## I. THERMAL CONDUCTIVITY MEASUREMENT METHODS

INTRODUCTION . . . . .	3
------------------------	---

### CHAPTER 1. AXIAL HEAT FLOW METHODS OF MEASURING THERMAL CONDUCTIVITY

*M.J. Laubitz*

1. Introduction. . . . .	11
2. General Considerations. . . . .	12
3. Basic Problems in Axial Heat Flow . . . . .	16
4. Operating Procedures . . . . .	41
5. Experimental Systems . . . . .	45
Appendix. . . . .	51
References . . . . .	59

### CHAPTER 2. ANALYSIS OF APPARATUS WITH RADIAL SYMMETRY FOR STEADY-STATE MEASUREMENTS OF THERMAL CONDUCTIVITY

*J.P. Moore*

1. Introduction. . . . .	61
2. Fundamental Radial Heat Flow Apparatus. . . . .	63
3. Thermal Analysis—HEATING5 . . . . .	67
4. Heat Flow in a Fundamental RHFA with Right-Circular Symmetry . . . . .	68
5. Heat Flow in Experimental Apparatus for Measurements on Solids . . . . .	81
6. Thermal Conductivity Measurements on Powders Using Radial Heat Flow Apparatus . . . . .	102
7. Thermometry in Radial Heat Flow Apparatus. . . . .	109
8. Conclusions . . . . .	113
9. Recommendations. . . . .	116
Appendix. . . . .	117
References to Appendix . . . . .	121
References . . . . .	122

### CHAPTER 3. THERMOPHYSICAL PROPERTY DETERMINATIONS USING DIRECT HEATING METHODS

*R.E. Taylor*

1. Introduction. . . . .	125
2. Background . . . . .	127
3. Description of Several Direct Heating Apparatus . . . . .	132
4. Experimental Difficulties and Critical Evaluation of Direct-Heating Methods . . . . .	150
5. Summary . . . . .	164
References . . . . .	165

### CHAPTER 4. GUARDED HOT-PLATE METHOD FOR THERMAL CONDUCTIVITY MEASUREMENTS

*S. Klarsfeld*

1. Introduction. . . . .	169
2. Principles of the Method. . . . .	170
3. Apparatus Types. . . . .	173
4. Field of Application. . . . .	175
5. Apparatus Description and Design Requirements. . . . .	176
6. Error Evaluation, Performances . . . . .	187
7. Limitations Due to Specimen. . . . .	197
8. Realizations and Measurement Results. . . . .	199
9. Reference Materials and Interlaboratory Comparative Measurements. . . . .	218
10. Conclusions . . . . .	224
References . . . . .	225

### CHAPTER 5. HOT-WIRE METHOD FOR THE MEASUREMENT OF THE THERMAL CONDUCTIVITY OF REFRACTORY MATERIALS

*W.R. Davis*

1. Introduction and Background . . . . .	231
2. Experimental Techniques . . . . .	234
3. Comparison with Other Methods . . . . .	242
4. Modifications . . . . .	245
5. Summary . . . . .	250
References . . . . .	252

### CHAPTER 6. B.S. 1902 PANEL TEST METHOD FOR THE MEASUREMENT OF THE THERMAL CONDUCTIVITY OF REFRACTORY MATERIALS

*W.R. Davis*

1. General Introduction . . . . .	255
2. General Outline of the Method. . . . .	260
3. Error Analysis. . . . .	264
References . . . . .	268

## II. ELECTRICAL CONDUCTIVITY MEASUREMENT METHODS

### CHAPTER 7. HIGH-TEMPERATURE MEASUREMENTS OF ELECTRICAL CONDUCTIVITY

*Jean François Baumard*

1. Introduction. . . . .	271
2. General Considerations About the Conductivity Measurements . . . . .	273
3. Measurement of Total Conductivity: Two- and Four-Probe Arrangements . . . . .	277
4. Measurements on Mixed Conductors . . . . .	279
5. Spurious Effects in High-Temperature Measurements of Electrical Conductivity . . . . .	287
6. Contacts and Electroding Techniques . . . . .	290
7. A Short Survey of Instrumentation . . . . .	292
References . . . . .	294

## III. THERMAL DIFFUSIVITY MEASUREMENT METHODS

THERMAL DIFFUSIVITY: INTRODUCTION. . . . .	299
--	-----

### CHAPTER 8. PULSE METHOD FOR THERMAL DIFFUSIVITY MEASUREMENT

*R.E. Taylor and K.D. Maglič*

1. Introduction. . . . .	305
2. The Method . . . . .	306
3. Experimental . . . . .	309
4. Transient Temperature Measurement. . . . .	313
5. Measurement Errors. . . . .	317
6. Summary . . . . .	332
References . . . . .	333

### CHAPTER 9. TEMPERATURE WAVE TECHNIQUES

*L.P. Phyllipov*

337

### CHAPTER 10. ELECTRON BOMBARDMENT MODULATED HEAT INPUT METHOD

*R. De Coninck and V.E. Peletsky*

1. Introduction. . . . .	367
2. Principle of the Procedure Used for Thermal Diffusivity Measurement by Modulated Electron Bombardment. . . . .	368
3. Physical Principles Interfering with Heating by Electron Bombardment. . . . .	373

4. Mathematical Principles for the Experimental Determination of Thermal Diffusivity by Modulated Electron Heating. . . . .	380
5. Experimental Techniques of Thermal Diffusivity Measurement Using Modulated Electron Heating . . . . .	391
6. Conclusions . . . . .	418
References. . . . .	422

#### CHAPTER 11. MONOTONIC HEATING REGIME METHODS FOR THE MEASUREMENT OF THERMAL DIFFUSIVITY

*G.M. Volokhov and A.S. Kasperovich*

1. Measurement of Thermal Diffusivity in the Narrow Temperature Range . . . . .	430
2. Measurement of Thermal Diffusivity in the Wide Range . . . . .	443
Appendix. . . . .	449
References. . . . .	453

### IV. SPECIFIC HEAT MEASUREMENT METHODS

SPECIFIC HEAT: AN INTRODUCTION. . . . .	457
---	-----

#### CHAPTER 12. ADIABATIC CALORIMETRY

*D.N. Kagan*

1. Introduction. . . . .	461
2. Method . . . . .	462
3. Adiabatic Calorimeters. . . . .	471
4. Automatic Control of Adiabatic Conditions . . . . .	506
5. Estimation of Errors of Adiabatic Calorimetry . . . . .	510
References. . . . .	521

#### CHAPTER 13. HEAT-CAPACITY CALORIMETRY BY THE METHOD OF MIXTURES

*David A. Ditmars*

1. Introduction. . . . .	527
2. Fundamental Considerations . . . . .	527
3. The Method of Mixtures . . . . .	531
4. Classification and Description of Drop Calorimeters. . . . .	536
5. Current Activity and Future Prospects. . . . .	543
References. . . . .	548

#### CHAPTER 14. LEVITATION CALORIMETRY

*Vitaliy Ya. Chekhovskoi*

1. Introduction. . . . .	555
--------------------------	-----

2. Peculiarities of Investigations of Thermodynamic Properties of Refractory Metals and Their Melts at Temperatures Above 1500–2000 K. . . . .	556
3. Levitation Heating. . . . .	559
4. Measurement of Temperature of Solid and Liquid Specimens. . . . .	563
5. Facilities for Levitation Calorimetry and Description of Experimental Procedures Used. . . . .	568
6. Measurement Errors. . . . .	577
References. . . . .	585

## CHAPTER 15. MODULATION CALORIMETRY

*Ya.A. Kraftmakher*

1. Introduction. . . . .	591
2. Theory of Modulation Method. . . . .	593
3. Modulation of Heating Power . . . . .	596
4. Registration of Temperature Oscillations . . . . .	599
5. Nonadiabatic Regime of Measurements . . . . .	607
6. Direct Measurement of Temperature Coefficient of Specific Heat . . . . .	610
7. Determination of Isochoric Specific Heat Using Temperature Fluctuations. . . . .	613
8. Measurements at High Modulation Frequencies. . . . .	615
9. Modulation Methods for Studying Thermal Expansion, Electrical Resistivity, and Thermopower . . . . .	618
10. Determination of Temperature of Wire Samples by Thermal Noise . . . . .	625
11. Accuracy of Modulation Measurements . . . . .	627
12. Employments of Modulation Methods. . . . .	629
13. Conclusion. . . . .	631
References. . . . .	634

## CHAPTER 16. PULSE CALORIMETRY

*Ared Cezairliyan*

1. Introduction. . . . .	643
2. Description of Methods . . . . .	644
3. Chronology of Developments. . . . .	650
4. Experimental Difficulties and Sources of Errors . . . . .	661
5. Summary and Conclusions . . . . .	665
References. . . . .	667

## CHAPTER 17. APPLICATION OF DIFFERENTIAL SCANNING CALORIMETRY TO THE MEASUREMENT OF SPECIFIC HEAT

*M.J. Richardson*

1. Introduction. . . . .	669
2. Differential Thermal Analysis and Differential Scanning Calorimetry. . . . .	670
3. Operating Variables . . . . .	675

4. Practical Aspects . . . . .	680
5. Concluding Remarks . . . . .	684
References . . . . .	685

## V. THERMAL EXPANSION MEASUREMENT METHODS

### CHAPTER 18. THERMAL EXPANSION MEASUREMENT BY INTERFEROMETRY

*G. Ruffino*

1. Introduction . . . . .	689
2. Interference Patterns . . . . .	690
3. Dilatometric Interferometers . . . . .	696
4. The Experimental Cell . . . . .	700
5. Experimental System Layout . . . . .	701
6. Data Acquisition and Treatment . . . . .	705
References . . . . .	706

## VI. THERMAL RADIATIVE PROPERTY MEASUREMENT

### CHAPTER 19. MEASUREMENT OF THERMAL RADIATION PROPERTIES OF MATERIALS

*J.C. Richmond*

1. Introduction . . . . .	709
2. Thermal Radiation Techniques . . . . .	710
3. Measurement of Thermal Radiation Properties . . . . .	727
4. Discussion and Conclusions . . . . .	756
Appendix: Nomenclature . . . . .	757
References . . . . .	762

## VII. THERMOPHYSICAL PROPERTY STANDARD REFERENCE MATERIALS

### CHAPTER 20. CERTIFIED REFERENCE MATERIALS FOR THERMOPHYSICAL PROPERTIES

*R.K. Kirby*

Index . . . . .	777
