Introductory Lecture. A Comparison of Neutrons and Synchrotron Radiation for Defect Studies. By G. Kostorz (With 6 Figures)	1
---	---

Part I	Short Range Order
---------------	--------------------------

Monte Carlo Simulation of Alloy Phase Diagrams and Short-Range Order. By K. Binder (With 5 Figures)	12
The Determination of Atomic Interaction Energies in Solid Solutions from Short Range Order Coefficients – An Inverse Monte Carlo Method. By V. Gerold and J. Kern (With 5 Figures)	17
Short-Range Order and Atomic Interaction in NiCr_x By W. Schweika and H.-G. Haubold (With 5 Figures)	22
High T-Dependence of Local Order in Magnetic FeM Alloys from Neutron Diffuse Scattering By V. Pierron-Bohnes and M.C. Cadeville (With 4 Figures)	28
Short-Range Order in a $\text{Ni}_{63.7}\text{Zr}_{36.3}$ Amorphous Alloy. Effects of Structural Relaxation. By Y. Calvayrac, A. Quivy, S. Lefebvre, J. Bigot, and R. Bellissent (With 4 Figures)	32
A SANS Approach to Possible Hierarchical Structures of Defects in Amorphous Alloys. By C. Janot and B. George (With 5 Figures)	37
SANS Measurements on Metallic Glasses and the Contributions of Nuclear and Magnetic Structure Defects and of the External Surfaces By R. Yavari, P. Desre, and P. Chieux (With 6 Figures)	42
Short-Range Order in Metallic Glasses By P. Lamparter (With 4 Figures)	49

Part II	Precipitation and Growth; Time-Dependent Experiments
----------------	---

Phase Separation in Alloys Using Low Q Neutron Scattering By R.J. Stewart (With 7 Figures)	56
---	----

SANS-Investigation of Early Stage Precipitation Kinetics in Cu-2.9 at.% Ti. By H. Eckerlebe, R. Kampmann, and R. Wagner (With 10 Figures)	66
Phase Transformations in Fe-Cu-Alloys – SANS-Experiments and Theory. By R. Kampmann and R. Wagner (With 7 Figures)	73
Kinetics of Order-Disorder Phenomena in Some Intermetallic Platinum-Based Alloys. By M.C. Cadeville, C. Leroux, V. Pierron-Bohnes, and C.E. Dahmani (With 6 Figures)	78
Studies of Heterogeneities of Micrometer-Range with Double Crystal Diffractometer. By D. Schwahn and M.H. Yoo (With 6 Figures)	83
Decomposition Kinetics in the Superalloy Nimonic PE16 and the System NiAlTi Investigated by TEM, FIM and SANS By W. Hein, H.P. Degischer, D.J. Jensen, H. Strecker, W. Wagner, R.P. Wahi, and H. Wollenberger (With 7 Figures)	89
Comparative TEM, FIM and SANS Study of the Cu-2 at.% Co Decomposition. By H.P. Degischer, J. Piller, W. Wagner, and H. Wollenberger (With 5 Figures)	94
Quantitative Measurement of Anomalous Small-Angle X-Ray Scattering (ASAXS) in Some Al-Zn-Ag Alloys By O. Lyon and J.P. Simon (With 2 Figures)	99

Part III **Hydrogen in Metals**

Interstitial Point Defects (D,N,O) in Transition Metals By J. Peisl, H. Dosch, and A. von Schwerin (With 5 Figures)	106
Coherent Quasi-Elastic Scattering of Neutrons from Lattice Gas Systems. By D.K. Ross, D.A. Faux, M.W. McKergow, D.L.T. Wilson, and S.K. Sinha (With 1 Figure)	116
Mechanism of Hydrogen Diffusion in Intermetallic Hydrides By R. Hempelmann and D. Richter (With 5 Figures)	121
Hydrogen Diffusion in Amorphous Liquid-Quenched $\text{Pd}_x\text{Si}_{1-x}\text{H}_y$ Measured by QNS By G. Driesen, R. Hempelmann, and D. Richter (With 3 Figures)	126

Part IV **Diffusion in Alloys and Hydrogen in Metals**

Quasielastic Neutron Scattering Study of Fast Diffusion of Co in β -Zr. By W. Petry, G. Vogl, T. Flottmann, and A. Heidemann (With 2 Figures)	134
---	-----

Systematic Investigation of Self-Correlation Functions in Cubic Lattices; Mono- and Divacancy Mechanisms By K. Ruebenbauer and B. Sepiol (With 2 Figures)	139
Quasielastic Coherent Scattering for Atomic Diffusion via Vacancies By K. Schroeder	143
Lattice Dynamics and Interstitial Motion By H.R. Schober and A.M. Stoneham (With 1 Figure)	149
Interatomic Forces Near a Hydrogen Impurity in Metals By G. Solt and H. Beck (With 4 Figures)	155
H Tunneling and Local Diffusion in NbO_xH_y By H. Wipf, A. Magerl, and K. Neumaier (With 2 Figures)	161
Jahn-Teller Relaxation Effects in the Inelastic Neutron Scattering Spectra of Hydrogen Metal Systems. By A. Klamt (With 3 Figures) .	165
Localized Vibrations of Hydrogen in Metals By D. Richter, R. Hempelmann, J.J. Rush, J.M. Rowe, J. Eckert, J.A. Goldstone, and D. Tonks (With 3 Figures)	170
One-, Two- and Three-Dimensional Disorder of D-Atoms in Non-Stoichiometric TaD_x . By J. Hauck and K. Parlinski (With 3 Figures)	176
Neutron Radiography Studies of Spinodal Decomposition in NbH_x By G. Steyrer and J. Peisl (With 5 Figures)	181

Part V	Point Defects, Radiation Damage, Voids, and Bubbles
---------------	--

Irradiation Damage in Metals: A Story of But Also's By Y. Quéré (With 8 Figures)	188
Determination of Helium Densities in Bubbles Using a Contrast Variation Method. By D. Schwahn, W. Kesternich, S. Spooner, H. Schroeder, H. Ullmaier, and J. Schelten (With 6 Figures)	197
Studies of Stress- and Fatigue-Induced Defects Using Small-Angle Neutron Scattering. By J.R. Weertman (With 7 Figures)	204
Neutrons in Practical Metallurgy By R.N. Sinclair and C.G. Windsor (With 4 Figures)	213
Point Defects in Metals in Thermal Equilibrium By W. Trost, K. Differt, K. Maier, and A. Seeger (With 3 Figures) ...	219
Saturation of Irradiation-Induced Precipitation By G. Martin (With 1 Figure)	225

Analysis of Defect Microstructures in Irradiated Ferritic Alloys
By P.A. Beaven, F. Frisius, R. Kampmann, and R. Wagner
(With 4 Figures) 228

Influence of Electron Irradiation on Decomposition Kinetics and
Morphology in CuNiFe Alloys
By W. Wagner, R. Poerschke, and H. Wollenberger (With 5 Figures) . 235
