

Contents of Volume 1

Theme 1

PRACTICAL APPLICATIONS OF FRACTURE MECHANICS

A. Surface Cracks

Observations on prediction of non-self similar subcritical crack growth and stress intensity distributions

C. W. Smith 3

An empirical approach to determining K for surface cracks

D. Wilhem, J. Fitzgerald, J. Carter and D. Dittmer 11

Analysis and repair of flaws in thick structures

R. Jones and R. J. Callinan 23

Experimental study of surface crack propagation in an E 36 steel

M. Truchon and H. P. Lieurade 33

Fatigue tests on defective circumferential welded pipe joints

T. Watanabe, Y. Hasegawa and K. Matsumoto 41

Fatigue crack growth in austenitic stainless steel piping

M. Bethmont, J. L. Cheissoux and J. Lebey 49

B. Failure Criteria for Components

Stable growth of part through cracks in maraging steel sheets

A. Leduff, J. L. Castagne, D. Miannay, Ph. Le Poac and D. Francois 59

Ductile failure of piping

R. Steinbuch and G. Bartholome 67

Interpretation of the tearing crack growth concept and its application to an engineering structure

G. G. Musicco, P. C. Paris, B. A. Szabo and M. P. Rossow 75

The fracture toughness of high strength engineering alloys containing short cracks

B. Wiltshire and J. F. Knott

87

Theme 2

CRACK TIP SINGULARITY ANALYSIS AND COMPUTATION

A. Theoretical Static and 3D Calculations

Defect forces, defect couples and path integrals

R. L. Roche

97

Analytic asymptotic solution of the kinked crack problem

M. Amestoy, H. D. Bui and K. Dangvan

107

Evaluation of process zone by using Jext integral under large scale yielding

H. Miyamoto, M. Kikuchi and K. Ishida

115

On the maximum-energy-release-rate criterion for fracture under combined loads

K. C. Hwang, D. H. Hua and S. W. Yu

123

Two stress intensity factor calculation methods and solutions for various three-dimensional crack problems

S. S. Palusamy and J. Heliot

131

B. 3D and Shell Calculations

An integral equations method for resolution, in opening mode, of the problem of plane cracks at free surface

C. Putot

141

Near-crack tip finite strain analysis

P. C. M. Gortemaker, C. de Pater, R. M. E. J. Spiering

151

The determination of stress intensity factors on elastic shells:

A possible method

D. Bergez

161

Stress intensity factors in pipe elbows

F. Erdogan and F. Delale

169

Inelastic analysis of surface flaws using the line-spring model*

D. M. Parks

Theme 3

PHYSICAL FRACTURE PROCESSES — STRUCTURAL ASPECTS

A. Ductile Rupture: Mechanisms of Fibrous Fracture

The effect of inclusion orientation on ductile fracture

A. A. Willoughby, P. L. Pratt and T. J. Baker

179

*Articles marked with an asterisk can be found at the end of Volume 5.

Ductile fracture under multiaxial stress states between pairs of holes R. J. Bourcier and D. A. Koss	187
Hole nucleation and ductile failure in multiaxial states of stress R. D. Thomson and J. W. Hancock	195
The ductile fracture of high-strength steels S. Slatcher and J. F. Knott	201
Mechanisms of fibrous fracture of powder forged steels F. L. Bastian and J. A. Charles	209
 <i>B. Ductile and Brittle Fracture</i>	
Anisotropy of bulk-formability in 2024-T351 aluminium plates and bars T. Erturk	217
An assessment of the fracture toughness associated with flat and slant crack growth in A533B steel I. S. Abou-Sayed, C. W. Marschall and M. F. Kanninen	227
Mechanical model and mathematical analysis for ductile fracture W. T. Chiang	235
Mechanisms and criteria for cleavage S. P. Lynch	245
Fracture toughness of ferritic spheroidal graphite cast irons A. Le Douaron, R. Lafont, D. Poulain and C. Cloitre	255
 <i>Theme 5</i>	
FATIGUE	
 <i>A. Microscopic Aspects of Fatigue</i>	
The influence of gaseous hydrogen on the fracture process in Fe-2.6%-Si single crystals H. Vehoff, W. Rothe and P. Neumann	265
On the formation of extrusion-intrusion pairs during fatigue of copper A. Hunsche and P. Neumann	273
Slip plane facets in fatigued aluminium alloys S. J. Brett and R. D. Doherty	281
The dependence of fatigue crack propagation rate and crack plane on crystallographic orientation in Fe-3%Si single crystals Y. Higo and S. Nunomura	291
The route of fatigue cracks as deduced from dislocation patterns J. Awatani, K. Katagiri and K. Koyanagi	299

B. Micromechanisms of Initiation

Crack initiation mechanisms during low cycle fatigue of pure ferritic alloys

T. Magnin and J. H. Driver

307

Fatigue crack initiation after different surface treatments in precipitation hardening alloys

E. Hornbogen and C. Verpoort

315

The influence of dispersoids on fatigue crack propagation in Al-Mg-Si alloys

L. Edwards and J. W. Martin

323

Examination of several mechanical parameters to analyse the plastic fatigue crack initiation in geometrical concentration zones and mechanical notches

F. Billon

329

Fatigue crack initiation and propagation in Ti-6Al and Ti-6Al-4V

J. C. Chesnutt, N. E. Paton and M. R. Mitchell

337

Theme 7

TEST TECHNIQUES

A. Fracture Toughness under Dynamic Loading (I)

Comparison of impact testing on charpy V-notch specimens and WOL-IX-specimens

W. Seidl

347

Fracture initiation of metals at high loading rates

R. Dormeval, J. M. Chevallier and M. Stelly

355

Determination of the dynamic fracture toughness K_{Id} in impact tests by means of response curves

J. F. Kalthoff, S. Winkler, W. Bohme and W. Klemm

363

Experimental determination of dynamic fracture toughness by J integral method

B. Marandet, G. Phelipeau and G. Sanz

375

Experimental determination of high loading rate effects on fracture toughness of aluminium alloys

A. Andrzejewski, J. Klepaczko and G. Pluvinage

385

B. Fracture Toughness under Dynamic Loading (II)

Influence of strain rate and temperature on the tensile and fracture properties of structural steels

A. Krabiell and W. Dahl

393

An inter-laboratory programme of dynamic fracture toughness tests

P. R. Christopher et al.

401

- Criterion for crack instability under short pulse loads**
D. A. Shockley, J. F. Kalthoff, H. Homma and D. C. Erlich

415

Theme 8
POLYMERS AND COMPOSITES

A. Polymers

- The effect of a time-dependent craze stress on crack growth
in a linear viscoelastic material

L. N. McCartney

427

- Modelling R ratio effects in fatigue crack growth in polymers
J. G. Williams and A. M. B. A. Osorio

435

- Normalization of fatigue crack propagation behavior in polymers
J. A. Manson, R. W. Hertzberg and P. E. Bretz

443

- Effects of mean stress and frequency on fatigue crack growth
in hips

O. F. Yap, Y. W. Mai and B. Cotterell

449

- New model for the ductile fracture of high density polyethylene*
F. X. de Charentenay and J. B. Rieunier

- Kinetics of stress-crazing and fracture processes in moulded
polystyrene at different strain rates

K. P. Grobkurth

457

B. Composites

- Fibre length-strength relationships and the fracture of composites
M. R. Piggott

465

- Hygrothermal aging effects on the micromechanisms of crack
extension in glass fibre and carbon fibre composites
P. D. Anstice and P. W. R. Beaumont

473

- Analysis of thermal cracking of unidirectionally reinforced
composite structures in the micromechanical range
H. Braun and K. Herrmann

485

- Role of local fiber distribution at notch tip in the fracture
toughness of FRP
T. Kunio, M. Shimizu and S. Sohmiya

495

- The relationship of compliance changes during fatigue loading
to the fracture of composite materials
K. L. Reifsnider and A. Highsmith

503

- Defining three-dimensional damage effects in polymers
J. E. Fitzgerald

511
