Preface	xi

I. THEORETICAL STUDIES ON PHYSICAL ADSORPTION

1. M. M. Dubinin Fundamentals of the theory of physical adsorption of gases and vapours in micropores	3
2. B. A. Gottwald The influence of energetic heterogeneity on the adsorption isotherm at low coverage	19
3. J. P. Hobson and R. Chapman The onset of Henry's law for physical adsorption of a vapour on a heterogeneous surface	33
4. J. Patigny, Y. Barbaux and J.-P. A. Beaufile Definition and measurement of an electric field at the surface of a solid	49
5. A. Schram Electrostatic forces in physical adsorption of rare gases on transition metals	57
6. G. V. Tsitsishvili, T. G. Andronikashvili, Sh.D. Sabelashvili and T. A. Chumburidze Thermodynamical characteristics of substances adsorbed on zeolites	71
7. W. A. Steele and E. J. Derderian Interaction of pairs of adsorbed helium atoms	85
8. D. E. Hagen, A. D. Novaco and F. J. Milford Quantum states and heat capacity of helium adsorbed on graphite	99
9. F. Ricca, C. Pisani and E. Garrone Localized and delocalized states of adsorbed rare-gas atoms	111
10. J. G. Daunt and E. Lerner Adsorption of ^3He and ^4He on various substrates below 30°K	127

11. T. J. Lee and L. Gowland	
An experimental investigation of the physisorption of helium on argon, krypton and xenon	137
II. PARTICLE BEAMS IN GAS-SOLID INTERACTION STUDIES	
1. W. H. Weinberg and R. P. Merrill	
Atomic and molecular scattering, diffraction and trapping on tungsten and platinum surfaces	151
2. M. D. Scheer, R. Klein and J. D. McKinley	
Surface lifetimes of the alkalis and halogens on molybdenum	169
3. R. Chappell and D. O. Hayward	
The interaction of hydrogen and deuterium beams with metal surfaces	189
4. R. Clampitt	
Interaction of ions and electrons with adsorbed gases	203
III. CHEMISORPTION OF GASES BY METALS	
1. T. B. Grimley	
Anderson's hamiltonian and the theory of the chemisorption of atoms by metals	215
2. L. A. Pétermann	
The interpretation of slow desorption kinetics	227
3. M. Abon, B. Tardy and S. J. Teichner	
Field emission and flash desorption study of adsorption and thermal decomposition of ammonia on molybdenum	245
4. W. A. Schmidt and O. Frank	
Adsorption of H₂, CO, N₂ and O₂ on tungsten field emitters: imaging of adsorption layers by channel plate field emission microscopes	261
5. M. A. Chesters, J. Pritchard and M. L. Sims	
Infrared reflection spectra and surface potentials of carbon monoxide chemisorbed on copper, silver and gold	277
6. R. C. A. Contaminard, R. C. Cosser and F. C. Tompkins	
The chemisorption of hydrazine on metals and insulators	291
7. N. Taylor and R. Creasey	
The adsorption of hydrogen on nickel: a study of kinetic and equilibrium properties	297
8. P. Kronauer and D. Menzel	
Photodesorption of carbon monoxide from tungsten	313

9. A. M. Horgan and D. A. King Kinetics of adsorption and displacement in the interaction of H₂ and CO with clean nickel surfaces	329
10. G. Ertl and J. Koch Adsorption studies with a Pd(111) surface	345
11. T. W. Haas, J. T. Grant and G. J. Dooley On the identification of the chemical state of adsorbed species with Auger electron spectroscopy	359
12. J. Lecante The behaviour of the Mo(100) surface plasmon with CO adsorption	369
13. R. M. Lambert, J. W. Linnett and J. A. Schwarz Interaction of oxygen with Mo(111)	381
14. L. D. Schmidt Crystallographic anisotropies in chemisorption structures and kinetics on BCC metals	391
15. D. Mourrot, Y. Ballu and D. A. Degras Measurement of work-function changes (CO on Mo)	405
16. G. Rovida, E. Ferroni, M. Maglietta and F. Pratesi Chemisorption of oxygen on silver single crystals	417
17. G.-A. Martin, G. Dalmai-Imelik and B. Imelik Study of chemisorption of hydrogen and ethylene on nickel by LEED and magnetic methods	433
Author index	445
Subject index	453
