

TABLE OF CONTENTS

Preface	vii
F. W. STECKER / A New View of Baryon Symmetric Cosmology Based on Grand Unified Theories	1
J. D. BARROW / Cosmology and Particle Physics	21
F. R. KLINKHAMER / Breaking of Gauge Symmetries in the Cooling Universe	39
H. FRITZSCH / Particle Physics Aspects in Cosmology	63
D. W. SCIAMA / Massive Neutrinos and Ultra-Violet Astronomy	75
R. PENROSE / Time-Asymmetry, Cosmological Uniformity and Space-Time Singularities	87
P. KIRÁLY / Antimatter in Cosmic Rays	89
M. ROWAN-ROBINSON and P. TARBET / Population III and the Microwave Background	101
D. H. MARTIN / Observational Aspects of the Microwave Cosmic Background Spectrum	119
J. SILK / The Cosmic Microwave Background Radiation as a Probe of the Large-Scale Structure of the Universe	145
J. WDOWCZYK / The Cosmic Ray Origin Problem	161
R. C. HENRY / Cosmic Far-Ultraviolet Background Radiation	177
K. A. POUNDS / Prospects for X-Ray Observations of Cosmological Significance	189
G. ZAMORANI / The Origin of the X-Ray Background	203
R. SCHLICKEISER / Relativistic Electrons in Galaxies and Their Nonthermal Radiation from Radio to Gamma Radiation	215
A. W. WOLFENDALE / Cosmic Gamma Rays	233
W. H. McCREA / Origin of Stars and Galaxies	239
M. J. REES and A. KASHLINSKY / Galaxy Formation, Clustering and the "Hidden Mass"	259
M. G. SMITH / Quasars at Large Redshifts	275

A. C. EDWARDS / The Age Problem	291
K. O. THIELHEIM / New Developments in the Theory of Spiral Galaxies	305
M. S. LONGAIR / The Most Distant Galaxies	323
T. SHANKS / Observations of Galaxy Clustering	335
S. M. FALL / The Rotation of Galaxies: Clues to Their Formation	347
INDEX OF SUBJECTS	357
