

CONTENTS

<i>Participants</i>	xi
<i>Preface</i>	xv
<i>Autobiographical Commentary of Lars Onsager</i>	xix
<i>After-Dinner Address: "The Changing Face of Physics"</i> L. VAN HOVE	xxv

Part One INTRODUCTORY LECTURES

1. <i>The Ising Model in Two Dimensions</i> L. ONSAGER	3
2. <i>One-dimensional Delta Function Interaction</i> C. N. YANG	13
DISCUSSION	20
3. <i>The Role of Models in Understanding Phase Transitions</i> M. KAC	23
DISCUSSION	38
4. <i>Metastability, Instability, and the Dynamics of Unmixing in Binary Critical Systems</i> J. W. CAHN	41
DISCUSSION	64

Part Two GENERAL THEORY

A. Thermodynamics and Scaling

<i>Rapporteur's Introduction: Thermodynamics and Scaling</i> B. WIDOM . . .	69
1. <i>Asymmetry of Critical Exponents and the Asymptotic Scaling for Critical Exponents</i> B. D. JOSEPHSON	73
DISCUSSION	75
2. <i>Generalized Scaling and the Parametric Equation of State in the Critical Region</i> M. J. COOPER	77
DISCUSSION	86
3. <i>Self-avoiding Walks and Scaling</i> C. DOMB	89
DISCUSSION	103
4. <i>Secondary Variables in Critical Phenomena, with Application to λ Transition in Liquid Helium</i> O. K. RICE AND D.-R. CHANG	105
DISCUSSION	123

5. <i>Thermodynamics of a Magnetic Model Exhibiting a First-order Phase Transition</i> H. STENSCHKE	125
DISCUSSION	133
6. <i>Critical States of Ferroelectrics</i> G. FALK	135
DISCUSSION	137

B. *Ising Systems and Field Theory*

Rapporteur's Introduction: Ising Systems and Field Theory

P. C. MARTIN	141
1. <i>Random Impurities in the Two-dimensional Ising Model</i> B. M. McCOY	145
DISCUSSION	153
2. <i>Randomly Dilute Ising and Heisenberg Systems</i> G. S. RUSHBROOKE	155
DISCUSSION	163
3. <i>Analytical Properties of a Class of Planar Ferroelectric Models</i> M. L. GLASSER	165
DISCUSSION	174
4. <i>Contributions of Broken-symmetry Modes in Second-order Phase Transitions</i> R. E. MILLS	177
5. <i>Renormalization Group and Theory of Phase Transitions</i> G. JONA-LASINIO	189
DISCUSSION	200
6. <i>Series Expansions and the Universality Hypothesis</i> H. S. STANLEY	203
DISCUSSION	217
7. <i>Inequalities Among the Ising-Heisenberg Model Critical Indices</i> G. A. BAKER, JR.	221
DISCUSSION	229
8. <i>Theory of Critical Slowing Down</i> M. SUZUKI	231
DISCUSSION	239

Part Three DEVELOPMENT OF SPATIAL ORDERING

1. <i>Spatial Order</i> L. GUTTMAN	243
DISCUSSION	254
2. <i>Early-stage Clustering and Ordering Kinetics in Binary Solid Solutions</i> D. DE FONTAINE AND H. E. COOK	257
3. <i>Bose-Einstein Condensation of Concentration Fluctuations in Binary Solid Solutions</i> D. DE FONTAINE	277
DISCUSSION	287
4. <i>Long-range Order in Beta Brass</i> C. B. WALKER AND D. R. CHIPMAN	289
DISCUSSION	297
5. <i>Multisite Cluster Probabilities in Ising Lattices</i> P. C. CLAPP	299
DISCUSSION	307
6. <i>The "Gestalt" of Local Order</i> J. E. GRAGG, JR., P. BARDHAN, AND J. B. COHEN	309
DISCUSSION	336
7. <i>Ferroelasticity Due to Hydrogen in Metals</i> G. ALEFELD	339
DISCUSSION	361

Agenda Discussion: Development of Spatial Ordering Chairman, S. C. Moss	363
--	-----

Part Four MAGNETS AND SUPERCONDUCTORS

1. <i>Critical Points Dependent on Parameters</i> R. B. GRIFFITHS	377
DISCUSSION	389
2. <i>Critical Properties of Ferromagnets and Liquid Crystals</i> J. D. LITSTER	393
DISCUSSION	404
3. <i>Scaled Equation of State and Derived Properties</i> M. VICENTINI-MISSONI	407
DISCUSSION	421
4. <i>Critical Relaxation in Isotropic Ferro- and Antiferromagnets Below the Transition Point</i> J. VILLAIN	423
DISCUSSION	436
5. <i>Critical Magnetic Behavior of Palladium-Iron Alloys</i> J. S. KOUVEL AND J. B. COMLY	437
DISCUSSION	448
6. <i>Fluctuations Near the Phase Transition in "One-dimensional" Superconductors</i> R. J. WARBURTON AND W. W. WEBB	451
DISCUSSION	468
Agenda Discussion: Magnets and Superconductors Chairman, R. A. Ferrell	471

Part Five TRANSPORT PROPERTIES

1. <i>NMR and Neutron Scattering Studies of Critical Fluctuations in Uniaxial Antiferromagnets</i> P. HELLER	483
DISCUSSION	488
2. <i>Dynamical Theory of Critical Fluctuations with Applications to Transport Properties in the Critical Region</i> K. KAWASAKI	489
DISCUSSION	500
3. <i>On the Spectrum and the Intensity of Light Scattered from a Fluid Near its Critical Point</i> G. B. BENEDEK, J. B. LASTOVKA, M. GIGLIO, AND D. CANNELL	503
4. <i>Experimental Study of the Dynamics of Critical Fluctuations in a Binary Mixture</i> P. BERGE AND B. VOLOCHINE	529
5. <i>Ultrasonic Measurements Near the Liquid-Gas Critical Point</i> M. BARMATZ	541
DISCUSSION OF PAPERS 3, 4, AND 5	559
Agenda Discussion: Transport Properties Chairman, L. P. Kadanoff	561
6. <i>Electronic Phase Transitions</i> D. ADLER	567
7. <i>Some Aspects of the Theory of the Mott Transition</i> T. M. RICE AND W. F. BRINKMAN	593
DISCUSSION OF PAPERS 6 AND 7	608
8. <i>Recent Developments of the Lee-Yang Circle Theorem and Analyticity of the Free Energy</i> M. SUZUKI	613
DISCUSSION	620

Summary Agenda Discussion: Critical Phenomena Chairman, E. Montroll	623
---	-----

Index	647
