

CONTENTS

Foreword v

Topical workshop :

SUPERNOVA 1987A, ONE YEAR LATER

Supernova 1987A after one year	I. J. Danzinger	3
High resolution spectroscopy of SN1987A	E. J. Wampler	17
Analysis of the hydrogen rich layers of SN1987A	P. Höflich	21
IR speckle-interferometry of SN1987A	A. A. Chalabaev	35
Search for very high energy gamma-rays from SN1987A	G. Navarra	43
Recent ν -results from Kamiokande-II and future	M. Koshiba	51
Update on IMB observations of SN1987A	J. M. LoSecco	61
Angular distribution of IMB and Kamiokande neutrino events	J. M. LoSecco	71
Interpretation of Angular distribution of events	J. C. Van der Velde	81
Neutrino astronomy at Mont Blanc : from LSD to LSD-2	O. Saavedra	83
Analysis of the data recorded by the Mont Blanc neutrino detector and by the Maryland and Rome gravitational wave detectors during SN1987A	G. Pizzella	107
Gravitational antenna cross sections	J. Weber	147
Constraints on neutrino properties from gravitational stellar collapse	A. Dar	149
Mindboggling news from Shelton's supernova	A. De Rujula	163
Supernova 1987A ; one year later	D. N. Schramm	183

RESULTS AND PERSPECTIVES IN PARTICLE PHYSICS

I - COSMOLOGY, ASTROPHYSICS AND UNDERGROUND PHYSICS

Experimental searches for dark matter	D. O. Caldwell	209
Coherent scattering of neutrinos and antineutrinos by quarks in a crystal	J. Weber	223
Surface and underground experiments at the Gran Sasso	B. D'Ettorre Piazzoli	239

II - HEAVY FLAVOURS AND CP VIOLATION

The Tau decay mode problem	M. L. Perl	275
Results from CUSB at CESR	J. Lee-Franzini	301
(A few) results and (many) perspectives from the CLEO experiment at CESR	Th. A. Ferguson	331
Results from DORIS	W. Schmidt-Parzefall	353
Experimental status of CP violation	J. Steinberger	381
Weak couplings of light and heavy hadrons in lattice QCD	L. Maiani	417
Quark flavor mixing, CP violation, and all that	F. J. Gilman	427

III - FIXED TARGET PHYSICS

Photoproduction of heavy flavours	J. Spalding	449
Heavy flavour hadroproduction	B. Cox	463
The heavy quark effort in the CERN fixed target programme	L. Rossi	465
The theory of heavy quark production	P. Nason	503
Neutrino-electron scattering : progress with the CHARM II detector	V. Palladino	511

IV - ROUND TABLE : WHICH BEAUTY FACTORY ?

Contribution to the Thuile round table	U. Amaldi	525
CESR as a B factory	K. Berkelman	535
Which beauty factory ?	J. Haissinski	551
The B-Meson-factory project at PSI	K. R. Schubert	557
What is the best way to do B physics in the next 5-10 years ? A bottom collider detector at Fermilab ?	N. S. Lockyer	563
B-factory activities at SLAC	E. Bloom	575

V - PHYSICS AT HADRON COLLIDERS

Some selected results from the UA1 experiment	K. Eggert	583
Perspective of the upgraded UA2 detector at the improved CERN $p\bar{p}$ collider	L. Mapelli	613
Log-s physics with CDF	S. White	637
The CDF detector and the first jet physics	K. Kondo	651
Electroweak physics with CDF	S. Hahn	667
High energy expectations for σ , $d\sigma/dt$ and ρ	E. Leader	669
Coherence in Monte Carlo simulation of general hard processes	G. Marchesini	683

VI - NEW FACILITIES AND FUTURE PROSPECTS

Heavy ion experiments at CERN	L. Kluberg	693
Quark-gluon plasma and J/ψ production in heavy ion collisions	R. Petronzio	721
Future linear colliders	B. Richter	729
Aspects of collider physics : heavy quark production	G. Altarelli	739

High energy tests for vector bosons from the strong higgs sector	P. Chiappetta	759
The physics programme of the world laboratory	A. Zichichi	769
VII - PERSPECTIVES IN THEORY		
Superunified theories	S. Ferrara	773
Proton decay and photino and squark masses	R. Arnowitt	791
SU(5) : top flip or not to flip	D. V. Nanopoulos	795
High T-superconductivity : results and models	C. W. Chu	821
List of participants		823
