

## CONTENTS OF PART III

Preface .....	xiii
Planning and Organizing Committees .....	xiv
International Advisory Committee .....	xv
Acknowledgement .....	xv
 Memorial to Boris Vodar	
E. U. Franck .....	1
 Structural studies at elevated pressures and reduced temperatures using synchrotron radiation: application to Ce <sub>0.8</sub> La <sub>1.1</sub> Th <sub>0.1</sub>	
E. F. Skelton, A. W. Webb, W. T. Elam, S. A. Wolf, S. B. Oadri, C. Y. Huang, P. M. Chjaikin, R. C. Lacoé, and K. A. Gschneidner .....	5
 High pressure x-ray diffraction study on cesium iodide	
Tzeun-Luh Huang and Arthur L. Ruoff .....	11
 Multi-anvil type x-ray apparatus for synchrotron radiation	
O. Shimomura, S. Yamaoka, T. Yagi, M. Wakatsuki, K. Tsuji, O. Fukunaga, H. Kawamura, K. Aoki, and S. Akimoto .....	17
 Linear compressibility studies of selected transition metal dichalcogenides	
A. W. Webb, S. B. Oadri, E. F. Skelton, W. T. Elam, Z. Rek, and W. E. Jamison .....	21
 Investigation of the structure and compressibility of a number of chalcopyrite compounds	
S. B. Oadri, E. F. Skelton, A. W. Webb, S. A. Wolf, W.T. Elam, and Z. Rek .....	25
 Behaviour of CuGaSe <sub>2</sub> and CuGaTe <sub>2</sub> under high pressure	
A. Kraft, H. Vollstädt, G. Kohn, and W. Möller .....	31
 High pressure polymorphs of mercury chalcogenides	
Tzeun-Luh Huang and Arthur L. Ruoff .....	37
 High pressure x-ray and optical studies of BaSe and BaTe	
T. A. Grzybowski and A. L. Ruoff .....	43
 The bulk moduli of 3d-transition element pyrites measured with synchrotron radiation in a new belt type apparatus	
G. Will, J. Lauterjung, H. Schmitz, and E. Hinze .....	49
 High pressure investigations of the Al-H system	
B. Baranowski, M. Tkacz, and S. Filipek .....	53

Metal-nonmetal transition in NaNbl-xWxO <sub>3</sub> synthesized under high pressure Y. Miyamoto, M. Koizumi, and S. Kume .....	57
Mechanistic information from the effect of pressure on fast substitution reactions of inorganic complexes in aqueous solution R. van Eldik, E. L. J. Breet, R. Doss, R. Mohr, and H. Kelm .....	61
Effect of pressure on the photosolvolytic reactions of a series of pentaamminerrhodium(III) complexes in solution W. Weber, U. Kuester, R. van Eldik, and H. Kelm .....	65
A convenient method for the synthesis of rare earth hydrides by the use of conventional very high pressure technique Koji Wakamori, Stanislaw M. Filipek, and Akira Sawaoka .....	69
High pressure thermodynamics and solution growth of GaN J. Karpinski, S. Porowski, and J. Jun .....	73
The kinetics of some pressure induced polymorphic transformations A. K. Singh, M. Mohan, and C. Divakar .....	77
In situ high-pressure transformation studies on monoclinic CrF <sub>2</sub> and ZrO <sub>2</sub> Li Chung Ming and Murli H. Manghnani .....	81
The influence of the high pressure on the crystallization intermetallic phases in the two-component systems S. V. Popova, V. I. Larchev, and N. V. Kalayeva .....	83
The system Mg-FeO-SiO <sub>2</sub> at ultra-high pressures Eiji Ito .....	91
Pressure induced phase transition in IV-VI compounds T. Chattopadhyay, A. Werner, and H. G. von Schnerring ..	93
Simple cubic structure as a stable form of phosphorus under high pressure H. Iwasaki and T. Kikegawa .....	97
High pressure Raman and x-ray study of the alkali cyanides K. Strössner, W. Henkel, I. Stoll, W. Höhne, A. Werner, and H. D. Hochheimer .....	101
High pressure study of the electric field gradient in In <sub>2</sub> Bi S. G. Fries, J. A. H. Da Jornada, A. Maciel, and E. R. Fraga .....	105
Phases stability of an amorphous Co <sub>80</sub> B <sub>20</sub> alloy under high pressure and high temperature Wang Wen-Kui, He Shou-An, H. Iwasaki, Y. Syono, and T. Goto .....	109

Effects of high pressure on the structures of $\text{AB}_3$ -type layered compounds John F. Cannon .....	113
Spectroscopic (Raman) evidence of new high pressure phases in solid $\text{CH}_4$ and $\text{CD}_4$ Marie-Madelene Thiéry, Denise Fabre, and Koji Kobashi .....	117
Silicon and germanium under high pressure C. S. Menoni, J. Z. Hu and I. L. Spain .....	121
High pressure study of the cluster compound $\text{Nb}_6\text{I}_{11}$ M. K. Wu, C. W. Chu, F. J. Disalvo, and J. M. Tarascon .....	125
High pressure study of the inhomogeneous $\text{BaPb}_{1-x}\text{Bi}_x\text{O}_3$ superconductors T. H. Lin, X. Y. Shao, M. K. Wu, P. H. Hor, X. C. Jin, J. H. Lin and C. W. Chu .....	129
Phase and chemical transformation of rare earth metal compounds under high dynamic pressure S. S. Batsanov .....	133
Melting of metals above 100 GPa J. W. Shaner, J. M. Brown, and R. G. McQueen .....	137
Shock compression and shear properties of sapphire ( $\text{Al}_2\text{O}_3$ ) Tsutomu Mashimo and Kunihito Nagayama .....	143
Dynamic material response of quartz at high strain rates L. C. Chhabildas and D. E. Grady .....	147
Dynamic high pressure work A. N. Dremin .....	151
Effects of dynamic and isostatic compaction on the micro- structure and mechanical behavior of $\text{AlN}$ , $\text{TiB}_2$ and $\text{TiC}$ . M. Akaishi, O. Fukunaga, Y. Horie, D. Hoy, H. Kanda, H. Palmour III, and J. K. Whitfield .....	159
An improved model of mixtures and its application to predict postdetonation behavior of PETN Francis H. Ree .....	163
Shock induced polarization and conductivity M. de Icaza-Herrera .....	167
Influence of explosion on some ceramic materials A. M. Saver, V. T. Deripasko, A. A. Saveliev, and A. V. Khudiakov .....	171
Mathematical modelling of problems of high-speed collision of bodies V. M. Fomin .....	175

Laser simulation of hypervelocity impacts M. Hallouin, F. Cottet, and J. P. Romain .....	181
Universal dependence of hardening parameters of metals on shock intensity A. A. Deribas .....	185
Thermodynamics of shock compression of porous materials V. F. Nesterenko .....	195
Shock-induced electrical polarization of organic materials V. V. Yakushev .....	199
Synthesis of jadeite for jewelry Robert C. Devries and James F. Fleischer .....	203
Impurity effect on morphology of synthetic diamond Hisao Kanda, Nobuo Setaka, Toshikazu Ohsawa, and Osamu Fukunaga .....	209
Formation of secondary graphite inside diamond formations under shock loading in the region of 1 Mbar Valentin D. Andreyev .....	213
The sintering mechanism of diamond with additive at H Shen Zhutong, Sun Guoxian, Wang Lijun, and Wang Wenjun .....	215
Growing conditions of acicular diamond A. Yoshida, Y. Miyamoto, M. Koizumi, and S. Kume .....	219
Nucleation, growth and regraphitization of diamonds and other carbonaceous materials formed in flash- heating implosion experiments J. Kleiman, N. M. Salansky, and R. B. Heimann .....	223
Shear strength of some ceramic materials and graphite at high temperatures and pressures I. Sigalas, A. Vlachos, and S. Hart .....	227
High pressure equation of state of Li, Na and K Marvin Ross, David A. Young, and Reinhard Boehler .....	231
Aluminum as a global high-pressure equation-of-state standard W. J. Nellis, A. C. Mitchell, N. C. Holmes, and R. J. Trainor .....	235
Pressure variation of the elastic moduli of the sodium halides S. Hart .....	239
Equation of state of poly-di-methyl siloxane fluids V. K. Sachdeva, P. C. Jain, and V. S. Nanda .....	243
An equation of state for anharmonic oscillator solids at high pressure Chen Dongquan .....	247

Piston-displacement equations of state for sodium, potassium and rubidium metals to 20 kbar from 300 K to 4 K C. A. Swenson and M. S. Anderson .....	251
Born model repulsive interactions at high pressure for the sodium halides Yosiko Sato-Sorensen .....	255
Metallization of CsI: Comparison of experiment and theory John Aidun and M. S. T. Bukowinski .....	259
The electronic properties of Ar and Xe under pressure R. Le Sar .....	<i>271</i> 263
Piezo-optic properties of liquid argon at high pressures K. Vedam, H. D. Hochheimer, R. Wroblewski, and W. Steele .....	267
Dielectric behaviour of freezing n-decane and n-pentadecane W. G. S. Scaife and C. C. R. Lyons .....	271
MgO:V <sup>2+</sup> pressure scale for diamond anvil cells Anastasia Chopelas and Reinhard Boehler .....	275
Contactless methods for measuring electrical resistivity under pressure B. Sundqvist, and B. Lundberg .....	281
Metrological characterization of manganin gages calibrated against the mercury melting line G. F. Molinar, and L. Bianchi .....	285
Pressure dependence of viscosity of pressure transmitting fluids Vern E. Bean, Sharrill D. Wood, and Ruben J. Lazos .....	289
Detonation E.O.S. patterns for several explosives L. Green, E. L. Lee, A. C. Mitchell, F. Ree, R. Tipton, and M. Van Thiel .....	293
A Novel Optical Pin Using Microballoons Robert F. Benjamin .....	299
The nitrate and nitrite ions as infrared pressure gauges for diamond anvils D. D. Klug and E. Whalley .....	301
High pressure chamber with polycrystalline cubic boron nitride Bridgman anvils for Mössbauer investigations up to 200 kbar. New results for tin E. V. Kapitanov and E. N. Yakovlev .....	305
Manganin and zeronin pressure transducers for 20 kbar A. W. Birks and C. G. Ludlow .....	311

The pressure dependence of the infrared spectrum of HDO in D <sub>2</sub> O to 189 kilobars D. D. Klug and E. Whalley .....	315
Lattice dynamics of solid I <sub>2</sub> under high pressure Koji Kobashi and Richard D. Etters .....	319
Volumes of activation for the S <sub>1</sub> → T <sub>2</sub> intersystem crossing in N-methylacridone in several solvents B. Hammerich, R. Schmidt, and H.-D. Brauer .....	323
Pressure-induced infrared spectra of hydrogen to 542 kbar H. K. Mao, J. Xu, and P. M. Bell .....	327
Polarization scrambling by optical-glass windows at pressures up to 18 kbar S. Ikawa and E. Whalley .....	333
Application of high pressure Moessbauer spectroscopy to study the local structure of amorphous metals M. M. Abd-Elmeguid and H. Micklitz .....	337
Cryogenic-pressure studies of semiconductor luminescence Bernard A. Weinstein .....	341
Hydrostatic pressure effect on emission spectra of ZnS:Eu <sup>2+</sup> and Y <sub>2</sub> O <sub>2</sub> S:Eu <sup>3+</sup> Wang L zhong, Zhang Zaixuan, Chi Yuanbin, and Liu Shensin .....	345
High pressure Raman scattering from the 1-D organic conductor HMTSF-TCNO D. A. Weitz, H. E. King, Jr., J. P. Stokes, J. C. Chung, and A. N. Bloch .....	349
Effects of high pressure on adsorbed monolayers C. J. Sandroff, H. E. King, Jr., and D. R. Herschbach .....	353
Condensed matter physics of planets: puzzles, progress and predictions D. J. Stevenson .....	357
Thermodynamic properties of molten silicates under pressure, geophysical applications B. Le Neindre, L. Denielou, and J. P. Petitet .....	369
High pressure generation and phase transformations of SiO <sub>2</sub> and GeO <sub>2</sub> Motohiro Togaya .....	373
Monte Carlo calculations of the melting point of iron at core pressures Robert S. Abelson .....	377
Author Index .....	387
Subject Index .....	395
