

TABLE OF CONTENTS

INTRODUCTION

v

PART I / COLLISIONAL SYSTEMS

A. Analytic Treatments

I. H. GILBERT / Collisional Processes in Stellar Systems	5
A. J. KALNAJS / Polarization Clouds and Dynamical Friction	13
W. TSCHARNUTER / A Certain Discontinuous Markov Process in Stellar Dynamics	18
G. B. RYBICKI / Relaxation Times in Strictly Disk Systems	22

B. Numerical Experiments

S. J. AARSETH / Numerical Experiments on the N -Body Problem	29
M. HÉNON / Monte Carlo Models of Star Clusters	44
R. B. LARSON / A Fluid-Dynamical Method for Computing the Evolution of Star Clusters	60
R. WIELEN / On the Lifetimes of Galactic Clusters	62
P. BOUVIER and G. JANIN / Disruption of Star Clusters through Passing Interstellar Clouds Investigated by Numerical Experiments	71
A. HAYLI / Numerical Experiments on the Escape from Non-Isolated Clusters and the Formation of Multiple Stars	73
S. J. AARSETH / Binary Evolution in Stellar Systems	88
C. CRUZ-GONZÁLEZ and A. POVEDA / On the Dissolution Time of a Class of Binary Systems	99
C. ALLEN and A. POVEDA / On the Reproducibility of Run-Away Stars Formed in Collapsing Clusters	114
R. H. MILLER / Numerical Experiments on Pair Correlations and on ‘Thermodynamics’	124
M. LECAR and C. CRUZ-GONZÁLEZ / A Numerical Experiment on Relaxation Times in Stellar Dynamics	131
V. SZEBEHELY and D. G. BETTIS / Recent Developments of Integrating the Gravitational Problem of N -Bodies	136
D. C. HEGGIE / A Multi-Particle Regularisation Technique	148
P. E. NACOZY / The Use of Integrals in Numerical Integrations of the N -Body Problem	153

PART II / COLLISIONLESS SYSTEMS**A. Analytic Treatments**

G. CONTOPoulos / Collisionless Stellar Dynamics	169
C. C. LIN / On the Origin and Permanence of Galactic Spirals	179
R. M. KULSRUD, J. W. K. MARK, and A. CARUSO / The Hose-Pipe Instability in Stellar Systems	180
S. GOLDSTEIN / On the Stability of an Encounterless Self-Gravitating Constant Density System	184
G. B. RYBICKI / Exact Statistical Mechanics of a One-Dimensional Self-Gravitating System	194

B. Numerical Experiments

R. H. MILLER / Numerical Experiments in Collisionless Systems	213
F. HOHL / Dynamics of Plane Stellar Systems	231
W. J. QUIRK / Numerical Experiments in Spiral Structure	250
C. FROESCHLE / On the Number of Isolating Integrals in Systems with Three Degrees of Freedom	254
M. LECAR and L. COHEN / Numerical Experiments on Lynden-Bell's Statistics	262
S. CUPERMAN, A. HARTEN, and M. LECAR / A Phase-Space Boundary Integration of the Vlasov Equation for Collisionless One-Dimensional Stellar Systems	276
S. CUPERMAN, A. HARTEN, and M. LECAR / The Collective Relaxation of Two-Phase-Space-Density Collisionless One-Dimensional Selfgravitating Systems	290
G. JANIN / Numerical Experiments with a One-Dimensional Gravitational System by an Euler-Type Method (Summary)	311
F. NAHON / <i>N</i> -Body Problem and Gas Dynamics in One Dimension (Abstract)	312

PART III / NUMERICAL EXPERIMENTS AND ANALYTICAL TREATMENTS IN PLASMA PHYSICS

J. M. DAWSON / Computer Simulation of Plasmas	315
R. M. KULSRUD / Enhancement of Relaxation Processes by Collective Effects	337
M. R. FEIX, J. P. DOREMUS, and G. BAUMANN / Stability Properties for Encounterless Self-Gravitational Stellar Gas and Plasma	347

PART IV / SUMMARY OF THE COLLOQUIUM**PART V / APPENDIX: METHODS OF COMPUTER SIMULATION OF THE GRAVITATIONAL *N*-BODY PROBLEM**

S. J. AARSETH / Direct Integration Methods of the <i>N</i> -Body Problem	373
D. G. BETTIS and V. SZEBEHELY / Treatment of Close Approaches in the Numerical Integration of the Gravitational Problem of <i>N</i> Bodies	388

M. HÉNON / The Monte Carlo Method	406
R. B. LARSON / The Fluid-Dynamical Method	423
G. JANIN / The Model of Spherical Concentric Shells	428
F. HOHL / Integration Methods where Force is Obtained from the Smoothed Gravitational Field	431
