Preface . . . . .	vi
-------------------	----

### *Chapter 1 (E. Bauer)*

Metals on metals . . . . .	1
1. Introduction . . . . .	1
2. Metal atoms . . . . .	2
2.1 Adsorption site . . . . .	3
2.2 Binding energy . . . . .	3
2.3 Electronic properties . . . . .	7
2.4 Diffusion behaviour . . . . .	11
3. Metal molecules . . . . .	13
3.1 Diatomic molecules (dimers) . . . . .	13
3.2 Triatomic molecules (trimers) . . . . .	17
3.3 Polyatomic molecules (clusters) . . . . .	18
4. Two-dimensional metal crystals and gases: submonolayer adsorption . . . . .	19
4.1 Structure . . . . .	19
4.1.1 Electropositive adsorbates on refractory metal surfaces . . . . .	21
4.1.2 Electropositive adsorbates on non-refractory metal surfaces . . . . .	25
4.1.3 Noble, transition, and other metal atoms on refractory metal surfaces . . . . .	27
4.1.4 Noble, transition, and other metal atoms on non-refractory metal surfaces . . . . .	31
4.2 Binding energy . . . . .	36
4.3 Work function . . . . .	39
4.4 Electronic properties . . . . .	44
5. Quasi-two-dimensional metal crystals: multilayer adsorption . . . . .	47
5.1 Structure and stability . . . . .	47
5.2 Binding energy and electronic properties . . . . .	49
6. Final remarks and acknowledgements . . . . .	50
Note added in proof . . . . .	50
References . . . . .	51

### *Chapter 2 (R.M. Lambert and M.E. Bridge)*

Chemisorption of the hydrides and oxides of nitrogen on metal surfaces . . . . .	59
1. Nitrogen hydrides: introduction . . . . .	59
2. Chemisorption and decomposition on iron surfaces . . . . .	61
3. Chemisorption and decomposition on tungsten and molybdenum surfaces . . . . .	69
3.1 Tungsten . . . . .	69
3.2 Molybdenum . . . . .	74
4. Chemisorption and decomposition on platinum surfaces . . . . .	75
5. Chemisorption of ammonia on other metals . . . . .	77
6. Chemisorption and decomposition of hydrazine on metal surfaces . . . . .	79
7. Conclusions . . . . .	83
8. Nitrogen oxides: introduction . . . . .	84
9. Nitric oxide adsorption on platinum and palladium . . . . .	85
10. Nitric oxide chemisorption on nickel and cobalt . . . . .	90
11. Nitric oxide chemisorption on ruthenium, rhodium and iridium . . . . .	93
12. Nitric oxide chemisorption on the remaining transition metals, and on aluminium . . . . .	96

13. Nitric oxide chemisorption on the Group IB metals . . . . .	97
14. Chemisorption of nitrous oxide and nitrogen dioxide on metal surfaces. . . . .	99
14.1 N <sub>2</sub> O on Cu, Ag and Au . . . . .	99
14.2 N <sub>2</sub> O on transition metals and Pb; NO <sub>2</sub> on W and Pb . . . . .	100
References . . . . .	102

*Chapter 3 (J.C. Bertolini and J. Massardier)*

Hydrocarbons on metals . . . . .	107
1. Introduction. . . . .	107
1.1 General features . . . . .	107
1.2 Potential of the techniques . . . . .	107
2. Acetylene and ethylene adsorption . . . . .	110
2.1 C <sub>2</sub> H <sub>2</sub> and C <sub>2</sub> H <sub>4</sub> on Pt . . . . .	110
2.1.1 Pt{111} . . . . .	111
2.1.2 Pt{100} . . . . .	114
2.1.3 Other Pt surfaces . . . . .	116
2.2 C <sub>2</sub> H <sub>2</sub> and C <sub>2</sub> H <sub>4</sub> on Ni . . . . .	117
2.2.1 Ni{111} . . . . .	117
2.2.2 Ni{100} . . . . .	119
2.2.3 Ni{110} . . . . .	120
2.2.4 Other Ni surfaces . . . . .	120
2.3 C <sub>2</sub> H <sub>2</sub> and C <sub>2</sub> H <sub>4</sub> on Pd . . . . .	121
2.4 C <sub>2</sub> H <sub>2</sub> and C <sub>2</sub> H <sub>4</sub> on other metal surfaces . . . . .	122
2.4.1 Ir . . . . .	122
2.4.2 Re . . . . .	122
2.4.3 W . . . . .	123
2.4.4 Fe . . . . .	124
2.4.5 Ru, Rh, Cu and Au . . . . .	124
2.5 Other olefins and conclusions . . . . .	125
3. Benzene adsorption . . . . .	126
4. Adsorption of saturated hydrocarbons. . . . .	130
5. Carbonaceous overlayers . . . . .	131
6. Conclusions . . . . .	132
References . . . . .	133

*Chapter 4 (G. Heiland and H. Lüth)*

Adsorption on oxides . . . . .	137
1. Introduction. . . . .	137
2. General classification of oxide surfaces . . . . .	139
3. Electronic surface states, space-charge layers and surface conductivity . . . . .	141
4. Adsorption systems . . . . .	145
4.1 Zinc oxide . . . . .	145
4.1.1 Surface structure, sublimation and stoichiometry of ZnO . . . . .	145
4.1.2 Electronic surface states on clean ZnO surfaces . . . . .	153
4.1.3 Hydrogen on ZnO . . . . .	158
4.1.4 Oxygen and chlorine on ZnO . . . . .	163
4.1.5 Carbon dioxide, carbon monoxide and formic acid on ZnO . . . . .	174
4.1.6 Hydrocarbons on ZnO . . . . .	181
4.1.7 Oxygen-containing organic molecules on ZnO . . . . .	183
4.1.8 Nitrogen-containing molecules on ZnO . . . . .	189
4.2 Titanium oxide and strontium titanium oxide . . . . .	190
4.2.1 Active sites on TiO <sub>2</sub> and SrTiO <sub>3</sub> . . . . .	191

4.2.2 Oxygen on $\text{TiO}_2$ and $\text{SrTiO}_3$ . . . . .	196
4.2.3 Hydrogen on $\text{TiO}_2$ . . . . .	199
4.2.4 Water on $\text{TiO}_2$ . . . . .	202
4.2.5 Some remarks about the $\text{TiO}_2$ and $\text{SrTiO}_3$ studies . . . . .	205
4.3 Nickel oxide . . . . .	206
4.4 Deposition systems . . . . .	208
4.4.1 Metals on $\text{ZnO}$ . . . . .	209
4.4.2 Organic dyes on $\text{ZnO}$ . . . . .	215
5. Concluding remarks . . . . .	218
Note added in proof . . . . .	219
Acknowledgement . . . . .	219
References . . . . .	219

### *Chapter 5 (H.H. Farrell)*

The chemisorption of halogens on solids . . . . .	225
1. Introduction . . . . .	225
1.1 Graphite + Br . . . . .	225
2. Chemisorption of halogens on metals . . . . .	229
2.1 Chemisorption on f.c.c. substrates . . . . .	229
2.1.1 $\text{Ag}\{111\} + \text{I}$ . . . . .	230
2.1.2 Halogen chemisorption on other f.c.c. $\{111\}$ substrates . . . . .	234
2.1.3 $\text{Ag}\{100\} + \text{Cl}$ . . . . .	241
2.1.4 $\text{Au}\{100\}$ and $\text{Cu}\{100\} + \text{Cl}$ , and $\text{Pt}\{100\} + \text{I}$ . . . . .	243
2.1.5 Halogen chemisorption on other f.c.c. surfaces . . . . .	244
2.2 Chemisorption on b.c.c. substrates . . . . .	245
2.2.1 Chemisorption on W . . . . .	245
2.2.2 Chemisorption on Fe $\{100\}$ . . . . .	247
2.2.3 Chemisorption on other b.c.c. substrates . . . . .	250
2.3 Chemisorption on h.c.p. substrates . . . . .	251
3. Chemisorption of halogens on semiconductors . . . . .	252
3.1 Adsorption-site symmetry and polarization effects . . . . .	252
3.2 $\text{Si}\{111\}(2 \times 1) + \text{Cl}$ . . . . .	253
3.3 $\text{Ge}\{111\}(2 \times 1) + \text{Cl}$ . . . . .	255
3.4 $\text{Si}\{111\}(7 \times 7) + \text{Cl}$ . . . . .	257
3.5 $\text{Si}\{100\}(2 \times 1) + \text{Cl}$ . . . . .	258
3.6 Group III–IV compounds + Cl . . . . .	259
4. Chemisorption of halogens on insulators . . . . .	261
4.1 $\text{ZnO} + \text{Cl}_2$ . . . . .	261
4.2 Chemisorption on other insulators . . . . .	262
5. Summary . . . . .	262
References . . . . .	264

### *Chapter 6 (R.H. Williams and I.T. McGovern)*

Adsorption on semiconductors . . . . .	267
1. Introduction . . . . .	267
2. The nature of semiconductor surfaces . . . . .	269
2.1 General . . . . .	269
2.2 Adsorbates on semiconductors . . . . .	271
2.3 Clean and real surfaces . . . . .	272
2.4 Atomic structure of archetypal semiconductor surfaces . . . . .	273
2.4.1 Silicon and germanium $\{111\}$ surfaces . . . . .	273
2.4.2 Silicon and germanium $\{100\}$ and $\{110\}$ surfaces . . . . .	275
2.4.3 Gallium arsenide $\{100\}$ and $\{111\}$ surfaces . . . . .	276
3. Hydrogen . . . . .	277

3.1 Hydrogen adsorption on {111} Si and Ge surfaces . . . . .	277
3.2 Hydrogen adsorption on {100} and {110} Si and Ge surfaces . . . . .	280
<b>4. Oxygen . . . . .</b>	<b>281</b>
4.1 Experimental factors influencing adsorption. . . . .	282
4.2 Oxygen adsorption on silicon and germanium surfaces . . . . .	284
4.3 Oxygen adsorption on cleaved {110} GaAs surfaces . . . . .	289
4.4 Oxygen adsorption on {111} GaAs surfaces . . . . .	294
4.5 Oxygen adsorption on cleaved {110} InP and GaSb surfaces. . . . .	294
<b>5. Chlorine . . . . .</b>	<b>296</b>
5.1 Chlorine adsorption on silicon and germanium surfaces. . . . .	296
5.2 Chlorine adsorption on cleaved {110} surfaces of III-V compound semiconductors. . . . .	298
<b>6. Carbon monoxide . . . . .</b>	<b>300</b>
6.1 Carbon monoxide adsorption on Ge{111} surfaces. . . . .	300
6.2 Carbon monoxide adsorption on III-V semiconductor surfaces . .	301
<b>7. Water vapour and hydrogen sulphide. . . . .</b>	<b>302</b>
7.1 H <sub>2</sub> O and H <sub>2</sub> S adsorption on {111} surfaces of Si and Ge . . . . .	302
7.2 H <sub>2</sub> O and H <sub>2</sub> S adsorption on cleaved {110} GaAs and InP . . . . .	304
<b>References . . . . .</b>	<b>305</b>
<b>Index . . . . .</b>	<b>311</b>
