
