

## TABLE OF CONTENTS

*Proceedings of the Alexander von Humboldt Colloquium on Celestial Mechanics*

### LONG TERM EVOLUTION OF PLANETARY SYSTEMS

PREFACE

ix

#### SESSION ON PLANETARY DYNAMICS

*(Chairman: J. Henrard)*

A. MILANI and A. M. NOBILI / Integration Error over Very Long Time Spans	1
C. WILLIAMS / Alternative Representation of Planetary Perturbations (abstract only)	35
J. LASKAL and J. L. SIMON / Fitting a Line to a Sine	37
D. BENEST / Stable Planetary Orbits Around One Component in Nearby Binary Stars	47
P. K. SEIDELMANN and R. S. HARRINGTON / Planet X – The Current Status	55

#### SESSION ON RESONANCE PROBLEM

*(Chairman: J. Schubart)*

S. FERRAZ-MELLO / On Resonance	69
A. LEMAITRE and J. HENRARD / The 3/2 Resonance	91
J. HENRARD and A. de VLEESCHAUWER / Sweeping Through a Second Order Resonance	99
Ch. FROESCHLÉ and H. SCHOLL / Secular Resonances: New Results	113
P. J. MESSAGE / Normal Co-Ordinates and Asymptotic Expansions in Resonance Cases in Celestial Mechanics	119
A. H. JUPP / The Critical Inclination Problem: 30 Years of Progress	127
V. SZEBEHELY / Limits of Predictability of Gravitational Systems	139

#### SESSION ON GENERAL DYNAMICAL SYSTEMS

*(Chairman: R. Dvorak)*

G. CONTOPOULOS / Short and Long Period Orbits	147
E. KEIL / Stability of Particle Orbits	163
C. MARCAL and F. RANNOU-MONTIGNY / A Small Example of Arnold Diffusion	177

W. NEUTSCH and J. KALLRATH / Area-preserving Poincaré Mappings of the Unit Disk	185
D. L. RICHARDSON and T. J. KELLY / Two-Body Motion in the Post-Newtonian Approximation	193
P. STUMPF / The General Kepler Equation and Its Solutions	211
J. HAGEL / Integration Theory for the Restricted Three-Body Problem with Application to P-Type Orbits	223
H. EICHHORN / Physical Time and Astronomical "Time"	237

### SESSION ON COMETS AND ASTEROIDS

(*Chairman: V. Szebehely*)

H. RICKMAN and C. FROESCHLÉ / Cometary Dynamics	243
C. FROESCHLÉ and H. RICKMAN / Monte Carlo Modelling of Cometary Dynamics	265
G. HAHN and C. I. LAGERKVIST / Orbital Evolution Studies of Planet-Crossing Asteroids	285
B. ÉRDI / Long Periodic Perturbations of Trojan Asteroids	303
J. SCHUBART / Resonant Asteroids Between the Main Belt and Jupiter's Orbit	309
A. CARUSI, L. KRESÁK, E. PEROZZI and G. B. VALSECCHI / On the Past Orbital History of Comet P/Halley	319
R. DVORAK and J. KRIBBEL / Long Term Evolution of Comet Halley's Orbit (abstract)	323
C. FROESCHLÉ and R. GONCZI / On the Stochasticity of Halley Like Comets	325

### SESSION ON SATELLITES

(*Chairman: S. Ferraz-Mello*)

L. DURIEZ / Long-Term Evolution of the Orbits of Natural Satellites	331
M. MOONS, F. DELHASE and E. DEPAEPE / Elliptical Hill's Problem (Large and Small Impact Parameters)	349
M. KARCH and R. DVORAK / New Results on the Possible Chaotic Motion of Enceladus	361

### SESSION ON PERIODIC ORBITS

(*Chairman: C. Froeschlé*)

J. D. HADJIDEMETRIOU / Periodic Orbits of the Planetary Type and Their Stability	371
J. KRIBBEL and R. DVORAK / Stability of Periodic Resonance-Orbits in the Elliptic Restricted 3-Body Problem	391
J. KALLRATH / Bounded Orbits in the Elliptic Restricted Three-Body Problem	399

## REPORTS ON EVENING DISCUSSIONS

P. K. SEIDELMANN and C. A. WILLIAMS / Discussion of Current Status of Planet X	409
H. RICKMAN / Relation Between Small Bodies: Discussion	413
H. EICHHORN / Predictability in Dynamical Systems	417
Call for Papers	421
