

VI.

TABLE OF CONTENTS

	<u>Page</u>
DENSITY, VELOCITY, AND TEMPERATURE PROFILES FOR THE EXTENDED ENVELOPE MODEL OF TYPE I SUPERNOVAE Gordon Lasher	1
THE LIGHT CURVE OF TYPE I SUPERNOVAE S.A. Colgate, Albert G. Petschek, & John T. Kriese	7
SUPERNOVA MODELS AND LIGHT CURVES Thomas A. Weaver & S.E. Woosley	15
TYPE I SUPERNOVAE: AN OBSERVER'S VIEW Robert P. Kirshner	33
SYNTHETIC SPECTRA OF SUPERNOVAE David Branch	39
THE EXCITATION OF SPECTRA IN THE ENVELOPES OF SUPERNOVAE AT LATE TIMES BY THE DEPOSITION OF POSITRONS AND γ -RAYS Roland E. Meyerott	49
RECENT ADVANCES IN CHARGED PARTICLE ENERGY DEPOSITION AND APPLICATIONS TO SUPERNOVA SPECTRA A.E.S. Green	75
CHARGE AND ENERGY TRANSFER IN HEAVY PARTICLE COLLISIONS R.E. Olson	95
ENERGY LEVELS, WAVELENGTHS AND TRANSITION PROBABILITIES FOR THE FIRST FIVE SPECTRA OF Fe, Co AND Ni W.L. Wiese	103
EXCITATION AND IONIZATION OF MODERATELY HEAVY IONS R.H. Garstang	119
THE OPACITY OF AN EXPANDING MEDIUM Alan H. Karp	125

VII.

DIELECTRONIC RECOMBINATION, IONIZATION EQUILIBRIUM, AND RADIATIVE EMISSION FOR ASTROPHYSICALLY ABUNDANT ELEMENTS V.L. Jacobs & J. Davis	139
PHOTOIONIZATION CROSS SECTIONS CALCULATED BY MANY BODY THEORY Hugh P. Kelly	145
SEMIEMPRICAL CALCULATION OF gf VALUES Robert L. Kurucz	163
REPORTS OF WORKSHOP WORKING GROUPS - INTRODUCTION	167
REQUIREMENTS FOR FUTURE SN OBSERVATIONS: γ -RAY, X-RAY, UV, VISIBLE, IR (Workshop A) E. Margaret Burbidge	168
SPECTROSCOPIC DATA NEEDS FOR THE FIRST FIVE SPECTRA OF Fe, Co, AND Ni (Workshop B) W.L. Wiese	171
RECOMBINATION RATES AND RECOMBINATION SPECTRA (Workshop C) V.L. Jacobs	172
ATOMIC PHYSICS AND SPECTROSCOPIC DATA NEEDS FOR IMPROVED HYDRO- DYNAMIC PREDICTIONS OF COMPOSITION, TEMPERATURES, AND DENSITIES OF SN ENVELOPES (Workshop D) Roger A. Chevalier	173
