

Contents

1. Introduction	3
2. Partially discrete models	5
2.1. The Peierls–Nabarro model	5
2.2. The van der Merwe model	13
2.3. Dislocation array models	15
3. Lattice models using phonon representations	22
3.1. Static analyses (lattice statics)	22
3.2. Dynamic analyses	31
3.3. Dislocation–phonon interactions	36
4. Lattice models using computer simulation	41
4.1. Interatomic potentials in defect calculations	41
4.2. Simulation calculations	48
