

Contents of Volume 6

Allocation G. Pomey	2637
Advancements in Macroscopic Fracture Mechanics G.R. Irwin	2641
Progress in the Practical Applications of Fracture Mechanics H.T. Corten	2649
Crack-tip Singularity Fields in Nonlinear Fracture Mechanics: A Survey of Current Status J.W. Hutchinson	2669
Influence of Environment on Fracture M.O. Speidel	2685
Practical Application of Fracture Mechanics A. Pellissier Tanon and E. Sommer	2705
Crack Tip Singularity Analysis and Computation B.A. Bilby and R. Labbens	2709
General Conclusions about Theme 4 Elastoplastic Fracture Mechanics Y. d'Escatha	2713
General Conclusions about Theme 5 Fatigue C. Bathias and TC. Lindley	2715
Experimental and Numerical Determination of K_{Ic} and G_{Ic} for Microconcrete D.R. Bressi and G. Ferrara	2719
Molecular Micromechanics of Polymer Fracture U.G. Gafurov and P.K. Khabibullaev	2725
Computer Simulation of Micro and Macromechanisms of Fibre Reinforced Composite Fracture I.M. Kopyov, A.S. Ovchinsky and N.K. Bilsagayev	2735

Microcracking Dynamic in Hydrogenated Austenitic Steels H. Mathias, Y. Katz and S. Nadin	2743
Effect of the Triaxiality and of the Shape and Content of Second Phase Particles on the Strain Amplification in the Mechanism of Ductile Fracture G. Mesmacque and J. Focet	2753
An Improved Methodology for Predicting Random Spectrum Load Interaction Effects on Fatigue Crack Growth J.B. Chang, R.M. Engle and M. Szamossi	2761
Author Index	2771
Subject Index	2777
