

## **Contents of Volume 5**

### *Theme 1*

#### **PRACTICAL APPLICATIONS OF FRACTURE MECHANICS**

##### *F. Fatigue Resistance of Welded Joints*

Fatigue crack propagation in the vicinity of weld-deposits in high-strength, structural steel

J. E. M. Braid and J. F. Knott

2061

Fatigue behaviour of welded joints between dissimilar metals (austenitic stainless steels and low alloy steels)

C. Amzallag, J. L. Bernard, P. Rabbe and G. Slama

2071

Forecasting the fatigue life of welded joints under narrow band random loading

L. P. Pook and R. Holmes

2079

Fatigue crack growth in tubular welded T-joints

W. D. Dover and G. K. Chaudhury

2093

Fatigue and fracture resistance of a welded bridge detail

R. Roberts, J. W. Fisher, G. R. Irwin, K. D. Boyer,  
H. Hausmann, G. V. Krishna, V. Morf, R. E. Slockbower  
and J. Nishanian

2101

##### *G. Reliability and Probabilistic Analysis*

Assessment of the reliability of primary components of a pressurized water reactor by probabilistic fracture mechanics

R. Wellein

2109

The safety of isotropic flywheels

M. W. Schwartz

2119

Damage tolerance assessment of the A-7D aircraft structure

D. J. White and T. D. Gray

2127

Application of systems analysis methods to fracture control D. R. Hay, V. Mustafa and F. Puglisi	2137
Leak-before-break characterization and demonstration of a high-pressure helium storage vessel N. J. Drozdziel	2145
<i>Theme 2</i>	
CRACK TIP SINGULARITY ANALYSIS AND COMPUTATION	
<i>D. Dynamic Cracks (I)</i>	
Analysis of steady state crack growth by discrete dislocation theory H. Homma, T. Matsui and H. Nakazawa	2155
Dynamic fracture analysis: A translating - singularity finite element procedure S. N. Atluri and T. Nishioka	2163
A finite element analysis of transient crack problems with a path- independent integral S. Mall	2171
A thermodynamic description of inelastic fracture Q. S. Nguyen	2179
Path independent integral for the calculation of the energy release rate in elastodynamics A. Ehrlacher	2187
<i>E. Dynamic Cracks (II)</i>	
Plastic effects in dynamic crack propagation L. Dahlberg	2195
Crack-tip plasticity for rapid crack propagation J. D. Achenbach and V. Dunayevsky	2205
The crack-tip stress intensification associated with crack propagation and arrest E. Smith	2215
An analysis of fast fracture and arrest in DCB specimens using crack tip elements C. Patterson and M. C. Oldale	2225
Dynamic steady antiplane shear crack growth in an elastic-plastic material A. S. Douglas, L. B. Freund and D. M. Parks	2233
<i>Theme 3</i>	
PHYSICAL FRACTURE PROCESSES - STRUCTURAL ASPECTS	
<i>G. Concrete (II)</i>	
Effect of aggregate particle size on mechanical properties of concrete S. Ziegeldorf, H. S. Müller and H. K. Hilsdorf	2243

Study of concrete's cracking under multiaxial stresses J. Bergues and M. Terrien	2253
Crack propagation and fracture of composite materials such as concrete F. H. Wittmann and Y. V. Zaitsev	2261
Microcracks, deformation and physical properties of plain concrete K. Kato	2275
Fracture mechanism and strength of concrete under triaxial compression Y. V. Zaitsev	2281
Fracture of fine-corned concrete under short-time compressive load L. N. Popov and E. N. Ippolitov	2287

#### *H. Ceramics (II)*

The influence of microstructure and geometric factors on the stress state and the fracture toughness of ceramics F. E. Buresch	2293
Influence of internal stresses on the development of cracks in glasses U. Soltész, H. Richter and E. Sommer	2303
The suppression of creep cavitation and slow crack growth in Si-Al-O-N ceramics M. H. Lewis, B. S. B. Karunaratne and J. Meredith	2311

#### *Theme 4*

#### ELASTOPLASTIC FRACTURE MECHANICS CRITERIA

##### *E. Finite Elements Calculations*

Brittle fracture initiation characteristics under bi-axial tensile load with large scale and general yielding Y. Ueda, K. Ikeda, T. Yao, M. Aoki, S. Shibasaki and T. Shirakura	2321
A study on unstable ductile fracture S. Aihara, S. Machida and T. Knazawa	2329
The effect of strain rate on the J-integral S. Kodama, H. Misawa, M. Hasegawa and H. Nakayama	2337
Dynamic elastic-plastic characterization of nuclear pressure vessel material G. Angelino and C. Fossati	2345

*Theme 5*  
FATIGUE

*F. High Temperature Fatigue (I)*

Simulation of the service conditions of heat resistant steels by creep-rupture tests under variable stress or temperature and by strain controlled service-type fatigue tests

K. H. Kloos, J. Granacher, H. Barth and P. Rieth

2355

Effect of temperature and hold time on low-cycle fatigue of steel 13 CRMO 44

K. T. Rie, E. Lachmann and J. Ruge

2371

Interaction of damage mechanisms during high temperature fatigue

A. Plumtree and J. Lemaitre

2379

Effect of hold times on the elevated temperature fatigue crack growth behavior of Inconel 718 alloy

J. P. Pedron and A. Pineau

2385

Hold time effects on low cycle fatigue properties of 316L stainless steel at 600 and 650 degrees C

B. Rezgui, P. Petrequin and M. Mottot

2393

Characterizing and predicting crack growth behaviour in alloys at elevated temperature

A. Saxena and T. T. Shih

2403

*G. High Temperature Fatigue (II)*

Elevated temperature, low cycle fatigue of AISI 316 stainless steel

T. W. Thorpe and G. C. Smith

2413

Initiation and growth of fatigue cracks at high temperature

A. Plumtree and M. J. Douglas

2423

Fatigue of cast nickelbase superalloys at 850 degrees C

W. Hoffelner and M. O. Speidel

2431

On fatigue crack initiation and propagation at elevated temperature

H. Teranishi and A. J. McEvily

2439

Growth of small fatigue cracks at high temperature - applicability of conventional fracture mechanics

T. S. Cook, J. Lankford and G. P. Sheldon

2449

*Theme 6*

INFLUENCE OF ENVIRONMENT ON FRACTURE TOUGHNESS

*D. Irradiation Glass*

Fracture behavior and deformation mechanisms under fast neutron irradiation

J. L. Boutard and J. M. Dupouy

2459

Crack-arrest tests of irradiated high-copper ASTM A508 submerged-arc weld metal C. W. Marschall and A. R. Rosenfield	2467
Effects of neutron irradiation on the fracture of silicon carbide J. W. Malloy, J. M. McKenzie and J. C. Corelli	2477
Stress cracking and failure behaviour of glass fibre reinforced composites under the influence of diffusing (corrosive) media H. W. Gitschner, G. Menges and U. Thebing	2485
<i>Theme 7</i>	
<b>TEST TECHNIQUES</b>	
<i>F. Experimental Determination of Stresses and Strains at Crack Tip</i>	
A vibration technique for the determination of stress intensity factors C. J. Pye and R. D. Adams	2497
A survey of recent developments in the evaluation of stress intensity factors from isochromatic crack-tip fringe patterns H. P. Rossmannith and R. Chona	2507
An experimental study of the Dugdale model W. N. Sharpe and S. Paleebut	2517
Recrystallization methods for quantitative analysis of strain in plastic zones E. Hornbogen and E. Minuth	2529
In-situ study of deformation and initiation of ductile fracture at a notch-root F. Moussy	2537
<i>G. Fracture Toughness Determination</i>	
A comparative study on different methods to measure the crack opening displacement G. Knauf and H. Riedel	2547
On the non-uniqueness of statistical fracture parameters D. G. Rickerby	2555
Residual stress effects on fracture toughness measurements L. M. Barker	2563
The influence of test conditions on the fracture resistance of linepipe steels A. H. Priest and B. Holmes	2571
Fracture mechanics of steels in hydrogen environment G. M. Pressouyre and M. Gauthier	2579

## LATE PAPERS

Inelastic analysis of surface flows using the line-spring model D. M. Parks	2589
New model for the ductile fracture of high density polyethylene F. X. de Charentenay and J. B. Rieunier	2599
Some effects of inelastic constitutive models on crack tip fields in steady quasistatic growth D. M. Parks, P. S. Lam and R. M. McMeeking	2607
An improved methodology for predicting random spectrum load interaction effects on fatigue crack growth J. B. Chang, R. M. Engle and M. Szamossi	2615
An interaction effect consideration in cumulative damage on a mild steel under torsion loading T. Bui-Quoc	2625
