| 1. | THE LUNAR SURFACE: INTRODUCTION | 1 |
| | <i>Frederick E. Wright, F. H. Wright, and Helen Wright</i> | |
| | 1. Conditions at the Moon's Surface | 3 |
| | 2. Lunar Radiation | 4 |
| | 2.1. Infrared and Microwave Emission | 4 |
| | 3. Reflected and Scattered Light | 6 |
| | 3.1. Photometry | 7 |
| | 3.2. Polarization | 8 |
| | 4. Surface Features | 16 |
| | 4.1. Mapping the Moon | 18 |
| | 4.2. Design for a Topographic Map | 20 |
| | 5. Craters—Statistical Studies | 25 |
| | 6. Maria | 32 |
| | 7. Mountain Ranges and Isolated Mountains | 33 |
| | 8. Rilles | 34 |
| | 9. Rays | 35 |
| | 10. Lunar Ballistics | 36 |
| | 11. The Impact Hypothesis | 43 |
| | References | 47 |
| 2. | SELENOGRAPHY | 57 |
| | <i>D. W. G. Arthur</i> | |
| | 1. Introduction | 57 |
| | 2. Definitions and Notations | 58 |
| | 3. The Optical Librations | 58 |
| | 4. Elements of the Mean Lunar Equator | 60 |
| | 5. Rigorous Formulae for the Optical Librations | 61 |
| | 6. Approximate Formulae for the Optical Librations | 63 |
| | 7. Conversion of Geocentric to Topocentric Librations | 65 |
| | 8. The Moon's Heliocentric Co-ordinates | 69 |

| | |
|---|-----------|
| 9. The Selenographic Co-ordinates of the Sun | 70 |
| 10. The Position Angle of the Lunar Terminator | 71 |
| 11. The Effects of Refraction on the Moon's Disk | 73 |
| 12. The Moon's Topocentric Semidiameter | 74 |
| 13. Selenographic Co-ordinates | 76 |
| 14. The Conical Effects | 77 |
| 15. The Reduction of Micrometric Measures for Position | 79 |
| 16. Selenographic Positions from Photographs | 82 |
| 17. Relative Lunar Altitudes from Shadow Measurements | 84 |
| 18. The Determination of Crater Diameters | 88 |
| References | 89 |
| | |
| 3. INVESTIGATION OF THE FAR SIDE OF THE MOON WITH THE AID OF ROCKETS | 90 |
| <i>Y. N. Lipskiy</i> | |
| 1. Introduction | 90 |
| 2. The Automatic Interplanetary Station | 91 |
| 2.1. Temperature Control | 91 |
| 2.2. Directional Control and Orientation | 91 |
| 2.3. The Choice of a Trajectory | 93 |
| 2.31. Optimum Photographic Conditions | 93 |
| 2.32. Inclusion of Previously Known Features | 94 |
| 3. Photographs of the Moon and Their Transmission to the Earth | 97 |
| 3.1. Photography | 97 |
| 3.2. Transmission | 97 |
| 4. Processing of the Material on Earth | 98 |
| 4.1. Basic Difficulties | 98 |
| 4.2. Enhancement of Details | 98 |
| 4.21. Superposition of Negatives | 98 |
| 4.22. The Process of Photographic Masking | 99 |
| 4.23. The Method of Photographic Sections | 101 |
| 5. The Lunar Features | 103 |
| 5.1. Previously Known Features | 103 |
| 5.2. General Discussion of Details | 104 |
| 5.3. Categories of Probable Reliability | 106 |
| 5.4. Individual Objects | 107 |
| 5.41. Mare Humboldtianum | 107 |
| 5.42. Mare Marginis | 107 |
| 5.43. Mare Australe | 110 |
| 5.44. Mare Muscoviense | 110 |
| 5.45. Crater 705 | 111 |

| | |
|--|------------|
| 5.46. Crater 725 | 111 |
| 5.47. Crater Tsiolkovsky | 111 |
| 5.48. The Soviet Mountains | 112 |
| 5.49. Crater Giordano Bruno | 112 |
| 6. Comparison between the Two Hemispheres of the Moon | 113 |
| 6.1. Depressions on the Surface | 113 |
| 6.2. Possible Effects of Lunar Eclipses on the Topography of the Visible Side | 113 |
| 6.3. Further Inferences | 114 |
| 7. Summary of the Results | 114 |
| Appendix: Schematic Map of the Far Side of the Moon | 115 |
| <i>I. I. Breydo and D. E. Shchegolev</i> | |
| References | 122 |
| 4. EVALUATION OF THE SOVIET PHOTOGRAPHS OF THE MOON'S FAR SIDE | 123 |
| <i>E. A. Whitaker</i> | |
| 1. Introduction | 123 |
| 2. Photographic Procedures | 123 |
| 3. Comparison with Earth-based Photographs | 124 |
| 4. Conclusion | 127 |
| References | 128 |
| 5. THE SCATTERING PROPERTIES OF THE LUNAR SURFACE AT RADIO WAVE LENGTHS | 129 |
| <i>J. V. Evans and G. H. Pettengill</i> | |
| 1. Introduction | 129 |
| 2. The Radio Albedo of the Moon | 129 |
| 3. Fading Characteristics | 133 |
| 4. Distribution of Echo Power with Range | 137 |
| 5. Polarization Measurements | 141 |
| 6. The Correlation between Two Close-spaced Frequencies | 142 |
| 7. Coherent Pulse Systems | 144 |
| 8. Summary of the Experimental Results | 148 |
| 9. Models Consistent with the Scattering Properties of the Moon | 149 |
| 9.1. Hargreaves' Model | 149 |
| 9.2. Hagfors' Model | 151 |
| 9.3. Daniels' Model | 152 |

| | |
|--|------------|
| 10. Summary of the Theoretical Work | 158 |
| 11. Conclusion | 158 |

| | |
| 6. METEORITE DISTRIBUTION ON THE EARTH | 162 |
| <i>H. H. Nininger</i> | |
| 1. The Apparent Distribution | 162 |
| 2. Witnessed Falls | 163 |
| 3. Occurrence of Meteorites in Early Formations | 164 |
| 4. Distribution Patterns of Meteorite Showers | 166 |
| 5. The Cordilleran Concentration | 170 |
| 6. Other Evidence for Meteorite Swarms | 172 |
| 7. Meteorite Craters | 175 |
| 7.1. Intragroup Distribution | 176 |
| 7.2. The Dalganga Crater (Australia) | 177 |
| 7.3. Fossil Meteorite Craters | 177 |
| 8. The Distribution of Tektites | 178 |
| References | 180 |
| | |
| 7. METEORITE CRATERS ON THE EARTH'S SURFACE | 183 |
| <i>E. L. Krinov</i> | |
| 1. Introduction | 183 |
| 2. Theoretical Studies | 183 |
| 3. Types of Craters | 185 |
| 3.1. Explosion Craters | 185 |
| 3.2. Impact Craters | 185 |
| 4. Authentic Meteorite Craters | 192 |
| 4.1. The Odessa Crater | 193 |
| 4.2. The Henbury Craters | 194 |
| 4.3. The Wabar Craters, Saudi Arabia | 196 |
| 4.4. The Haviland Crater | 197 |
| 4.5. Campo del Cielo, Argentina | 198 |
| 4.6. The Kaalijarv Craters, Estonia | 198 |
| 4.7. Boxhole, Central Australia | 201 |
| 4.8. Dalganga, Australia | 203 |
| 4.9. Wolf Creek, Western Australia | 203 |
| 4.10. The Aouelloul Crater, Chinguetti, Mauretania | 203 |
| 4.11. The Ungava-Quebec (Chubb) Crater | 204 |

5. Probable Meteorite Craters 204
 5.1. The Chinge Site, U.S.S.R. 205
 5.2. Craters Found by Aerial Survey 205
 References 205

8. THE TUNGUSKA AND SIKHOTE-ALIN METEORITES 208

E. L. Krinov

1. Introduction 208
 2. The Tunguska Meteorite 208
 2.1. Phenomena Accompanying the Fall 209
 2.2. Instrumental Records 210
 2.3. Energy of the Explosion 212
 2.4. Brightness of the Night Sky after the Fall 212
 2.5. The Tunguska Expeditions 213
 2.51. Observations at the Site (1927) 213
 2.52. Observations at the Site (1928, 1929-1930) 214
 2.53. Aerial Survey (1938-1939) 215
 2.6. Interpretation of the Data 215
 3. The Sikhote-Alin Meteorite 218
 3.1. Phenomena Accompanying the Fall 218
 3.2. The Sikhote-Alin Expeditions 218
 3.3. Interpretation of the Data 219
 3.4. Conclusions 226
 References 232

9. FOSSIL METEORITE CRATERS 235

C. S. Beals, M. J. S. Innes, and J. A. Rottenberg

1. Introduction 235
 2. Theory of Crater Formation 238
 3. Three-dimensional Finite-Amplitude Waves 240
 4. Hypothetical Types of Remnant Fossil Crater Structures 244
 5. The Search on Aerial Photographs 246
 6. The Brent Crater 247
 6.1. Geophysical Investigations 251
 6.11. Gravity Measurements 251
 6.12. Seismic Investigation 254
 6.13. Magnetic Investigation 255
 6.14. Diamond-drilling Program 258
 7. The Holleford Crater 261
 7.1. Geophysical Results 262
 7.11. Gravity Measurements 262
