

MAGNETOTAIL PHYSICS

Table of Contents

I. Introduction

Road Map to Magnetotail Domains	A. T. Y. Lui	3
Magnetotail Research: The Early Years	N. F. Ness	11

II. Magnetotail Configuration

Structure of the Geomagnetic Tail	D. H. Fairfield	23
Dynamical Features of the Plasma-Sheet Ion Composition, Density, and Energy	W. Lennartsson	35
Auroral Zone Field-Aligned Currents Observed in the Magnetotail and at Intermediate Altitudes: An ISEE Perspective	R. C. Elphic T. J. Kelly H. E. Spence R. J. Walker C. T. Russell M. Sugiura	41
Bidirectional Electron Anisotropies in the Distant Tail: ISEE 3 Observations of Polar Rain	D. N. Baker S. J. Bame W. C. Feldman J. T. Gosling R. D. Zwickl J. A. Slavin E. J. Smith	47
Magnetic Configuration of the Distant Plasma Sheet: ISEE 3 Observations	J. A. Slavin P. W. Daly E. J. Smith T. R. Sanderson K.-P. Wenzel R. P. Lepping H. W. Kroehl	59
Neutral-Sheet Crossings in the Distant Magnetotail	W. J. Heikkila	65
ISEE 3 Magnetopause Crossings: Evidence for the Kelvin-Helmholtz Instability	D. G. Sibeck J. A. Slavin E. J. Smith	73
A Theoretical Model of Convection in the Near-Earth Plasma Sheet	G. Atkinson	77

Interpretation of the Northward B_z (NBZ) Birkeland Current System and Polar Cap Convection Patterns in Terms of the Impulsive Penetration Model	J. Lemaire	83
--	------------	----

The Influence of the IMF B_y Component on the Earth's Magneto-Hydrostatic Magnetotail	G.-H. Voigt R. V. Hilmer	91
---	-----------------------------	----

III. Fluid Aspects of Magnetotail Dynamics

Observations on the Fluid Aspects of Magnetotail Dynamics	A. T. Y. Lui	101
---	--------------	-----

Substorm-Associated Lower Hybrid Waves in the Plasma Sheet Observed by ISEE 1	C. A. Cattell F. S. Mozer	119
---	------------------------------	-----

Plasma Flows Nears the Neutral Sheet of the Magnetotail	C. Y. Huang L. A. Frank T. E. Eastman	127
---	---	-----

Plasma and Magnetic Field Variations in the Distant Magnetotail Associated with Near-Earth Substorm Effects	D. N. Baker S. J. Bame D. J. McComas R. D. Zwickl J. A. Slavin E. J. Smith	137
---	---	-----

A Case Study of the Large-Scale Response of the Magnetosphere to a Southward Turning of the IMF	J. A. Sauvad J. P. Treilhou A. Saint-Marc J. Dandouras H. Rème A. Korth G. Kremser G. K. Parks A. N. Zaitzev V. Petrov L. Lazutine R. Pellinen	143
---	---	-----

An Interpretation of Magnetosonic Waves in the Boundary Regions of the Plasma Sheet as Seen by the ISEE 3 Spacecraft	P. R. Smith K. I. Hopcraft N. Murphy	151
--	--	-----

An Evaluation of the Total Magnetospheric Energy Output Parameter, U_T	R. D. Zwickl L. F. Bargatz D. N. Baker C. R. Clauer R. L. McPherron	155
--	---	-----

Comments on “An Evaluation of the Total Magnetospheric Energy Output Parameter, U_T ” by R. D. Zwickl, L. F. Bargatze, D. N. Baker, C. R. Clauer, and R. L. McPherron	S.-I. Akasofu C. Olmsted	161
Superposed Epoch Analysis of Magnetospheric Substorms Using Solar Wind, Auroral Zone, and Geostationary Orbit Datasets	L. F. Bargatze D. N. Baker R. L. McPherron	163
The Kelvin-Holmholz Instability and Its Role in the Generation of the Electric Currents Associated with Ps 6 and Westward Traveling Surges	G. Rostoker	169
MHD Aspects of Magnetotail Dynamics	F. V. Coroniti	175
A Magnetohydrodynamic Simulation of Reconnection in the Magnetotail During Intervals with Southward Interplanetary Magnetic Field	R. J. Walker T. Ogino M. Ashour-Abdalla	183
Multiple X -Line Reconnection in the Earth’s Magnetosphere	L. C. Lee Z. F. Fu S.-I. Akasofu	191
Auroral Arcs and Tearing-Mode Instabilities in the Magnetotail	D. W. Swift	199
Remarks on the MHD Problem of Generic Magnetospheres and Magnetotails	D. Montgomery	203

IV. Kinetic Aspects of Magnetotail Dynamics

Kinetic Aspects of Magnetotail Dynamics—Observations	D. G. Mitchell	207
A Statistical Study of Ion Pitch-Angle Distributions	D. G. Sibeck R. W. McEntire A. T. Y. Lui S. M. Krimigis	225
Acceleration of Ions of Ionospheric Origin in the Plasma Sheet During Substorm Activity	E. Möbius M. Scholer B. Klecker D. Hovestadt G. Gloeckler F. M. Ipavich	231
Distinguishing Among Electron Injection Types	J. Feynman	235
Composition and Velocity of Ions Streaming in the Plasma Mantle and in the Lobe	S. Orsini M. Candidi H. Balsiger	239

Energetic Ion and Electron Beams at the Plasma-Sheet Boundary in the Distant Tail	M. Scholer B. Klecker D. Hovestadt G. Gloeckler F. M. Ipavich A. B. Galvin D. N. Baker B. T. Tsurutani	245
Plasmoid-Associated Energetic Ion Bursts in the Distant Geomagnetic Tail	I. G. Richardson S. W. H. Cowley	251
General Discussion on Magnetotail Kinetics	M. Scholer	257
Measurement of Magnetic Helicity During the Disruption of a Neutral Current Sheet	W. Gekelman J. M. Urrutia R. L. Stenzel	261
Highlights on Kinetic Aspects of Magnetotail Dynamics	C. Y. Huang	275
Kinetic Aspects of Tail Dynamics: Theory and Simulation	T. W. Speiser	277
The “Convection Surge” Mechanism of Ion Acceleration During Substorms	B. H. Mauk	287
Model for the Geomagnetic Ion Spectrometer in the Magnetotail Lobes	J. L. Horwitz	291
Generation of Broadband Noise in the Magnetotail	P. B. Dusenbery L. R. Lyons	295
On the Generation of Broadband Electrostatic Noise	M. Ashour-Abdalla H. Okuda	305
Simulation of Electrostatic Turbulence in the Plasma-Sheet Boundary Layer with Electron Currents and Ion Beams	K.-I. Nishikawa L. A. Frank T. E. Eastman C. Y. Huang	313
Non-Maxwellian Free-Energy Generation in the Magnetotail Due to Chaotic Particle Motion	J. Chen P. J. Palmadesso	321
Magnetic Reconnection in a Non-Maxwellian Neutral Sheet	J. Chen P. J. Palmadesso Y. C. Lee	327
A Particle Simulation of Flux Transfer Events at the Earth’s Magnetopause	D. Q. Ding L. C. Lee Z. F. Fu	331

V. Active Diagnosis of the Geomagnetotail

Tail Exploration and Tail Formation with Artificial Plasma Clouds	G. Haerendel	337
The March 21, 1985 AMPTE Barium Magnetotail Release: Imaging and Doppler Imaging Observations from the NASA Airborne Observatory	D. Rees	353
Highlights on “Active Diagnosis of the Geomagnetotail”	S. M. Krimigis	363

VI. Magnetotails of Celestial Objects

Cometary Plasma Tails and the Coma Source Region	W.-H. Ip	367
Magnetic Field and Particle Pressure in the Plasma Sheet of Jupiter	L. J. Lanzerotti C. G. Maclennan J. N. Broughton D. Venkatesan R. P. Lepping	383
The Average Configuration of the Induced Venus Magnetotail	D. J. McComas H. E. Spence C. T. Russell	389
Dynamic Substorm Injections: Similar Magnetospheric Phenomena at Earth and Mercury	S. P. Christon J. Feynman J. A. Slavin	393

VII. Dialogs on Controversial Topics

Dialog on Injection-Boundary versus Alfvén-Layer Models	M. G. Kivelson J. Feynman B. H. Mauk R. A. Wolf	403
Dialog on the Relative Roles of Reconnection and the “Viscous” Interaction in Providing Solar-Wind Energy to the Magnetosphere	G. Rostoker D. N. Baker J. Lemaire V. Vasyliunas	409
Dialog on the Phenomenological Model of Substorms in the Magnetotail	K. Schindler T. E. Eastman W. J. Heikkila L. C. Lee R. P. Lepping L. R. Lyons R. L. McPherron J. A. Slavin	415

VIII. Summary

Concluding Remarks	S.-I. Akasofu	429
