

## CONTENTS

<b>Foreword</b>	vii
<b>E.P.J. Van den Heuvel</b>	
Stellar Evolution and the Formation of Neutron Stars	
in Binary Systems	1
<b>N. Panagia</b>	
Observations of Supernovae	33
<b>C. Fransson</b>	
The Dynamics of Supernova Envelopes	51
<b>W. Hillebrandt</b>	
Stellar Collapse and Supernova Explosions	73
<b>V. Trimble</b>	
White Dwarfs vs. Neutron Stars: Properties, Constraints,	
and Analogies	105
<b>A.G. Lyne</b>	
Observations of Pulsars	121
<b>M.A. Ruderman</b>	
Energetic Radiation from Magnetized Neutron Stars	145
<b>D. Pines</b>	
Neutron Stars as Cosmic Hadron Physics Laboratories	193
<b>L. Woltjer</b>	
Recent Developments on the Crab Nebula	209
<b>K.W. Weiler</b>	
Radio Supernovae	223
<b>D. Bhattacharya and G. Srinivasan</b>	
On the Association between Supernova Remnants and Pulsars	235
<b>D.J. Helfand and R.H. Becker</b>	
The Progenitors and Products of Supernovae	243

M. Salvati	
Plerions in Theory and in Practice	261
V. Radhakrishnan and C.S. Shukre	
The Binary Origin of Pulsar Velocities	271
M.J. Rees	
Black Holes in our Galaxy	279
G.F. Bignami	
Gamma-Ray Sources in our Galaxy	297
K. Hurley	
Cosmic Gamma Ray Bursts	317
C.J. Cesarsky	
Galactic Cosmic Rays: Propagation and Origin	331
M.A. Alpar	
Quasi Periodic Oscillations in Galactic Bulge Sources: Information on the Boundary Layer from Power Spectra	359
J. Truemper	
The 35-Day Cycle of Her X-1	367
