

Contents

The Structure and Electronic Configuration of Crystalline Surfaces Harry C. Gatos, <i>Massachusetts Institute of Technology</i> . . .	1
Present and Proposed Uses of Low-Energy Electron Diffraction in Studying Surfaces Lester H. Germer, <i>Cornell University</i>	23
The Effects of Oxide and Organic Films on Sliding Friction P. M. Ku, <i>Southwest Research Institute</i>	41
The Deformational and Geometrical Aspect of Surfaces in Sliding Contact F. F. Ling, <i>Rensselaer Polytechnic Institute</i>	57
Effect of Surface Energy on Lubrication Ernest Rabinowicz, <i>Massachusetts Institute of Technology</i> .	73
Problems of Producing a Clean Surface by Outgassing in Ultrahigh Vacuum Imre Farkass, <i>Ilikon Corporation</i>	87
Physical Adsorption by Homogeneous and Heterogeneous Solid Surfaces Sydney Ross, <i>Rensselaer Polytechnic Institute</i>	109
The Relation of the Attractive Forces at Interfaces to Wetting, Spreading, Adsorption, and Long-Range Attractive Forces Frederick M. Fowkes, <i>Sprague Electric Company</i>	139
Solid-to-Solid Adhesion J. J. Bikerman, <i>Massachusetts Institute of Technology</i> . . .	165
Spreading, Penetration, and Capillary Flow in Metallic Systems C. M. Adams, Jr., <i>Massachusetts Institute of Technology</i> .	175

Bibliography on Surface Phenomena (Selected References, 1963–1965)	
Helen C. Friedemann, <i>New York, New York</i>	189
Index.	203
