CHAPTER I

NUCLEAR MOMENTS IN FREE ATOMS

| | |
|---|-----|
| 1. Survey of Experimental Methods | 1 |
| I. THE THEORETICAL FOUNDATIONS OF HYPERFINE STRUCTURE 4 | |
| 2. Magnetic Interaction Between Atomic Nucleus and Orbital Electrons | 4 |
| 3. Electrostatic Interaction Between the Nucleus of an Atom and its Orbital Electrons | 9 |
| 4. The Hyperfine Structure Multiplet | 15 |
| 5. The Effect of an External Magnetic Field on the Hyperfine Structure Multiplet | 18 |
| 6. Perturbation Due to Mutual Interaction Between Hfs States | 28 |
| 7. Transitions Between Hyperfine Structure Levels | 31 |
| II. THE DETERMINATION OF A , B , I , AND g 41 | |
| A. Hyperfine Structure Investigations by Atomic Beam Methods | 42 |
| 8. Theoretical Foundations of Atomic Beam Experiments | 42 |
| 9. Technique of Atomic and Molecular Beam Experiments | 51 |
| 10. Intensity Distributions in Atomic Beams | 55 |
| 11. Older Atomic Beam Experiments | 57 |
| 12. Rotating Magnetic Fields | 59 |
| 13. Molecular Beam Radio-Frequency Spectrometers | 64 |
| 14. Radio-Frequency Spectroscopy of $^2S_{1/2}$ and $^2P_{1/2}$ States | 68 |
| 15. Radio-Frequency Spectroscopy of Rare Isotopes in $^2S_{1/2}$ States | 74 |
| 16. Radio-Frequency Spectroscopy of $^2P_{1/2}$ and other States | 78 |
| B. Optical Hyperfine Structure Investigations | 82 |
| 17. The Experimental Arrangement | 82 |
| 18. Analysis of Hyperfine Structures | 93 |
| 19. Determination of the Nuclear Spin | 96 |
| 20. Determination of the Sign of the Nuclear Magnetic Moment | 99 |
| 21. Determination of A and B | 100 |
| 22. Influence of Isotopes on the Hfs of Atomic Spectral Lines | 102 |
| 23. Hfs Investigations with Separated Isotopes | 106 |
| 24. The Double Resonance Method | 110 |

| | |
|--|-----|
| III. THE DETERMINATION OF μ_1 AND Q | 114 |
| A. Determination of μ_1 From A | 115 |
| 25. Determination of the a -Factors for Hydrogenic Orbitals | 115 |
| 26. Determination of the a -Factors for Alkali-Like and Earth-Like Configurations | 123 |
| 27. The A -Factors of Alkaline Earth Like Electron Configurations. Treatment by the Correspondence Principle | 139 |
| 28. The Magnetic Interaction Between Electrons and Nucleus by the Method of Energy Sums | 146 |
| 29. Quantum-Mechanical Treatment of the A -Factors of Alkaline Earth-Like Electron Configurations | 150 |
| B. The Determination of Q From B | 152 |
| 30. The Calculation of $\overline{\varphi_{j,i}(0)}$ for Alkali-Like States | 152 |
| 31. The Calculation of $\overline{\varphi_{j,j}(0)}$ for the Electron Configurations sl | 157 |
| 32. Discussion of Methods and Results | 157 |
| IV. THE ISOTOPE SHIFT | 161 |
| 33. The Mass-Dependent Isotope Shift | 161 |
| 34. Theory of the Isotope Shift of Heavy Elements | 167 |
| 35. Screening Effects | 172 |
| 36. Experimental Data on the Isotope Shift of Heavy Elements | 175 |
| 37. Discussion of Results | 183 |

CHAPTER II

NUCLEAR MOMENTS IN FREE MOLECULES

| | |
|--|-----|
| 38. Historical Survey | 189 |
| 39. On the Spectra of Diatomic Molecules | 190 |
| 40. The Hfs of the Rotational States of Diamagnetic Diatomic Molecules and the Effect of External Fields | 204 |
| 41. Magnetic Molecular Beam Radio-Frequency Resonance Spectroscopy | 220 |
| 42. Electric Molecular Beam Radio-Frequency Spectroscopy | 230 |
| 43. The Measurement of the Magnetic Moment of the Neutron | 235 |
| 44. The Spectra of Polyatomic Molecules | 241 |
| 45. Microwave Spectroscopy | 251 |
| 46. The Hfs of the Rotational Lines of Diamagnetic Molecules | 258 |
| 47. The Zeeman Effect of the Hfs of Rotational Lines | 264 |
| 48. Estimate of the Electric Field Gradient in Molecules | 266 |

CHAPTER III

NUCLEAR MOMENTS IN LIQUIDS AND CRYSTALS

| | |
|---|-----|
| 49. Survey | 275 |
| I. NUCLEAR MAGNETIC RESONANCE | 277 |
| 50. Theoretical Foundations of Nuclear Magnetic Resonance | 277 |
| 51. Slow Passage Through Resonance | 282 |

| | |
|--|---------|
| 52. The Effect of Nuclear Magnetic Resonance on Associated Oscillatory Circuits | 288 |
| 53. The Effect of Nuclear Quadrupole Moments on Nuclear Resonance | 301 |
| 54. Bloch's Undamped Solution | 304 |
| 55. On Relaxation Times | 307 |
| 56. Spin Echos | 313 |
| 57. Nuclear Magnetic Resonance in Metals | 318 |
| 58. Results of Nuclear Magnetic Resonance Investigations | 320 |
| II. NUCLEAR QUADRUPOLE RESONANCE | 325 |
| 59. Foundations of the Method | 325 |
| 60. The Measurement of Pure Nuclear Quadrupole Frequencies | 330 |
| 61. Results of Nuclear Quadrupole Resonance Investigations | 332 |
| 62. The Zeeman Effect of Nuclear Quadrupole Resonance | 336 |
| III. PARAMAGNETIC RESONANCE | 341 |
| 63. Introduction | 341 |
| 64. The Zeeman Effect of the Electronic Ground States of Paramagnetic Ions in Crystals | 343 |
| 65. The Hyperfine Structure of Paramagnetic Ions in Crystals | 356 |
| 66. The Paramagnetic Resonance Experiments | 363 |
| CHAPTER IV | |
| NUCLEAR MOMENTS AND NUCLEAR MODELS | |
| 67. Simple Conclusions from the Experimental Data | 380 |
| 68. The Nuclear Shell Model | 386 |
| 69. Comparison of the Shell Model with Experimental Results | 401 |
| 70. The Light Nuclei | 409 |
| 71. The Odd-Odd Nuclei | 415 |
| 72. The Deformation of Nuclei | 416 |
| 73. Applications of the Nuclear Models | 434 |
| Various Tables | 441 |
| Explanation of Symbols | 459 |
| References | 466 |
| Element Index | 482 |
| Author Index | 484 |
| Subject Index | 494 |
