CONTENTS

PREFACE ix

Chapter I: THE TRANSPORT EQUATION OF CHARGED PARTICLES IN MATTER 1

1.1 The Kinetic Boltzmann Equation 1
1.2 Integral Form of Transport Equation 15

Chapter II: ELASTIC SCATTERING OF FAST CHARGED PARTICLES 31

2.1 Differential Form of the Transport Equation 31
2.2 Angular Distribution of a Broad Beam of Heavy Particles 37
2.3 Spatial Angular Distribution of Heavy Particles in a Narrow Beam 42
2.4 Solution of Integral Transport Equations in Small-Angle Approximation: The Molière Distribution Function 50
2.5 Solution of the Integrodifferential Transport Equation for a Narrow Beam in Small-Angle Approximation 64

Chapter III: SOLUTION OF TRANSPORT EQUATIONS FOR INELASTIC COLLISIONS 77

3.1 Transport Equation in Absence of Elastic Collisions: "Straightforward" Approximation 77
3.2 Solution of Transport Equation without Energy Loss Fluctuations: Range-Energy Relation 83
3.3 Fluctuations of Energy Losses of Fast Heavy Particles: Diffusional Approximation 93
3.4 Energy Spectrum of Fast Heavy Nonrelativistic Particles at Large Depths 105

3.5 Range Straggling of Fast Heavy Particles 115
3.6 The Energy Spectrum of Fast Particles in a Thin Layer: Landau Distribution Function 123
3.7 Quantum-Mechanical Approach to the Theory of Multiple Scattering of Fast Particles 139

Chapter IV: ANGULAR AND ENERGY DISTRIBUTIONS OF CHARGED PARTICLES 151

4.1 Spatial-Angular Distribution of Fast Charged Particles, Taking Energy Losses into Account 151
4.2 Effects of Elastic Scattering on the Energy Spectrum of Fast Heavy Particles in Matter 167
4.3 Calculation of Particle Penetration Depth Distribution Caused by Multiple Elastic Scattering 187
4.4 Calculation of the Energy Spectrum of Fast Heavy Particles and Their Distribution in Penetration Depth, Taking Elastic Collisions and Energy Loss Fluctuations into Account 203

Chapter V: BACKSCATTERING OF CHARGED PARTICLES FROM A CONTINUOUS MEDIUM 215

5.1 Method of Invariant Embedding 215
5.2 Dependency of the Differential Backscattering Coefficient on the Incident Particle Energy 225
5.3 Approximate Treatment of Nonlinear Integral Equation for Differential Backscattering Coefficient 227
5.4 Calculation of Differential Backscattering Coefficient 230
5.5 Differential Coefficient of Backscattering from a Plane Target of an Arbitrary Thickness: Saturation Thickness 238
5.6 Reflection of a Broad Beam of Fast Charged Particles from a Plane Scatterer at Grazing Incidence 245

Chapter VI: ORIENTATION EFFECTS IN THE COHERENT SCATTERING OF CHARGED PARTICLES IN SINGLE CRYSTALS 257

6.1 Effective Length of Elastic Scattering 257
6.2 Destructive Interference in Scattering of Fast Charged Particles in a Single Crystal 265
6.3 Total Cross-Section of Elastic Scattering of Fast Charged Particles in a Single Crystal 269
6.4 Differential Elastic Scattering Cross-Section of Relativistic Charged Particles in a Single Crystal 272
6.5 Scattering of Fast Positively Charged Particles by an Atomic Row 281
6.6 Diffraction Scattering of Positively Charged Particles by a System of Crystallographic Planes 292

Chapter VII: CHANNELING OF CHARGED PARTICLES IN SINGLE CRYSTALS 301

7.1 Fundamental Regularities of Channeling 301
7.2 Quantum Kinetic Equation in the Case of Channeling 309
7.3 Energy Loss of Channeled Particles 325

Chapter VIII: ORIENTATIONAL PHENOMENA IN RADIATION OF CHARGED PARTICLES IN SINGLE CRYSTALS 341

8.1 The Quantum Nature of "Channeling" of Nonrelativistic Electrons 341
8.2 Effects of "Channeling" on the Elastic Scattering of Nonrelativistic Electrons in a Single Crystal 350
8.3 Theory of Orientational Maximum in the Spectrum of Nonrelativistic Electron Radiation in a Single Crystal 356
8.4 Quasicharacteristic Radiation of Ultrarelativistic Electrons in a Single Crystal 365

Chapter IX: CHANGES IN THE PROPERTIES OF MATTER IN THE PARTICLE TRACK 383

9.1 Polarization of Matter by Charged Particle: The Wake Potential 383
9.2 Secondary Ionization by the Wake Potential 396
9.3 The Variation of the Dielectric Properties of Matter in the Particle Track 404
9.4 Correlated Scatter of Ions in Decay of Fast Molecules in Thin Film 417

REFERENCE LIST 427
