

CONTENTS

Preface	vii
---------	-----

Part I SPECIAL SESSION

The Cosmological Distance Scale	1
---------------------------------	---

J. P. Huchra

The Value of the Hubble Constant	8
----------------------------------	---

G. A. Tammann

Part II GRAVITY WAVES AND GRAVITY WAVE DETECTORS

Interferometric Gravitational Wave Detection at MIT	15
---	----

P. Saulson, et al.

Operation of the 2270 kg Gravitational Wave Resonant Antenna of the Rome Group	18
---	----

E. Amaldi, et al.

The Garching 30-Meter Prototype and Plans for a Large Gravitational Wave Detector	20
--	----

A. Rüdiger, et al.

Some Ideas about (I) Detecting Low-Frequency Gravitational Radiation and (II) X-Ray Fast Timing Observations to Search for Gravity Wave Pulsars	23
---	----

P. F. Michelson

Status Report on the Laser Interferometric Gravitational Wave Detector at Glasgow University	26
---	----

N. A. Robertson, et al.

Prospects for Using the NAVSTAR/GPS Constellation as a Detector of Gravitational Radiation	27
<i>P. M. Hansen</i>	
Correlated State Gravitational Radiation Antennas	28
<i>J. Weber</i>	
Perturbed Binary Systems – An Unusual Source of Gravitational Radiation	30
<i>M. Fitchett</i>	
Limits on a Stochastic Gravitational Wave Background from Observations of Earth Normal Modes	31
<i>S. P. Boughn & J. R. Kuhn</i>	

Part III NEW TELESCOPE AND DETECTOR TECHNOLOGY

Topology of the Universe: Motivation for the Study of Large-Scale Structure	32
<i>A. L. Melott</i>	
Liquid Mirror Telescopes	37
<i>E. F. Borra</i>	
Ground-Based Interferometry	41
<i>F. Roddier</i>	
Design Considerations for a Future Large Optical/Near-IR Telescope in Space	49
<i>P. Y. Bely</i>	
Crystal Diffraction Lenses for Imaging Gamma-Ray Telescope	55
<i>R. K. Smithers</i>	

Part IV SUPERSTRINGS/SUPERSYMMETRY

Calabi-Yau Metrics from Superspace	60
<i>M. Evans & B. A. Ovrut</i>	

Cosmological Stability of Quantum Compactification <i>M. Gleiser</i>	67
---	----

Instabilities of Higher Dimensional Compactifications <i>F. S. Accetta</i>	74
---	----

Part V QUANTUM GRAVITY

Initial Conditions and Quantum Cosmology <i>J. B. Hartle</i>	80
---	----

Stability of De Sitter Space and the Cosmological Constant Problem <i>L. H. Ford</i>	97
---	----

Sigma Model Corrections to the Effective Field Theory of Superstrings <i>K. S. Stelle</i>	102
--	-----

Part VI RELATIVITY AND NUMERICAL ASTROPHYSICS

Recent Developments in General Relativity <i>R. M. Wald</i>	107
--	-----

The Problem of Dissipation in Relativistic Fluids <i>W. A. Hiscock & L. Lindblom</i>	117
---	-----

Do Closed Universes Recollapse? <i>F. J. Tipler</i>	122
--	-----

Gravitational Radiation Damping in Systems with Compact Components <i>J. L. Anderson</i>	127
---	-----

Quantum Stress Tensors and the Weak Energy Condition <i>T. A. Roman</i>	132
--	-----

Dirac's Large Numbers Hypothesis – A Bridge for Unifying Gravitation and Quantum Theory? <i>R. Gautreau</i>	135
---	-----

Strings and other Distributional Sources in General Relativity <i>R. Geroch & J. Traschen</i>	138
Recent Progress in Jet Modeling <i>M. L. Norman</i>	142
Computer Simulations of Relativistic Star Clusters: The Movie <i>S. L. Shapiro & S. A. Teukolsky</i>	148
Gravitational Radiation from Collisions of Compact Stars <i>C. R. Evans</i>	152
3D Numerical Relativity <i>T. Nakamura</i>	157
Numerical General Relativistic Cosmology <i>J. M. Centrella</i>	162
Part VII EARLY UNIVERSE	
Inflation and the Cosmic No-Hair Theorem <i>J. A. Stein-Schabes</i>	167
Part VIII BIG-BANG NUCLEOSYNTHESIS ABUNDANCES	
Big Bang Nucleosynthesis: Challenges and Opportunities <i>G. Steigman</i>	173
Groping for the Cosmological ^3He Abundance <i>R. T. Rood, T. M. Bania & T. L. Wilson</i>	180
The Evolution of the Galactic Lithium Abundance <i>L. M. Hobbs</i>	185
Measurements of the Primordial Abundance of Helium <i>G. A. Shields</i>	192
Primordial Helium and Galactic Chemical Evolution <i>J. S. Gallagher, III, G. Steigman & D. Schramm</i>	203

Part IX 3K BACKGROUND

<p>Measurements of Cosmic Microwave Radiation</p> <p><i>D. T. Wilkinson</i></p> <p>The Missing Link: Lyman Alpha Clouds as a Relic of Primordial CDM Density Perturbations</p> <p><i>J. R. Bond, A. S. Szalay & J. Silk</i></p> <p>Large Scale Structure in the Background Radiation</p> <p><i>P. M. Lubin</i></p> <p>Fluctuations in the CMB on Angular Scales of 5° to 15°</p> <p><i>R. D. Davies & A. N. Lasenby</i></p> <p>Cosmic Background Spectrometers</p> <p><i>J. B. Peterson</i></p> <p>Capabilities of the Cosmic Background Explorer</p> <p><i>J. C. Mather</i></p> <p>Large Scale Anisotropy of the Infrared Background: Primordial Fluctuations vs. Local Emission</p> <p><i>P. de Bernardis, et al.</i></p> <p>CBR Microanisotropies due to the Hydrodynamic Effects of Cosmic String Loops</p> <p><i>S. T. Chase</i></p> <p>Search for Distortions in the Spectral Distribution of the Cosmic Background Radiation at Decimetric Wavelengths</p> <p><i>G. Sironi, et al.</i></p> <p>Development and Progress of a Millimetre-Wavelength Search for the Sunyaev-Zeldovich Effect</p> <p><i>S. T. Chase, et al.</i></p> <p>Large-Scale Streaming Motions from First-Ranked Cluster Ellipticals</p> <p><i>P. A. James, R. D. Joseph & C. A. Collins</i></p>	<p style="margin-bottom: 0;">209</p> <p style="margin-bottom: 0;">219</p> <p style="margin-bottom: 0;">221</p> <p style="margin-bottom: 0;">224</p> <p style="margin-bottom: 0;">227</p> <p style="margin-bottom: 0;">232</p> <p style="margin-bottom: 0;">236</p> <p style="margin-bottom: 0;">240</p> <p style="margin-bottom: 0;">245</p> <p style="margin-bottom: 0;">248</p> <p style="margin-bottom: 0;">256</p>
--	--

**Part X LARGE SCALE STRUCTURE OF UNIVERSE AND
DARK MATTER**

Cryogenic Detectors for Weakly Interacting Particles <i>B. Neuhauser, et al.</i>	257
Prospects for Detecting Dark Matter Particles by Elastic Scattering <i>B. Sadoulet</i>	260
First Results from the Galactic Axion Search <i>S. De Panfilis, et al.</i>	265
First Bounds from Direct Search of Galactic Cold Dark Matter and Solar Axions from a Ge-Spectrometer <i>G. B. Gelmini</i>	268
Gravitational Lensing of Supernovae by Dark Matter Candidates of Mass $M \gtrsim 10^{-3} M_{\odot}$ <i>R. V. Wagoner & E. V. Linder</i>	271
Redshift Surveys <i>J. P. Huchra & M. J. Geller</i>	275
Large-Scale Structure in the Pisces-Perseus Supercluster <i>M. P. Haynes</i>	278
The Center for Astrophysics Redshift Survey: Statistical Measures of Large-Scale Clustering <i>V. De Lapparent, M. J. Geller & J. P. Huchra</i>	281
Deep Redshift Surveys of Large-Scale Structures <i>D. C. Koo, R. G. Kron & A. S. Szalay</i>	284
Tracing Large Scale Structures with Abell Clusters <i>J. O. Burns, J. W. Moody & D. J. Batuski</i>	286
The Southern Sky Redshift Survey and the IRAS Whole Sky Redshift Survey <i>M. Davis</i>	289

A Large -Scale Streaming Motion in the Local Universe <i>A. Dressler, et al.</i>	293
---	-----

Gravitational Lenses and Large Scale Structure <i>E. L. Turner</i>	294
---	-----

Part XI QSO ABSORPTION LINES

Comments on Associated CIV Absorption Systems and Broad Absorption Line Systems in QSOS <i>R. Weymann, et al.</i>	297
---	-----

QSO Lyman- α Absorption Clouds: Pancakes in Protogalaxies? <i>C. J. Hogan</i>	302
---	-----

The Redshift Evolution of Quasar Absorption Systems <i>D. Tytler</i>	304
---	-----

Damped Lyman Alpha Absorption Lines in QSOS <i>A. M. Wolfe</i>	309
---	-----

QSO-Absorption Systems due to Filamentary Shells? <i>W. Kundt</i>	314
--	-----

Part XII GRAVITATIONAL LENSES

1146 + 111B, C: A Giant Gravitational Lens? <i>E. L. Turner</i>	316
--	-----

A Search for Gravitational Lenses: Search Strategies and a Preliminary Upper Limit on the Density of Lenses <i>J. N. Hewitt, et al.</i>	317
---	-----

Gravitational Micro-Lensing as a Clue to Quasar Structure <i>S. Refsdal, B. Grieger & R. Kayser</i>	321
--	-----

Cosmic Strings in the Real Sky <i>C. J. Hogan</i>	324
--	-----

Micro-Arcsecond Resolution of Quasar Structure with Isolated Microlenses <i>R. J. Nemiroff</i>	327
Part XIII ACTIVE GALACTIC NUCLEI AND JETS	
Active Galactic Nuclei <i>M. J. Rees</i>	329
The Broad Line Region of Active Galactic Nuclei <i>G. J. Ferland</i>	340
Jets in Luminous Extragalactic Radio Sources <i>J. O. Burns, D. A. Clarke & M. L. Norman</i>	341
SS433 <i>J. I. Katz</i>	345
Effects of Active Galactic Nuclei on the Nature of Host Galaxies <i>S. Shabtag & A. Kembhavi</i>	347
Effects of Electron-Positron Pairs on Accretion Flows <i>S. Tsuruta & B. Tritz</i>	350
Nucleosynthesis in the Thick Accretion Disks <i>S. K. Chakrabarti</i>	351
Kelvin-Helmholtz Instability of Magnetized Rotating Jets <i>G. Bodo, et al.</i>	353
Jets, Galactic Halos, and the Linear Size-Distance Effect in Radio Galaxies <i>P. J. Wiita & G.-Krishna</i>	355
Sco X-1 A Unique Laboratory for Testing the Dual-Beam Model of Double Radio Sources <i>B. Geldzahler & E. Fomalont</i>	357
The Size of Supermassive Black Holes Formed from Star Cluster Collapse <i>C. S. Kochanek, S. L. Shapiro & S. A. Teukolsky</i>	360

The UV Excess of Quasars: Luminosity Dependence <i>A. Wandel</i>	362
---	-----

Small Broad-Line Emitting Regions in Active Galactic Nuclei and Evidence for Supermassive Black Holes <i>B. M. Peterson</i>	365
---	-----

Part XIV OUR GALACTIC NUCLEUS

Interstellar Material near the Galactic Center <i>D. T. Jaffe</i>	366
--	-----

The Galactic Center Compact Nonthermal Radio Source <i>K. Y. Lo</i>	373
--	-----

X-Ray and Gamma-Ray Observations of the Galactic Center <i>M. Leventhal</i>	382
--	-----

Estimates of the Mass Distribution in the Galactic Center <i>R. Genzel</i>	388
---	-----

Part XV SUPERNOVAE

Supernovae <i>J. C. Wheeler, R. P. Harkness & E. Cappellaro</i>	402
--	-----

Early Time Spectra of Type Ia Supernovae <i>R. Harkness</i>	413
--	-----

Part XVI GALACTIC EVOLUTION AND CHRONOLOGY

Ages from Nuclear Cosmochronology <i>F.-K. Thielemann, J. J. Cowan & J. W. Truran</i>	418
--	-----

The Stellar Evolution Time Scale <i>R. T. Rood</i>	422
---	-----

Stellar Population Problems <i>R. B. Larson</i>	426
Nucleosynthesis Yields and Production Timescales <i>J. W. Truran</i>	430
The Chemical Evolution of the Galaxy's Halo <i>B. W. Carney</i>	437
The Chemical Evolution of the Galactic Disk <i>R. F. G. Wyse & G. Gilmore</i>	441
The Formation of Galactic Spheroids <i>S. M. Fall</i>	445

Part XVII NEUTRON STARS AND PULSARS

Gamma Rays from Solitary Neutron Stars <i>M. Ruderman</i>	448
Neutron Stars as Cosmic Neutron Matter Laboratories <i>D. Pines</i>	460
Pulsars: An Overview of Recent Developments <i>J. H. Taylor</i>	467
Towards a Model for QPOs <i>J. Shaham</i>	478
Dynamics of the Neutron Star Interior <i>M. A. Alpar</i>	492
Neutron Star Cooling <i>S. Tsuruta</i>	499
Recent Progress in Understanding QPO Sources <i>J. Brainerd, F. K. Lamb & N. Shibazaki</i>	504

Part XVIII COMPACT OBJECTS

New Developments in Studies of Compact X-Ray Binaries <i>J. E. Grindlay</i>	509
Accretion-Induced Collapse of White Dwarfs <i>K. Nomoto</i>	519
Stellar-Mass Black Holes <i>J. E. McClintock</i>	529
Electrodynamic Origin of Jets from Rapidly Rotating Matter <i>R. V. E. Lovelace, J. C. L. Wang & M. E. Sulkhanen</i>	536
Hydrogen Abundance in the Ultra-Compact Binary 4U1820-30? <i>S. Miyaji</i>	545

Part XIX GAMMA RAY BURSTS

Energy Sources in Gamma Ray Burst Models <i>R. E. Taam</i>	546
Physics of Continuum Spectra of Gamma-Ray Bursts <i>A. A. Zdziarski</i>	553
A Third Class of High Energy Burster <i>J. G. Laros, E. E. Fenimore & R. W. Klebesadel</i>	563

Part XX COSMIC RAYS

Observations of PEV γ -Rays <i>J. W. Elbert</i>	567
Galactic Cosmic Ray Isotope Spectroscopy: Status and Future Prospects <i>R. A. Mewaldt</i>	573
High-Energy Gamma Rays Probing Cosmic-Ray Propagation <i>H. Bloemen</i>	579

Pulsars as Cosmic Ray Particle Accelerators — Acceleration Boundary for Protons <i>K. O. Thielheim</i>	581
Distributed Reacceleration of Cosmic-Rays <i>A. Wandel</i>	583
 Part XXI ULTRA HIGH-ENERGY COSMIC RAYS	
Ultra High Energy Gamma Ray Workshop Summary <i>T. C. Weekes</i>	586
Ground-Based Gamma-Ray Astronomy: An Overview <i>R. C. Lamb</i>	589
Detection of 10^{14} -eV Gamma Rays from Cygnus X-3 during 1986 <i>D. E. Nagle et al.</i>	595
Underground Muons from Cygnus X-3: The Case For <i>K. Ruddick</i>	600
 Part XXII SUPERCONDUCTING COSMIC STRINGS	
Superconducting Cosmic Strings <i>E. Witten</i>	606
Index of Contributors	621
List of Participants	624
